# Chapter 1

## Partial

### 1.1 Index of all Fish files this CD

=====

This is disk 400 of the freely distributable AMIGA software library.

DriveWars DriveWars is a Shareware shoot'em up game that pits you, df0: or df1:, against a computer virus that is about to destroy all U.S. records of Iraq's positions during operation Desert Shield. In version 1.0, you must fly df0: through the computers and destroy all contaminated chips and disks.

Author: Joe Angell  
game/shoot/DriveWars.lha      Readme

ParNet      The Software Distillery's NET: file system using Matt Dillon's parallel port code. Using a special DB25 cable, two Amigas can be connected via the parallel port. One Amiga can mount the other as a device and read/write the files as if they were local. Version 2.4, binary only.

Author: Doug Walker, John Toebe, Matt Dillon  
comm/misc/Parnet.lha      Readme

ReqLib      A runtime, reentrant library designed to make it easier for programmers to use powerful, easy to use requesters, for communicating with users. Includes such functions as a color requester, file requester, message display requester and many functions to make the creation of gadgets for your own custom requesters easier. Binary only.

Author: Colin Fox and Bruce Dawson  
util/libs/ReqLib28.lha      Readme

SF2      File search utility. Default searching starts from the root directory of the specified device and descends down into its subdirectories. Searching includes looking into archive files generated by various compression utilities. Archive files ending with a .ARC, .LHZ, .ZIP and .ZOO are currently supported. Lots of command line options. Requires ARP 1.3 (rev. 39.1). Version 2.0, binary only, shareware.

=====

=====  
This is disk 405a of the freely distributable AMIGA software library.

GIFMachine A program that will convert CompuServe GIF image files  
into IFF SHAM and 24bit ILBMs. It offers a number of  
extra options like dithering, horizontal and vertical  
flip, as well as automatic border removal. Requires  
KickStart version 2.0 or greater to run. Version 2.104,  
includes source.  
Author: Christopher Wichura  
gfx/conv/GIFMachine.lha       Readme

=====  
This is disk 406 of the freely distributable AMIGA software library.

DMS   DISK-Masher is a utility that allows users to compress and  
archive entire floppy disks. Offers four different types  
of compression, extended virus checking of boot blocks,  
and data encryption. Requires at least 512K of memory.  
This is version 1.01, binary only.  
Author: SDS Software

=====  
This is disk 410 of the freely distributable AMIGA software library.

MechFight A role playing game where you explore a world, buy or  
find items, and fight against robots and aliens. During  
the game you are asked to perform certain tasks. This  
is version 1.0, binary only.  
Author: Florian Marquardt  
game/role/MechFight.lha Readme

=====  
This is disk 411 of the freely distributable AMIGA software library.

BPDI Demo version of a new strategy game written in GFA-BASIC.  
German version only. Binary only.  
Author: Dirk Hasse  
game/think/BPDI.lha Readme

Mind A design for artificial intelligence (AI) based upon  
linguistics. The included animation shows how one node  
on a syntax tree flushes out the currently active concept  
in a mind contemplating a scene of the external world  
through the eye. Includes five documents describing the  
theory behind the animation.  
Author: Arthur Murray  
game/board/Mind\_Master.lha Readme

Intoxicated A nice little screen hack which affects the mouse.  
Saying any more would spoil the fun. Includes source.  
Author: Thomas Albers  
game/gag/Intoxicated.lha      Readme

---

This is disk 417 of the freely distributable AMIGA software library.

Quiz      A simple Quiz game. Current quiz subjects include "Bible",  
"Indians", "New England", "Physics", and "States". Binary  
only.  
Author: J. Dale Holt  
game/misc/Quiz.lha              Readme

---

This is disk 418 of the freely distributable AMIGA software library.

PubScreens Two utilities to manipulate public screens. You can open  
and close them, or ask for information. PublicS is the  
workbench version of PubScreen. AmigaDOS 2.0 only. This  
is version 1.0, binary only.  
Author: Jorrit Tyberghein  
util/moni/pubscreens.lha      Readme

Running    A classical maze and puzzle game. You run around in a  
maze and try to catch the ghosts or spiders. It is  
completely multitasking friendly and compatible with  
AmigaDOS 1.2/1.3 and 2.0. You can design your own levels.  
Binary only.  
Author: Jorrit Tyberghein  
game/jump/Running.lha          Readme

---

=====  
This is disk 419 of the freely distributable AMIGA software library.

ReqLib A runtime, reentrant library designed to make it easier for programmers to use powerful, easy to use requesters, for communicating with users. Includes such functions as a color requester, file requester, message display requester and many functions to make the creation of gadgets for your own custom requesters easier. This is version 2.5, an update to version 1.2 on disk 400. Binary only.  
Author: Colin Fox and Bruce Dawson  
util/libs/ReqLib28.lha           Readme

### 1.3 Index of all Fish files this CD

=====  
This is disk 420 of the freely distributable AMIGA software library.

SpaceWar A two player game with each player controlling a spaceship. The object is to shoot the other player, gaining one point for each kill. The game ends when a player reaches fifty points. Version 1.11, binary only.  
Author: Jeff Petkau  
game/shoot/spacewar.lha           Readme

This is disk 423 of the freely distributable AMIGA software library.

