## ReadMe

### 1.1 ReadMe

CheatCollection is a list of cheats, solutions and levelcodes to many games. There exist two versions, a German and an English one. The German one is no translation of the English, so it is possible that the German version has some more information to certain games. These two lists are collected independently.

I tried to make the list as little as possibly, so I use a lot of tab stops instead of spaces and I arranged all so, that it uses very less space.

The use of this list is very easy. Start the displaying with a double click on the icon. Now you have a big list of all games in this part and some buttons to go to the next parts (the list is splitted between the characters) or to the German part. If you want to read a cheat click on its name and you get the data.

The list is sorted by name. Game names starting with 'The' (The Settlers) are sorted with their correct name (Settlers, The). This is also done by German names starting with 'Der', 'Die' and 'Das' (Magazin, Das). I tried to get the names as complete as possible, so some may be at positions you do not expect (Deluxe Galaga and not Galaga). If you do not find a game try to find it at another position before telling it does not exist.

The highest size of one file should be around 400'000 bytes so the collection should also work fine on low-mem machines.

NOTE: If you do not start the AmigaGuide viewer (Multiview, Amigaguide, ...) out of the directory, where the files are located, the links between the files will not work. (Or you use the Path command to add the path.)

The cheatlists and texts included in this distribution can be used as you think it makes any sense (this includes the use for making an other cheat list and redistribution in any possible way). This is because I also took them out of other sources and I see no sense in trying to protect everywhere available data.

But the compilation of this cheats was a hard work and so this Collection should not be changed. This means that all text should stay together and no changes should be made to any of them.

If I included copy protected parts mail me and I will remove them!

---

I do not state authors name or address for the special cheats in the list as most time I do not know the author and other times I forgot them. But when someone made some of the cheats and wants to be in Thanks file, contact me and I will include you, as you did the work, I only collected it.

For a fee of US 10\$ or 10DM it is possible to get the newest version. Send the money to my snail-mail address (see below).

I also try to upload the newest version to Aminet. (Only if I get some mail, else I think no user is interested and stop the project.)

New cheats, corrections, additions, reports of typing or grammatical errors and any suggestion are welcome. Best is to send this to the e-mail address.

Please tell me the correct game names in the form  
name - additional name - company  
. (The additional name mostly exist at adventures.)
