1.26 bombuzal

BOMBUZAL

When reaching a new level, it's worthwhile to sacrifice a life to see the explosion pattern. When trying to detonate a pulsing bomb, pick it up; it's easier to see its size. You are invulnerable to explosions when teleporting, so use it to your advantage! A blind droid can't activate switches. Also, here's a revised list of the level access codes:

BUBBLE BOBBLE

Press F1 to advance 1 screen
Press F2 to advance six screens
Press F3 to advance eleven screens

If you can get to boards 10, 20, 30 & 40 without dying a door will appear to take you to a secret level. On boards 7 & 22 wait a few seconds until the umbrella falls and grab it, you will warp ahead 6 levels.

While in the first screen, bubble the first two monsters and then fill the screen with hundreds of bubbles. Bubble and burst the remaining monster and the remaining bubbles should turn into fruit (usually bananas), each of which is worth 500 points. Also, Hold down the fire button after losing your last life, and you should get another set of lives, though your score will be reset. Beating level 100: jump on the small platforms to collect all the green potion bottles. they will give you lightning bolts. Jump down alongside the wall and let that monster have it!! After 100 hits, he will turn into a bubble. Pop him and you've done it!

1.29 capone

CAPONE

To find a special bonus, go to the front of the Post Office. Shoot the ball at the top of the flag pole, and your score will raise. If you shoot it again, you'll see a screen of programmers. Shoot it again and you'll be invincible, standing in the bank. At the end of that round, you will start at the beginning with warp speed.

1.30 captain blood

CAPTAIN BLOOD

When you encounter a particularly friendly alien, ask it the following question using the alien icons: CODE GG1. The alien will then give you the co-ordinates of another alien called GG. Go to the specified planet and you can then ask GG for the co-ordinates of all the other aliens around by asking CODE INFORMATION HELP. If you're met with blind ignorance then put in the name of an alien after the HELP.

1.31 carrier command

CARRIER COMMAND

While in the Walrus arming menu, select nine Harbinger surface to surface missiles and put them in the AAV. Select the Avatar Chemical Laser and place it over the missiles. Then select the pod you want (ACCB, Virus Bomb, Fuel) and place it in the AAV. Then, when you've launched the AAV, look at it's weapons and you'll find you have BOTH missiles and laser! On returning to the carrier any missiles you have left will be added to the ship's stores. Carry on doing this and hundreds of missiles can be yours. Another cheat: while in the pause mode, type GROW OLD ALONG WITH ME (include the spaces). You should now see the message "Cheat mode active". Pressing the + key on the numeric keypad protects your Mantas and AAVs from missile attacks. The - key can be used to turn this off. Pressing the following keys in sequence: 'Help', Q, S, Control, Alternate, gives you a little message. Pressing the 9 on the keypad displays the current level. 6 and 8 have some other effect. Returning to the title screen, press the + and - keys to view all objects in the game.

+++++

A different source claims the following cheat:

Pause the game from the main view screen and type:
THE BEST IS YET TO BE, complete with spaces. The game restarts automatically, and displays ' Cheat Mode Activated ' in the message panel. Use the + and - keys to display all objects.

When paused, pressing + and - on the numeric keypad toggles Manta invincibility: the flying craft are no longer vulnerable to aerial attack, although collision with large objects is still fatal. Once a course has been programmed for the carrier, Mantas or Walruses, engage autopilot and click on pause. To avoid slogging around in real time, you will find that pressing 3 on the keypad and unpausing again takes the corresponding craft directly to its destination. Likewise, pausing and pressing 2 replaces lost shielding, while tapping 1 refuels the craft in question. 9 shows the current difficulty level, 7 speeds up the game and 6 brings up the programmers' test palette!

A lot in this excellent simulation. PAUSE the game and type GROW OLD ALONG WITH ME then press + on the numeric keypad for your mantas and walruses to become shielded. Press - to disable.

Try pressing CTRL and M on the main screen for some interesting effects.

