```
Who and where am I?  
End Try the important bro of this prog
```

1.3 Short Description

This prog fixes a little prob in the Karaoke MidiFiles from PC.
For some Kar files not recognized as Kar by midisplay

1.4 Exemple French Kar File

You know "Loosing my religion" the famous song from R.E.M. ?
For a long time I didn't can use it as a Karaoke file...Try it!

If you next run KaraoFIX on it, it will play perfectly (yes).
Why? What did KaraoFIX? It just had move a little sentence inside the file,
(generally for one char,but I had some with more..)
This famous sentence "MIDI KARAOKE FILE" that tell Midisplay it is a KAR.
Some KAR got some spaces (char\$20) before, and Midisplay don't recognize
them. Why? Is it a bug? Is it a bad KAR file? I don't know.

1.5 How to install it?

Are you just stupid?
There are 2 files! the executable, and the exemple Kar file!
Put them where you want! let's go!

1.6 How to use it?

This is just an amigados command!
so give it a file name to check....
Ex: KaraoFIX dh0:kars/LosingMyReligion.Kar
or ask him to scan a whole directory...
Ex: KaraoFIX dh0:kars/
ATTENTION! don't forget the final / or : otherwise it will try to scan a file

Don't hesitate to scan any directories...KaraoFIX is looking inside the files
before doing something... he knows recognize a Kar file and midifiles-only...

1.7 Who shall use it?

Everyone...what if there were some bad Kar files in your collection???
Come on! launch it on your dirs!

1.8 KaraoFIX history

Version 1.1

Nothing changed!! I just added this amigaguide and changed my address

Version 1.0

First release on aminet

1.9 Final Word

Now, all my Karaoke files are running...mmhh...not really I got some problems AGAIN! Check for that my other prog that is the bro of this one: KaraoFR mus/midi/KaraoFR.lha (on aminet, of course)
