

Amiga Inc Names Jim Collas as President

by Fabian Jimenez

In a move that is sure to bolster their efforts, Amiga Inc. has announced the appointment of Jim Collas as President of Amiga Inc. Jim Collas was a Senior Vice-President of Product Development at Gateway. Jim brings with him years of experience, and a reputation for getting things done. Jeff Schindler will remain as Manager of Product Development and will report directly to Jim Collas.

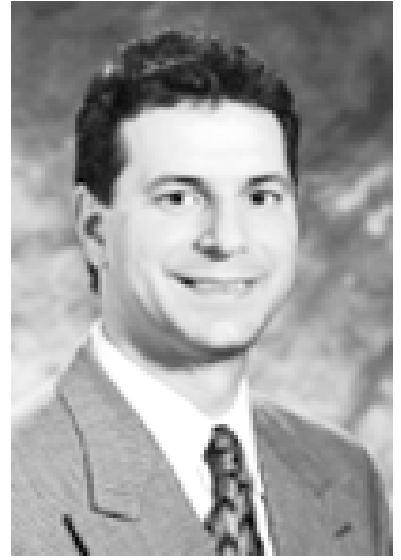

Before working for Gateway, Jim was the president of Anigma, Inc., a PC system board and motherboard design and development company which he founded in 1987. At Gateway, Jim has been mostly

involved with product development, serving as the department's Vice-President and now Senior Vice-President.

Various Gateway VPs have had their hand at monitoring the progress of Amiga Inc. Starting with Rick Snyder, other VPs like Joe Burke and Steve Johns have always influenced the direction of Amiga Inc.

Jim Collas has already outlined organizational changes are in store at Amiga Inc, as well as a "fastracking" of development.

Not mentioned was the appointment of Jim Van Hollie as VP of Marketing.

Jim Collas, President of Amiga

Chair's Corner

by Bill Borsari

The time has come once again to pack our suitcases and board the flight to St Louis. This years St Louis show could very well be the best yet. Tons of new products are scheduled to be shown for the first time.

Not only will we see major products but also solid information about the future of the Amiga, both the "Next Generation" and "Classic".

Oh did I forget to mention NewTek? In their first Amiga show since the announcement of an A4000 substitute! In all it will be an exciting show filled with good times and lots of promos for the future.

I urge every member attend the show to show there support for the Amiga. If you can't, then NCAUG's April meeting will feature a video show report.

The Programing SIG is doing very well with the attendance growing each meeting. At the last meeting they discussed, among other things, the NCAUG website and possible additions of CGI to make the site a better experience.

The Internet SIG for March will be relabled the Boing SIG in honor of the St Louis show. If your going to the show plan to be at the Internet SIG on March 8th. The topics will

Amiga Announces New President and Fast-track Development Plans

Amiga Inc. and Amiga International representatives, under the leadership of new Amiga President Jim Collas, have met to hammer out the details of technical, strategic and marketing plans which will see the launch of new Amiga-based computers for the next millennium. The company has relocated its headquarters to San Diego.

"Amiga is an amazing opportunity that we must act on now or it will be lost forever," said Collas. "The Amiga platform is ideal for Internet-ready, consumer-oriented digital appliances of the future. The Amiga name is associated the world over with user-friendly, low cost, powerful computing. We will take this philosophy into the next generation, enabling products from hand held Internet appliances to high-end graphics computers that help the user rather than frustrate them."

Collas, formerly the senior vice president of Product Development and Management for Amigas parent company, Gateway, will be running Amiga as a wholly independent subsidiary operation. Amiga Inc. and Amiga International will be integrated under the new Amiga corporate structure. Under Collas, the company will be able to step up a "fasttrack" development program that is currently underway.

Amiga is planning to launch next generation products worldwide before the New Year. They will be announcing detailed product plans and introducing several of their strategic partners over the summer. Products currently targeted for the initial launch are a development system, an Internet appliance, and a low cost home computer in the tradition of the Amiga A500 that dominated home computing in the late eighties and early nineties. The developers system will be available with a software development suite for low cost development on the new platform.

Jeff Schindler, in charge of product strategy for Amiga, is planning the new Amiga product line. "The Amiga community has been doing incredible things on a platform that holds enormous potential," said Schindler. "They deserve a system which lets them show off their talents."

Amigas administrative center in San Diego will shortly be complemented by a software development center under the leadership of Dr. Allan Havemose, Vice President of Engineering for Amiga, in San Jose, California. The Silicon Valley team will be rapidly expanded over the coming months to develop revolutionary Amiga multimedia layers over the real-time Neutrino OS core from QNX Software Systems Ltd.