1.32 car vup

CAR VUP

1.33 chaos strikes back

CHAOS STRIKES BACK

Find a dragon and cast MON ZO GOR SAR and hit ESC to pause the game. Hold down the ALT key and type in LORD LIBRASULUS SMITHES THEE DOWN. Unpause the game and slay the beast. He leaves behind a firestaff and your party will be invincible.

Undocumented Spells:

GOR IR KU - Detects Monsters
GOR IR ROS - Detects fake walls and "invisible" (actually hard to see) pits
GOR IR DAIN - Detects "magic" on screen?
ZO IR NETA - Anchors the map at the point of casting so that as you move around, the map view stays at the anchored position.

(hint #1)

It's REALLY easy to kill ANY dragon. Here's how.

- 1) Prepare all your players with MON IR VEN spells (mega poison cloud)
- 2) Use the green freeze life box (on the dragon)
- 3) Cast the spells, and then double up on each player
(ie. each player casts 2 spells for a total of 8)
- 4) Wait... dinner will be served soon.

(hint #2)

Using the Vorpall Blade:

If you don't have both Vorpall Blades, you can increase #hits/time by passing the weapon back and forth between the two attacking players.
(ie. hit -> pass blade to #2 -> hit -> pass back to #1 -> hit ->...

(hint #3)

Contrary to what I've read on the net, everything is affected by fireballs, including knights and dragons. The only exceptions are slime, black flames, and the thing that pops up from the floor.

In mission 6, once you've fired all your missiles, you can land on the Shadow Sub (if it's still afloat) and it will refuel and rearm you.

Select option "2 Free Flight, no enemy confrontation" from the main menu. Then select zero instead of 1 to 4. The screen will go into a spiral and scroll way south to 34 by 117 degrees, placing your plane somewhere without a runway. This happens to be in the middle of Edwards Air Force Base, where the F/A-18 was flight tested. hmmmm... To take off you have to use the afterburners. 117 degrees is the furthest south you'll be able to fly, but you can go in other directions. (Is there more to this back door? hmm)

1.77 faery tale adventure

FAERY TALE ADVENTURE

Take a save game file and use a PD program such as NewZap to patch byte 18 to a non-zero value. Load your save game, and now these cheat options are enabled:

Arrow Keys	- Move Rapidly over any terrain
B	- Summon Gold Swan
R	- Rescue Princess
=	- Display coordinates
F10	- Location in coordinates
F9	- Increase time by 1 hour

Sometimes you can accumulate all the treasure you want by going near the item, pressing space bar, and then continue hitting 'T'. You'll receive an infinite supply of that treasure.

Save your position in a dungeon. Then go through it until you run out of keys. When you restore your game, all the doors will be open and you will have a new set of keys. Also works in caves.

Jump on the turtle and start slashing. Your bravery points will go up to infinity and it doesn't hurt you or the turtle.

On the island with the Crystal Castle, press the right mouse button while talking to the Sorceress and your luck will go up to 65. 'ASK'ing the Sorceress several times will usually boost your luck.

If running low on Green keys, use a secret entrance for the fort.

It's on the left side, almost even with the door.

Beating the Turtle is not beating, it is pushing, so push the turtle across the land, to use it in special places: The turtle was programmed in asbestos, and can swim in Lava. It can be used to enter the black citadel at the south. Also, while it is present, you are not attacked, but by the time one has the turtle, one is already invincible.

+++++

Load it and start playing. Press ESC. Now, start a new game while pressing E. You should now be in the cheat mode. If that doesn't work, enter SWAMP THING into the high-score table, and restart a game while pressing E. Now, you can change levels by pressing + and -. Move the joystick diagonal up/left, press fire, then press E. You now enter the game editor. Pressing ESC returns you to the level selector mode (pressing SPACE from the level selection mode returns you to the game). While in the game editor, press these keys: P - alter the game's palette (use 1,2,3,4,5 and 6 from keypad), X - modify the exits (use - and + on keypad to select exit number, then press S, then use + and - again to set the exit level. Use cursor to set position), W - weapons distribution, works like the exits distribution mode.

