## 1.8 History

History:

- 1 = Hexen port.
- 2 = WarpHexen port.
- 3 = VAXen port.
- 4 = All ports.
- \* = Other.

0.1: (1999-02-10) (35143 bytes)

- \* Made the GUI.
- \* Added the menus.
- 4 Added support for Hexen, WarpHexen and VAXen.
- \*~You can choose the buffers for the drive Hexen lies on.
- 4 Added the parameters for all ports.
- 4 You can Load/Save the Hexen.cfg for all ports.
- \*~Added some cheats.
- \* Wrote the Guide.

0.2: (1999-02-17) (39952 bytes)

- 1 Added the -mmu, -nojoy and -nodoublebuffer parameters.
  - \* Fixed all the helpbubbles.
  - 4 Added the -file and Additional parameter.
  - \* Added some default checkings when prefs file isn't found. And a window telling you that the prefs doesn't exists.
-

- 1 Added the new keysettings in v0.37!
  - 1 Removed the -shareware parameter, since it is not needed in v0.37!
- 0.3: (1999-02-18) (43178 bytes)
- 4 I forgot to add the key\_jump to the cfg edit page.
  - 1,2 You can now edit EVERYTHING in the cfg!
- 0.4: (1999-02-22) (41248 bytes)
- 1 Added the correct names for the Joystick values.
  - \* Made the Save/Load Hexen.cfg smaller and easier for me to change, and it might be a little faster too.
  - 1 Added the -nomusic parameter.
  - 1 Fixed the -warp parameter so you can easily choose with sliders.

## 1.9 To Do List

To Do List:

- Add all the new parameters for new versions! (ALWAYS ongoing!!!)
- Make the program smaller.
- Add support for more ports (If there will be any!).
- Much much more...
- ~...
- Please help me to fill out this list.

## 1.10 Bugs

Bugs:

- ~IF you should happen to find a bug then  
mail me
