1.2   Introduction

I had made MB for private use, but I decided to release it and let everyone use it. I had used many different sources to make MB (books, magazines, internet etc.). Next version will be released as soon as I get 50 new English and 50 new Polish lyrics. If you want to see it soon, send me some texts. All kinds of lyrics will be accepted (even your own band) except nazi, country and disco polo (Polish kind of disco :). Here is my address.

1.3   Authority law

Please, do not understand that work as a breaking of a copyright law.

I only want to appreciate my hard work (if you don't believe - try to

do it yourself..:-). MB is mailware, so if you use it often please,

send me a mail, letter or postcard. Of course I'll ge glad to see some

money but you don't have to do that - it's not a shareware.

You are not allowed to make any changes in guide. If you find anything

to correct - let me know and I'll do that.

All suggestions, infos, greetings, fucks send to address in chapter

about author .

1.4   Requierements

MusicBase requiered:

- Amiga

- any show prog to AmigaGuide file

(like MultiView, AmigaGuide)

Recomended:

- hard drive

- Blizzard 1260+16Mb Ram

(no, this is not a pC)

1.5   Instruction

It's as easy as fitting Amiga in Micronic tower 8-).

First, you have to choose language (Polish or English), then band

and song. That's all.

All lyrics contain also:

- name of the performer

- title of the song

- title of the album

- names, surname or nick of a person, who sent that text.

Misterious number you can find there, is a number of verion of MB with

that lyrics appearing for the first time. You can also find the list of

all songs in text file "Index". In "data" drawer you can find files

with texts of all bands. You can view it separately without running MB.

Simply load it into any guide viewer.
