1.19 Directory selection help

You are looking at the directory sorted version of the complete ↔ contents listing of Aminet. Every top level directory is one AmigaGuide page. Just click the directory you would like to see. Help on viewing and extracting the files is available here.

You can also do a global search of all Aminet software (including what is not on this CD) from this page. The matches will be sorted by directory.

Press 'Retrace' to get back.

1.20 File view help

In all the index files in Lists/, you can click the archive name to unpack that archive to the directory selected in 'Prefs' (default is RAM:), where a new directory will be created for it so you can clean up easily.

The top level 'Index', the 'Readme' and the various Guides are different. There, clicking the archive name will:

- View the graphics inside an archive (directory pix/ and gfx/anim/)
- Play the sounds inside an archive (directory mods/ and mus/smpl/)
- Display the texts inside an archive (directory docs/)
- Extract the archive to RAM: (all other directories)

Also, you can click the description of the archive to view the .readme of the same archive. Note that entries with a * in front of the description are not present on this CD (for example in the complete Aminet index). However if you click them anyway, you will be informed what other CDs this file can be found on.

Press 'Retrace' to get back.