Petro Tyschtschenko will continue on as Managing Director of Amiga International and will also play a critical role in guiding the current Amiga community through the transition to the new Amiga architecture. "The new Amiga plans are a rebirth for Amiga and an exciting journey into the future," said Tyschtschenko.

For further information on Amiga and Amiga products, please refer to www.amiga.com and www.amiga.de.

clickBOOM Opens "The Portal"

by Sofia Tsiotsikas, PR clickBOOM

"The clickBOOM Amiga Portal"

The Portal is a new way for clickBOOM users to access online information, be it their record at clickBOOM, or Amiga-related content – it's a dynamic online database allowing for much closer interaction with the Web.

"clickBOOM and clickboom.com are undisputedly at the top of the Amiga games market.", says Sofia Tsiotsikas, PR at clickBOOM.

"It is our intention to use this leverage and extensive web-creation knowledge to provide Amiga users with the next-generation web experience – The Portal. Our target is now beyond the games scope, and we are confident The Portal will provide all Amiga users, not just players, a great service. We strive to push technology forward, hence The Portal – the first and only on Amiga." Although this is clickBOOM's first step into a non-gaming area, The Portal is created with the same high-quality standard you'd expect to receive from clickBOOM.

The Portal consists of the following sections: AUCTIONS, NEWS CENTER, COMMUNICATION CENTER, STATUS INFORMATION, and PREFERENCES,

AUCTIONS.

The Portal's main attraction is the fully automatic real-time online Auction section. This is where all the action is – you can bid on or sell Amiga-related items at the one and only place of its kind on Amiga. Finally there is a place for Amiga users to be able to trade their hardware in a simple and absolutely private manner.

1. The Portal is the place where you will find the best Amiga deals, guaranteed.
2. If you have an Amiga-related item to sell, The Portal is the place hold

an auction and have other Amiga users bid on it. It's fully automatic create a new auction in less than 5 minutes, and don't worry about it until you make a sale at the highest offered price. Full details on how Auctions function, are available at The Portal.

NEWS CENTER

News Center takes a whole new step at addressing Amiga news flow on the Internet. We guarantee you that The News Center is the simplest, most comprehensive, one of a kind, customizable Amiga news section on the Internet! Instead of creating another news-reporting site clickBOOM worked with leading Amiga news sites behind the scenes to create a single place on the Net from which you will start your news search. The idea behind the News Center is very simple every time one of the 50 Amiga news sites currently supported gets updated, their news will appear at the News Center! The news section is unbiased, because the actual site owners update their section at The Portal! Moreover, you can customize which news sites you want to have top priority. Never again will you have to spend time searching sites, only to find they haven't been updated. Just come to The Portal and you will immediately see the latest headlines of ALL the sites, then with just one click go to the actual site and read the news. Moreover, the Portal will remember which sites you prefer and have them waiting at the top of the section at your next visit!

We would also like to take this opportunity to invite all Amiga news sites not currently featured at The Portal, to contact us.

COMMUNICATION CENTER

The Communication Center allows registered clickBOOM users to communicate with clickBOOM in a more direct approach and receive

more efficient responses to their questions. Through a simple web interface you can leave a message for clickBOOM and your message will get the highest priority, because it will not go to the same pool of email letters that non-registered users got to. Then simply check back at any time for a response.

STATUS INFORMATION

clickBOOM registered users can also access their status information online. The Portal recognizes when you are visiting, so it prepares dynamic content that's tailored for you only. This makes the Portal better and friendlier than a regular web site. Get information such as how many BOOM\$ you have; which games you have registered; what is the status of your last order, etc.

PREFERENCES

The Preferences section allows one to easily update his personal information such as change of email or mailing address. It also allows for customization of the Portal, such as which News sites you prefer to always see at the front. The Portal is located at clickboom.com/portal

The Portal is not finished, nor will it ever be, it's a constantly evolving flux, just like the Web itself. So, be prepared for even more content very soon, as we get the engine running.