+++++

Start the game as normal, collect the ship and fly to the extreme top left of the playing area. Disembark from the ship and drive the buggy into the corner. Type in STONKER and re-enter the ship. Now pressing D cycles through the available weapons (including shield plus weapons), and pressing C cycles through the levels. NOTE: when entering a level, it's always best to station the ship at the top left of the screen again, to avoid appearing at an illegal position, or even off-screen. On the second level repeat the above process, getting the buggy back in the top left hand corner, and retype STONKER again. It now enables the ship to fly through walls, and pressing F while hovering over switches allows them to be collected while in the air.

1.92 globulous

GLOBULOUS

The most important thing to remember is that ALL the puzzles can be solved without losing a life, so if you lose a life and think its the only way to solve the screen, look closely. Some of the puzzles get pretty obscure after level 10, but once you eventually beat them youll kick yourself for not seeing the solution earlier.

Look before you leap. Think about how the screen will look from a flipped perspective. A lot of jumps you make will be unnecessary and waste time and switches if you dont.

Make sure you have enough switches, at least 10 per screen. It is possible to get stuck on a downward slope with no way to get back up or kill yourself, and the only way out is to press ESC and start the whole game over.

Here are a few codes you might like to try:

Level 06 - IVEs8AZ?
Level 11 - dynle1cJ

1.99 hardball (accolade)

HARDBALL (Accolade)

Various hints:

- * Allstars are better than champs,
- * Only steal if you actually hit the ball,
- * Try to get a lot of runs early, as the computer team improves towards the end,
- * Bunting rarely works,
- * Halfway through the match, swap Laws for Wells and Wratten for Harris.
- * The best pitchers are Oliver, Perez, Leary, Cook. The others will only be successful for a short while,
- * Never pitch fastballs to the center as they will usually result in home runs,
- * Change pitchers after a few innings, because as they get tired, their accuracy and speed get worse.

1.103 heroes of the lance (ssi)

HEROES OF THE LANCE (SSI)

Some general tips:

Arrange your party so that the first line consists of two strong warriors, Raistlin and Goldmoon. This allows you to use Raistlin's magic and the healing staff of Goldmoon without too much hassle. Save Tanis and Riverwind for the later levels, where the bows come in handy. When fighting Gully Dwarves, use Tasslehoff who is the same height as them. His sling stones

will never miss. Avoid fighting Hatchlings, they're not worth it. Just turn and run when you meet one; when you reach an intersection move into a new path and wait a little. When you return, the Hatchling will have gone. Killing Bozaks: two methods: 1) get Raistlin to use a web, sleep or charm spell to stun it, then send a warrior to clobber it to death, or 2) select Flint, who is a dwarf; 9 out of 10 times, the Bozak's shots will go over his head; get close to enter melee combat, and use low thrusts to kill it. Spectral Minions: they're easy to kill, so use a warrior. Wraiths: a well-timed throw of an axe kills them every time. If you miss, use a sword and chest-thrust movements. Don't let it get too close to you! Spiders: use low thrusts to keep them at bay. If they get through your guard, retreat until you can turn and fight again. The blue and green potions restore health, red slows down monsters, and yellow give your characters extra confidence.

1.115 it came from the desert

IT CAME FROM THE DESERT

Before attempting to go into the ants' nest, you should first save Elmer to get more flamethrower fuel. Some time between the 8th and 10th (I don't remember the exact day), he will leave a note in his station saying that he is going hiking in the SW Volcanic Cone. Go to the volcano, fight the ants, and next day, visit Elmer's station. He'll thank you for saving his life and give you more flamethrower fuel.

The entrance to the ants' nest will never appear on the main map, but there are several other ways to get there:

- By taking a flight from Hilber's Field.
- By driving a tank from a battle going on at a nearby location.
- By going south when you are in a battle at the M1 mine.

The entrance to the nest doesn't stay open long enough for you to get in before the ants start invading the various locations in the town, so you'll have to wait until they do. The 11th is the best day to enter the hole since it is very hot and there are few ants around. If you try cooler days, there will probably be too many of them around for you to handle. Also, if you decide to get to the hole by plane, you can land safely on the dirt road parallel to the tracks leading to the M1 mine.

