1.1   POTRev.html

Title: Piles 'O' Tiles

Type: Shareware Puzzle Game

Author: Paul Burkey

Number Of Disks: 1

Requirements: Mouse

Supports: Any Amiga

Hard Disk Installable: Yes

Being the "Match The Pairs" style of game that this is, you would

expect something very bland, and basic. Not so. This is of commercial

quality, and has loads of different tile deigns. Some of them are

very close in appearance, which does add to the fun of the game.

There are 10 levels in this game, although registering will let you

have access to the full 42. They are all of devellish quality and can

be quite challenging, in fact, it took me about 20 attempts to

complete one level.

I know that I am byest towards these games, as I like puzzles, but I

really cannot fault this game, and must give it full marks. I will of

course, be sending my registration fee, as I did for Dragon Tiles,

the other MTP game that I reviewed, as regular readers will no doubt

be aware.

bStephen Grahamub