Sofia Tsiotsikas, clickBOOM

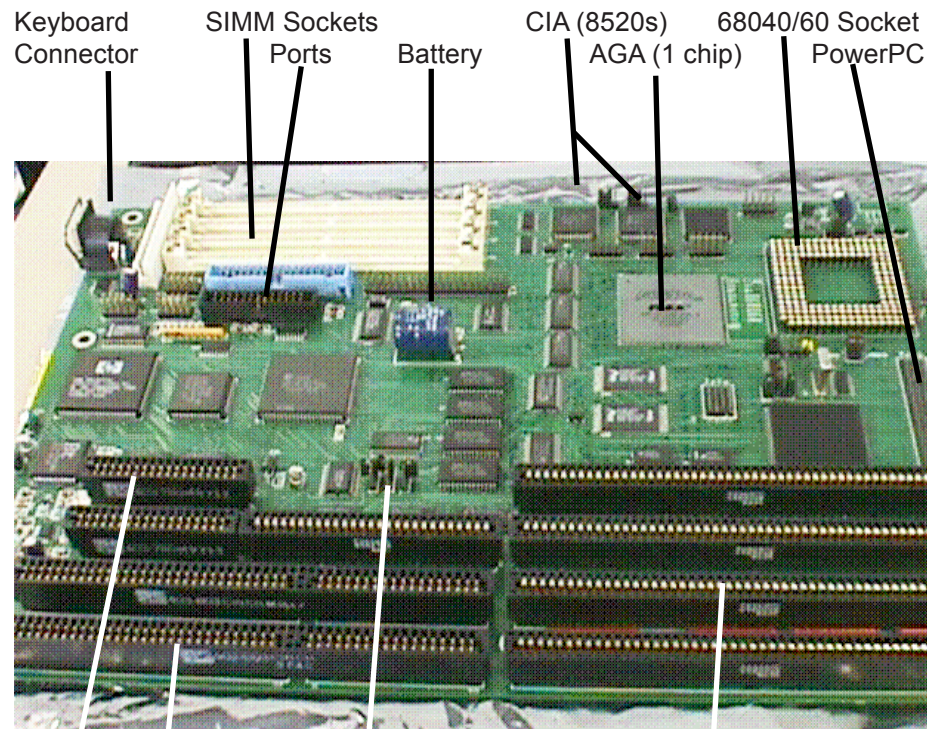

Boxer Expected at Amiga '99 Show

by Fabian Jimenez

One of the main attractions expected at this year's Gateway Amiga Show is the release of Boxer board by Access Innovation's Mick Tinker. The Boxer's development is being subsidized by Amiga dealers Blittersoft of the UK, and Antigravity here in the US. Many Amigans have waited with great expectations for the Boxer to be released, but due to various reasons the Boxer has been delayed up two years. During my visit to Los Angeles, I paid a visit to Dan Lutz owner of Antigravity.

According to Dan, a final prototype and production schedule is due about a week before the show. Dan was gracious enough to show me an older prototype of the Boxer motherboard, as well as the modern ATX case that it will be housed in. As an extra incentive, Dan has lowered his pricing to \$1495 for a basic "Neila 498" configuration. For this price you get 68060 @ 66MHz, 16MB Ram, 2GB HardDisk 24xCD-Rom, High Density Floppy, 56K Internal Modem, Internet Software Kit, and a ClickBoom Game Bundle

Keyboard Connector SIMM Sockets Ports Battery CIA (8520s) AGA (1 chip) 68040/60 Socket PowerPC
AV Slot ISA CPU Jumpers Zorro Slots (5 on final version)
Older Version of the Boxer Motherboard

The Boxer motherboard sports some nice features many Amigans have been clamoring for. Most noticeable is that the AGA chipset is now on one chip. This was mainly due to the dwindling supply of existing AGA chipsets from the Escom liquidation. The motherboard itself follows the ATX form factor.

The Boxer motherboard features new logic to support the newest revision of the EDO SIMM chips. Apparently there were some changes to the EDO standard that has made some SIMMs incompatible with Amiga accelerators produced by Phase5.

The Boxer motherboard can autodetect between Amiga and Window's keyboards. The ISA slots will be active for the AmigaOS. Plans are in the works for drivers to common PC Ethernet cards and such. Lastly, the Boxer has a slot for a PowerPC expansion to be offered

later this year. Dan stated that at first only complete units will be sold to the public. Eventually dealers would be able to order just the motherboard for their own clones.

Delays have hampered development of the Boxer. First, Mick Tinker had to reorganize his company Index due to supply issues caused by Amiga International on an Italian order. Second, Mick Tinker spent time developing the PCI Amiga card that was to be used on the developer "bridge system". At this time it is unknown if Amiga Inc is still interested. Third, minor revisions and bug fixes that are commonly expected on such a project.

You can reach Dan Lutz at (310) 399-7446. For more information call or visit Antigravity's web page at <http://www.antigravity.com>.

Open Letter to the Amiga Community

By Petro Tyschtschenko

March 2, 1999

February 8, 1999 - a historical day.

