Chapter 1

Spis_E

1.1 Spis - using of program

```

      _____ ←
      |_____|
./  |(_____|
|_____| / 7  /_-(____)|_____| /  s p i s /
/____i/ / .  _/_____| \____i/ /  - _____/
tF!/_/_____| |_____| \_____| |  /__u'R! /

```

Spis v1.0 by Inikep/Genetic

Program Spis is created to make list of files and dirs, which are on hard disc, floppy disc or any device of AmigaDos. This is something like system dir command, but Spis reads all subdirs, have GUI, recognises file formats, can decrunching FILE_ID.DIZ from archives and much more...

Requirements

What is necessary to run Spis.

Autors

Copyright and addresses.

Instruction

About functions of program.

1.2 Spis - requirements

Requirements

Hardware:

Program Spis needs Kickstart 1.3 or higher and about 300KB free memory.

Software:

reqtools.library

powerpacker.library - in case of unpacking data packed with PP

xpkmaster.library - in case of depacking data packed with XPK
crm.library - in case of depacking data packed with Crunchmania
LHA in C: directory - if you need to depack FILE_ID.DIZ from archives
packed with LHA
LZX in C: directory - if you need to depack FILE_ID.DIZ from archives
packed with LZX

Compatibility:

This program shall work on all computers, was tested on different configurations:

A500/000/7MHz, Kickstart 1.3, 0.5MB chip+0.5MB fast
A1200/020/14MHz, Kickstart 3.0, 2MB chip
A1200/020/14MHz, Kickstart 3.0, 2MB chip+4MB fast
A1200/030/50Mhz, Kickstart 3.0, 2MB chip+4MB fast
A1200/040/25MHz, Kickstart 3.0, 2MB chip+8MB fast
Pentium/133Mhz, Kickstart 2.0, 2MB chip
Pentium/133Mhz, Kickstart 3.1, 2MB chip+8MB fast

This Pentium it is not a joke, program was tested on PC with emulator of Amiga UAE 0.6.4.

1.3 Spis - autors

Copyright

This program is freeware. It means that you can use Spis for free, you can copy Spis anybody and anywhere. You can't only change program and this instruction.

If you find some bugs or if you
have new ideas than write to autor:

iNIKEp/gENETIC
Przemek Skibinski
ul.Witosa 37
58-306 Walbrzych

e-mail: inikep@polbox.com

Who and what have done

Inikep/GNC - main coder of program and autor of this instruction
BlackAngel/GelD. - help in coding
CTP/Mawi - creator of some ideas used in program
TheFounder/u'R - starting ascii logo "Spis"
Nico Francois - autor of reqtools.library and powerpacker.library
Urban Muller - autor of xpkmaster.library
Thomas Schwarz - autor of crm.library
Thomas Ross - coder of routines _DIR_FIRST and _DIR_NEXT

1.4 Spis - about

```

1.5 Spis - buttons

Dir name - you can choose directory or device from to make file-list

Save as - you can choose name and place, where to do file-list

1.6 Spis - buttons2

Start - start of making file-list

Info - informations about main autor of program, about number of recognising file formats and about date of compiling (creating Spis)

Quit - you can leave program, iconify program or you can back to menu

Save config - saving configuration to file S:Spis.config (lub if S: don't exists to file SYS:Spis.config)

1.7 Spis - languages

English - all buttons and informations in english

Polish - all buttons and informations in polish

AmigaPL - polish language with polish letters in standard AmigaPL

1.8 Spis - options

What doing option on (when appears "V")

Decrunching files - this option can depacking files packed with XPK PowerPacker, Crunchmania and StoneCracker and you can to know about file format of packed file, of course this option works only with "Writing file format"

Writing file format - recognising file format and including file format to file-list, if you want to know about file format of packed file you can use "Decrunching files" option

Writing file comment - if file have comment, comment will be included in file-list

Including FILE_ID.DIZ - including FILE_ID.DIZ (if exist) from archives LHA, LZX, DMS and text-files

Filtering *.info - filtering all files with extension "info" (mainly icons)