Hollywood An easy to play trivia game with such subjects as M\*A\*S\*H, Star Trek (old and TNG), Indiana Jones, general television trivia, and more. Each topic contains fifty questions and a related picture. Each time you answer a question right, a small portion of the picture is added to the screen. Shareware, binary only.  
Author:  
game/misc/Hollywood.lha           Readme  
=====

---

This is disk 424 of the freely distributable AMIGA software library.

=====  
This is disk 425 of the freely distributable AMIGA software library.

Downhill A skiing arcade game. Ski skylar mountain, a dangerous, steep, downright scary mountain with bonus flags to pick up, rocks, bushes, and branches to jump over, all while avoiding obstacles such as trees. The longer you stay up the faster you ski and the more points you get. Binary only, joystick required, works only under AmigaDOS 1.3.

Author: David Alves  
game/misc/Downhill.lha           Readme

HeadGames A "Shoot-Em-Up" game done with SEUCK game constructor, featuring digitized heads as enemies. Binary only.

Author: Neil Sorenson  
game/shoot/HeadGames.lha       Readme

=====  
This is disk 426 of the freely distributable AMIGA software library.

Metro In METRO, you play the role of a city planner. Using limited funds, you must construct a mass-transit subway system capable of meeting the needs of your city. Build wisely and your system will be a success, but poor planning will lead to disaster and financial ruin. Shareware, binary only, source available from author.

Author: Mark A. Thomas and David P. Townsend  
game/role/Metro.lha            Readme

=====  
This is disk 427 of the freely distributable AMIGA software library.

STV Simple text viewer with mouse and keyboard scrolling, text search, and hooks to be launched onto custom screens. Works great under both Workbench v1.3 and v2.0 and from the CLI or icon. Version 1.00a, includes full C source.

Author: Timm Martin.  
text/show/stv.lha            Readme

=====  
This is disk 428 of the freely distributable AMIGA software library.

Train An electric train construction set game simulation. Shareware, binary only, source available from author.

Author: Dennis Saunders  
mods/pro/train.lha            Readme

---

=====

This is disk 429 of the freely distributable AMIGA software library.

Tripppin A Workbench game based on an out-of-print board game. The object is a race in which each move you make restricts your opponent's choice of countermoves. Features a computer opponent of adjustable toughness. Includes source.  
Author: Paul Kienitz.  
game/wb/Tripppin.lha                      Readme

gfx/conv/GIFMachine.lha Readme

=====  
This is disk 459 of the freely distributable AMIGA software library.

Conquest Lore of Conquest is a war game similar in concept to the board game Risk. You are the lord of an entire world, destined to rule the galaxy. Some worlds are virgin fruits, ready for you to colonize. Some worlds have natives who do not wish to accept your rule, these you must conquer for

they will yield more valuable resources. As you claim the galaxy you will find, you are not the only one extending your dominion. This is a two-player game, so be prepared to defend yourself and take what is yours! Version 1.3, an update to version 1.2 on disk 432. Binary only, shareware.  
Author: Michael Bryant  
game/think/Conquest.lha           Readme

XprZmodem An Amiga shared library which provides ZModem file transfer capability to any XPR-compatible communications program. This is version 2.10, an update to version 2.0 on disk 261. Includes source.  
Author: Rick Huebner  
comm/term/xprzmodem30.lha       Readme

## 1.7 Index of all Fish files this CD

=====  
This is disk 460 of the freely distributable AMIGA software library.

NetHack    A screen oriented fantasy game where your goal is to grab as much treasure as you can, retrieve the Amulet of Yendor, and escape the Mazes of Menace alive. On the screen is a map of where you have been and what you have seen on the current dungeon level. As you explore more of the level, it appears on the screen in front of you. Nethack generates a new dungeon every time it is played, thus even veteran players will continue to find it entertaining and exciting. This is version 3.0, patch level 10, an update to version 2.3 on disks 189 and 190. Binary only, source available.  
Author: Various, see documentation.  
game/role/NetHack\_3\_1.lha       Readme

=====  
This is disk 461 of the freely distributable AMIGA software library.

DFrags     Disk Fragmentation reporting utility. Displays disk fragmentation for both floppy and hard disk devices. Does not attempt to change any data, just gives a report. Version 2.02, shareware, binary only.  
Author: Custom Services  
disk/misc/Dfrags.lha            Readme

SBall     A game using the joystick to control a "bouncing ball". Binary only.  
Author: Hertzig Wolfgang and Meisner Christian  
game/misc/SBall.lha            Readme

=====  
This is disk 462 of the freely distributable AMIGA software library.  
=====

Humartia An arcade game where each player controls a jet and must destroy the opponents jet, which is accomplished when a jet has been hit 75 by either missiles or air mines.  
Binary only.  
Author: Jason Bauer  
game/shoot/Humartia.lha           Readme

SeaLance Game based on a Trident submarine simulator. You must use the weapons at your disposal to liberate the earth's cities from alien occupation. Binary only.

AmiCheck An easy to use, intuitive, friendly checkbook program.  
Allows you to enter your checks in a very natural style,  
giving you a running balance as you do so. Options  
include reconciling your checkbook, starting new registers  
with outstanding checks only, printing all, cleared,  
outstanding, or selected entries, and more. Version 2.0,  
shareware, binary only, requires AmigaDOS 2.0.

WordSearch This is an automated wordsearch generator. Words orientations can be limited to any subset of the eight primary directions and the puzzle can be rotated or flipped. It has a spartan but functional user interface highlighted by the req.library. The system default font under WB 2.0 is supported for the puzzle display window. Version 1.0, includes source in C.