This day reminded me of the spirit of 1985, when Amiga was presented to the world public in New York.

This time a vision is born: Making computers a natural part of everyday life. It is almost 2 years ago, since the take over by Gateway. Many people know me as an impatient man and you may anticipate how difficult the period from March 97 to February 8, 1999 was. A time of low communication with the Amiga community, low public relations and low information about visions, missions and goals.

But my dear Amigans, I can reassure you the ray of hope will become a bright sun within the next 6 month. The Amiga will be lead to the future under the technical experienced management of an absolute professional. Jim Collas, Senior Vice President Product Development & Management of Gateway, Inc. has decided to modify his position and to work for Amiga only. To reach all our goals, I will work on his side and support him with all my energy. Our mission is:

To create a revolutionary and compelling systems architecture and operating environment for multimedia computers and digital information appliances which can easily be imbedded into consumer computing devices and enables innovative Internet services.

Without talk big, I can tell you that in the middle of November 99 we will launch the new Amiga systems architecture and operation environment. For this purpose we will organize press conferences to inform the public about our goals and directions. Besides the new and revolutionary Amiga Operating System we are working on our existing platform to present the upgrade 3.5 as soon as possible

First detailed information will be presented in St. Louis, USA (March 12. - 14.). We hope to be in the position to sell the first Operating System upgrades 3.5 in summer 99. The German company Haage & Partner and myself will take care about this project.

AMIGA International, Inc. and Amiga, Inc. will conquer as one team the computer world; under the management of Jim Collas - and you my dear Amigans, will be a part of it. Help us performing our goals.

Jim Collas will inform you within the next days about the organization, plans and goals of our company.

A very exciting time is coming and it is for me and my staff a honor to be a part of a new computer generation as pioneer and to pave the way for the future just like it was at Commodore. Long live our beloved Amiga and our community

Yours
Petro Tyschtschenko

Amiga's Petro Tyschtschenko

(Chair's Corner continued)

range from the hotel accommodations, to the booth layout, and a in-depth discussion of Finale-Dev products. This year like last the NCAUG has joined forced with Finale to sell Amiga applications at the show.

I would like to meet with everyone who is going to the show. We need to discuss training for the Finale-Dev products and how we are going to staff NCAUG's booth at the show. Christopher Aldi will be assisting at the show.

The valley was low but we are finally starting to walk out of it! I'm sure we will all find it was worth the wait.

News and Press Releases

Collected by Fabian Jimenez

Amiga'99 Update

Bob Scharp announced that in addition to Astronaut Steve Nagel's speech at the banquet, that Amiga Inc.'s new president Jim Collas and Amiga icon Petro Tyschtschenko will also give presentation. Tickets for the banquet must be purchased in advance of the show by March 9th. The tickets for the main show themselves will feature pictures of past Amiga models, billed as a collectors item Bob encourages all to collect as many different tickets as possible. For more information go to the Amiga'99 web site at <http://www.amiga-stl.com/show.html>, or call 1-800-59-AMIGA.

Bigg Wolf Closes Glenmount Store

Bigg Wolf has closed their original store located at the Glenmount Shopping Center in Wheaton, Maryland. However, Bigg Wolf still is located at their new location on Georgia Avenue just inside the Beltway (near the evil Mac dealer Computer Age). Bigg Wolf carries the latest game titles from the UK, as well as other Amiga gaming software. Go to <http://www.biggwolf.com>, or call (301) 587-9333.

Ultima Thule Software Announces Availability of THOR 2.6

Ultima Thule announced that a new version of THOR is now available. Thor is the advanced multi-format offline reader that supports multiple message formats as well as TCP-connections with NNTP, SMTP and POP3. Many new features and bug fixes have been added. NCAUG's own Paul Sadlik swears by Thor! Check out Ultima's web page at <http://www.thule.no> for more information.

Dimensions Computers AMIGA Announces Availability of EGS Spectrum

A limited supply of the venerable EGS Spectrum cards by GVP-M is now available at Dimensions Computer. These cards feature 2 megs of video ram, Amiga video passthrough, scan doubler (must be a new feature), and drivers for CyberGraphics or Picasso96. These cards are available for \$185, UPS shipping including. Go to <http://www.dcamiga.com> for more info.

Finale Development Announces NewYork II Newsreader

Finale Development, Inc. is proud to announce the next generation of our popular usenet newsreader, NewYork II, which will debut at the popular Gateway Amiga Show in St. Louis, March 12th. NCAUG friend Christopher Aldi will be on hand to demonstrate this exceptional online newsreader. Finale's web site is located at <http://www.finale-dev.com>.

