Chapter 1

Set_Icon

1.1   Set_Icon Information

```
            Info

            Addition Information

            Disclaimer and Author Info
```

1.2   Set_Icon/Info

```
                        Set_Icon

                © 1994 Silicon Based Life
```

If you are like me and hate manipulating your .info files via the CLI and so on
then this is the util for you!

What it can do:

 1. The program creates a appicon on to which you drop your icon, if there isn't
     an existing .info file a new one will be created, otherwise all the ←
        information
     from the old icon will be copied to the new one (e.g tooltypes, stacksize and
     so on). You can do more than one icon at a time using the shift drag method.

 2. The program will copy the image from the first icon to all the others, if any
     of the files does not have an .info file, then one will be created.

 3. The program will copy the Tool Types and (tool) from the first icon to all ←
     the others, if
     the other files, and a .info file will be created if one does not already
     exist.

 4. The program will remove the .info files of the selected files.

 5. Abort.

To quit double click on the icon and selected quit.

1.3   Set_Icon/Additional Information

Set_Icon

© 1994 Silicon Based Life

This program will only work on WB 2.0 and above.

This program was written on an Amiga A1200 68882 6MB.

BUGS!!!!!!!
None known at present.

1.4   Set_Icon/Disclaimer and Author Information