MIGHT & MAGIC II

To earn heaps of experience points, make a backup of your original play disk. Now boot and insert the disk that contains your characters. Save them onto your second backup by going to the inn. Buy three tickets (green, yellow, red or balck) and try to win in all three arenas. Remember to save after each victory. Once you have a victory in each arena, go to the castle where the bishop is held captive. Before entering flick the write protect tab to protect your disk. Then enter and free the bishop with the correct key. He will give you experience points if you have won three fights of the same color. Exit and go to town. Open write protect tab and save at the inn. You can repeat this several times. Once you have acquired mega-experience, save your party using your original backup of the play disk.

As long as you keep getting the yellow pacman with player 2, player 1 will never die.

QUADRALIEN (Logotron/Spinnaker)

Access codes: level 1- 170961, level 2- 010655, level 3- 610169. And now, some tips: once in the core, you can't quit. So choose droids with good lasers, Jack and Spud for example. The Quadralien mother is made up of 4 separate pieces grouped together and surrounded by Earthling boxes. The mother can only be destroyed by blowing up each box from a different direction. From the starting point there are three exits: north, east, and west. Go east and destroy the first box, return to the starting point, and go north to destroy the second box. You will now have both droids to blow the remaining boxes. Go west through the one-way force field, and get the other. Don't forget to keep recharging.

1.174 rainbow islands

RAINBOW ISLANDS

We all know that collecting the seven different-colored gems gives you an extra life and a 100,000 Bonus Gem once the Boss is defeated. But collecting all of the gems in the correct order of color (from left to right on the gem counter) not only awards you the life and Bonus Gem, it also grants you access to a magical secret room. When you reach the end of the level, a silver door appears. 'You don't have to fight the Boss. (Hint A)

Even more useful is how to create any color gem. The screen is split into several invisible vertical stripes of color. When a gem falls, its color is determined by the 'color' of the area into which it fell. Now all you have to do is gauge carefully where the dead enemy will fall to create the gem color of your choice. (Hint B)

Type the following codes while the title screen is displayed

```
BLRBJSBJ awards permanent fast shoes
RJSBJSBR awards permanent double rainbows
SSSLLRRS awards permanent fast rainbows

LJLSLBLS Hint 'B'

"S" Saves game without having to exit

To access the other cheats you must go to flight school.

To get an awesome pilot (once only) click on the bullseye on the airplane at the top of the flight school menu. The screen will either flash or you will get a requester asking if you want to quit (say no). Then create a new pilot. Enter the name "Orca The Killer Tomato" (without the quotes, and remember it's case sensitive). Orca is all ready and doesn't need flight school.

To access a menu of options (much of which is no longer useful or active) create a new pilot. Enter the name " Who is The Riddler" Leave off the quotes but be sure and type the two leading spaces. DO NOT HIT RETURN to enter the name, hit ESCape instead. Then just follow the prompts.

If you run from a hard disk you can hit LEFT-AMIGA ESCape to toggle to the Workbench screen and back.

Game Tips:

BALLOON BUSTING- The first thing to do in Balloon Busting missions is to take out the AA gun. It isn't too hard so give it a try.

DOG FIGHTS- When involved in a dog fight with other planes always attack from above. This is because if you attack from below the other plane will climb which is very annoying. By attacking from above you drive the other plane down rather than up.

BEING TAILED- When you are being tailed hold the joystick to the bottom-right. You should turn off to the right and out of the other planes line of fire.

ZOMBI (UBI Soft)

If you have seen Dawn Of The Dead, you already have a good idea on how to solve most of the puzzles. But here's some extra tips anyway: 1) To lock up the mall to keep zombies from getting in, you need to park the trucks over the entrances. Get the key from the office on the 2nd floor and go to the 4th floor where the keys to the trucks are kept. 2) To keep the dead zombies from coming to un-life, lock them up in the freezer in the basement. 3) before you can go play in the basement, you need a source of light. Get the fuses and gloves from the 3rd floor and go to it!!