Paxtron Announces Changes in Amiga Service Center Prices and Policy

Effective immediately Paxtron will no longer charge a customer sending in an Amiga computer base price plus parts. All Amiga repairs are done on a flat rate price regardless of what IC's are put in to repair a computer. This new method will be very beneficial to the end user and dealers using our service and will certainly save a lot of time and effort. Paxtron has also made arrangements to substantially speed up turnaround time to 10-12 days max. Go to <http://www.paxtron.com> for more info.

New Sidewinder CD '2BADSHEEP

NCAUG friend Eric Gieseke is announcing the new Sidewinder CD '2BADSHEEP. This AMIGA made electronica album '2BADSHEEP is 19 tracks full of euro-cutting synth based music, from space age new wave 80's to mystical, low tech wild technoswingin' BASS. Original mind blowing future sound, this CD has 19 tracks 62 minutes 100% Amiga generated music. MP3s located at <http://www.txdirect.net/~sidewind/> or call (512) 452-4620.

W.F.M.H. Announces Availability of PalmBackup

If you own an Amiga and 3Com's Palm Pilot Personal, Palm Pilot Professional, Palm III organizer, IBM's WorkPad or derivatives, this software is for you! This program features backup of user preselected organiser databases, restore, multi user support, internal cache system, and is fully system compatible. For more information surf to <http://amiga.com.pl/>, or your favorite Aminet site.

Eyelight Announces Tornado3D Special Offer

Eyelight is proud to announce that Tornado3D V3.0 is in advanced state of development and will be released in May 1999. This significant update to the popular rendering package will sport a redesigned user interface and many high end features never before available on the Amiga. Go to <http://www.tornado3d.com> for more info.

Friend of the Amiga Industry Dies

NewTechniques received very disturbing news that a longtime

advocate, supporter, and businessman for the Amiga platform has died. Joe Rothman of Mr. Hardware Computers in New York passed away recently.

Rothman was known for his highly-intelligent knowledge of the Amiga and his ability to repair almost any Amiga problem within 24 hours. Both Rothman and his wife, Pam, have been strong supporters of the Amiga for years.

Joe Rothman will be deeply missed by the Amiga community and the staff at NewTechniques who he communicated with regularly. Mr Hardware is located at <http://www.li.net/~hardware>.

External Macromedia ShockWave Player

A standalone ShockWave player for the 68K Amiga is available at <http://www.amigart.com/swfplayer.lha>. To use it with browsers as an external application just set: TYPE (MIME TYPE): application / X-ShockWave-Flash; EXTENSION: swf; ACTION: External Program; (VIEWER) NAME: C:swfplayer; ARGUMENTS: %f >NIL:

BlackIRC Is Now Available

As promised, Innovative has

Amiga Intuition - 3/99

released a major update for BlackIRC Internet Chat Client. It now supports all common IRC-standards (CTCP, DCC, etc.), textwrapping, colored text, an ARexx-port, and other features. Go to <http://innovative.intech.de/annos/blackirc10.html> for a complete list of features.

Newer Version of MakeCD

A new version of MakeCD 3.2b public beta 5, considered being one of the best CD writer software for the Amiga, is now available. More information on its features and availability can be found at <http://makecd.core.de>.

FileMaster 3.1 For Free

Development of FileMaster, well known multitasking directory utility, suited mainly for lower level Amigas, is now officially stopped. At <http://www.sci.fi/~twilen/fm.html> you can download latest version FileMaster 3.1 Beta 4 and generic public keyfile.

UGN's Amiga'99 IRC Conference Line Up

NCAUG's own Bill Borsari has lined up an impressive list of Amiga personalities to be available for IRC

conferencing during the Amiga'99 Show. Featured personalities include: Paul Nolan, Kermit Woodall, Joe Torroe, Chris Aldi, Petro Tyschtschenko, Darreck Lisle, and Fletcher Haug amongst others. Keep track at <http://ugn.amiga.org>.

Collas' Executive Bio

Senior Vice President, Product Development and Management. Jim joined the company in June 1992 and was responsible for the company's Product Development department. He was promoted to Vice President of Product Development in December 1992. In 1994, Jim changed responsibilities to oversee the company's technical services and support operations. Jim was recently named Senior Vice President responsible for Product Development and Management. Before joining Gateway, He received a B.S. degree in Electrical Engineering from the University of California at Los Angeles in 1984.

Walter's Report

by Walter Miles

The current balance of the NCAUG Treasury is \$1740.90.

We spent \$179.48 in February, and deposited \$185.00.
