1.2 What is this ?

BruceLee manual

Documentation version 1.0 written on 27 September 2000

Thank you for downloading BruceLee, the classical C64 game. I'm sure this game will give you lots of fun playing it alone or with friends. This update contains more levels, more sounds and more options to choose.

Have fun!

1.3 What does the archive contain ?

If everything is correct you should have the following files:

BruceLee.run

This guide
Readme.txt

If you miss any of these files please contact HellHound for the official software.

1.4 What do you need ?

BruceLee manual

Documentation version 1.0 written on 27 September 2000

Playing BruceLee will require the following items.

Amiga computer
4 MB free Fastram
68020+ processor
AGA graphics
JoyStick
Multiplayer mode requires a parallel adapter
Recommended is a 68030+ with 4+ MB fastram.

If you're having problems starting the program, please inform us.

1.5 BruceLee usage

BruceLee manual

Documentation version 1.0 written on 27 September 2000

Start the program by clicking on the icon. CLI command can also be used. Wait a while to let the program unpack its contents.

You can exit the game anytime by pressing RMB !

Options screen
The options can be altered using joystick.

Players
The first option will enter the number of players, up to four players can be selected.

Game mode
Game mode can be switched between Normal and Crazy

Starting level
Choose the start level

Start game
Select this one to start the battle.

Right,.. not much of a problem I assume! :)
