## Partial

### 1.1 Index of all Fish files this CD

=====  
This is disk 800 of the freely distributable AMIGA software library.

ColorSaver A "pop-up-anywhere" (almost!) color palette commodity with several features I could not find in other palette tools.

Features include: Load/Save color palettes; Sliders selectable between RGB/HSV; Copy, Swap, Range Functions; Complement selected color; Left/right shifting of the entire palette; Ability to permanently alter (patch) the color tables of executables with a statically allocated color table. Requires OS2.04 or greater. Version 0.84 (alpha release), includes source.

Author: Dan Fish

This is disk 809 of the freely distributable AMIGA software library.

## 1.2 Index of all Fish files this CD

=====  
This is disk 810 of the freely distributable AMIGA software library.

Snake    An updated version of the old computer game which lives in a Workbench window. You control a "snake" which grows by eating "frogs" and avoiding obstacles. Requires AmigaDOS 2.0. C source included.

Author: Michael Warner  
game/wb/snake.lha                Readme

=====  
This is disk 811 of the freely distributable AMIGA software library.

WhiteLion A new Othello (Reversi) playing program. Strong and fast, it explains the rules and plays different strategies depending on the selected level. Supports interLaced resolutions. Version 1.2\_FD, english and german executables. ShareWare, C sources and special version available when registering.

Author: Martin Grote  
game/think/WhiteLion13.lha    Readme

=====  
This is disk 812 of the freely distributable AMIGA software library.

=====  
This is disk 813 of the freely distributable AMIGA software library.

AmigaBase A hierachical, programmable, in-core database that runs under OS 1.3 and OS 2.0. Has a full intuition interface. Features include two display methods, filter datasets, search datasets, print datasets, and much more. Nearly everything can be real-

ized by programming AmigaBase. Datatypes can be Integer, Real, Boolean, String, Memo (Text), Date and Time. Number of datasets is only limited by available memory. Also included in the package are some example projects. Version 1.21, an update to version 1.20 on disk 792. Shareware, binary only.  
Author: Steffen Gutmann  
biz/dbase/AmigaBase200.lha   Readme

MinedOut   A remake of the BASIC program of the same name for the Sinclair Spektrum, by Ian Andrews. Mined Out is a strategy game, like Mine on disk 725 or AMines on disk 707. The object of the game is to find a way from the bottom of the minefield to the top, to escape a computer enemy. Version 1.0, shareware, binary only.  
Author: Dieter Seidel  
game/think/MinedOut.lzh       Readme

=====  
This is disk 814 of the freely distributable AMIGA software library.

Monopoly   Demo version of a Monopoly game written in C. Version 1.0, shareware, binary only.  
Author: Ken Gilmer  
game/demo/Monopoly.lzh       Readme

=====  
This is disk 815 of the freely distributable AMIGA software library.

AntiCicloVir   A link virus detector that detects 27 different such viruses. Checks your disk and memory for known link viruses, and can also detect known bootblock viruses in memory. Version 1.7, an update to version 1.6a on disk 767. Shareware, binary only.  
Author: Matthias Gutt  
util/virus/AntiCicloVir.lha   Readme

ShuffleRun   A game for two players. Try to collect more points than the other player. A level editor is implemented. 300 levels are included, 100 can be edited. Version 1.0, freeware, includes source.  
Author: Benjamin (Pink) Stegemann  
game/misc/ShuffleRun.lzh       Readme

=====  
This is disk 816 of the freely distributable AMIGA software library.

Egypt       A small game for one or two players. Find three chests of gold in a computer generated maze. Version 1.0, freeware, includes source.  
Author: Benjamin (Pink) Stegemann  
game/misc/Egypt.lzh           Readme

---

Revenge Revenge of the Blob, an animated interpretation using Bill Watterson's original cartoon strip character "Calvin". Tells the story of Calvin's encounter with his mother's food, and how the dreaded tapioca monster gets back at Calvin for turning his nose up at it. Version 1.0.  
Author: David Wiles  
game/shoot/Revenge\_Camels.lha Readme

=====

This is disk 817 of the freely distributable AMIGA software library.

EditKeys A keymap editor. Supports editing of string, dead and modifiable keys, as well as control of repeatable and capsable status of each key. Runs equally well under AmigaDOS 1.3 or 2.0. This is version 1.3, an update to version 1.2 on disk 642. Binary only.  
Author: David Kinder  
util/misc/editkeys162.lha Readme

=====

This is disk 818 of the freely distributable AMIGA software library.

TankHunter A simple action game for two players. Destroy the tank of your opponent. 50 levels are included. You can choose between sound effects or a background song. Version 1.0, freeware, includes source.  
Author: Benjamin (Pink) Stegemann  
game/shoot/TankHunter.lzh Readme

=====

This is disk 819 of the freely distributable AMIGA software library.

JukeBox A program to play compact digital audio discs by emulating a graphical user interface similar to common CD players. It provides a command line oriented, fully programmable ARexx user interface, as well. Version 1.2522, shareware, binary only.  
Author: Franz-Josef Reichert  
disk/cdrom/jukebox.lha Readme

MemoMaster A program that warns you about events (like birthdays and anniversaries) as they approach. Version 2, includes source.  
Author: Jeff Flynn  
biz/dbase/MemoMaster.lha Readme

---

This is disk 820 of the freely distributable AMIGA software library.

QuickFile A flexible, fast and easy to use flat file database using random access with intelligent buffering to minimise disk access, multiple indexes for fast access to records, form and list style screens and reports, and fast sorting and searching. Files are quickly and easily defined, and fields can be added, changed, or deleted at any time. Version 1.2, shareware, binary only  
Author: Alan Wigginton  
biz/dbase/quickfile.lha           Readme

=====

This is disk 821 of the freely distributable AMIGA software library.

=====

This is disk 822 of the freely distributable AMIGA software library.

NetHack   A screen oriented fantasy game where your goal is to grab as much treasure as you can, retrieve the Amulet of Yendor, and escape the Mazes of Menace alive. On the screen is a map of where you have been and what you have seen on the current dungeon level. As you explore more of the level, it appears on the screen in front of you. Nethack generates a new dungeon every time it is played, thus even veteran players will continue to find it entertaining and exciting. This is part 1 of a 3 part distribution. Part 1 contains the binary portion of the distribution. Part 2 and part 3 contains the source portion of the distribution, and can be found on disk 823 and 824. This is version 3.1pl0, an update to version 3.0pl10 on disk 460. Includes source.  
Author: Various; see documentation  
game/role/NetHack\_3\_1.lha       Readme

=====  
This is disk 831 of the freely distributable AMIGA software library.

Term       A gift-ware telecommunications program written for AmigaOS 2.0  
            or higher. Features include total configurability, full ARexx  
            control, Xpr-transfer support, filetype-identification after  
            download, cut & paste/point-and-click on screen, auto upload  
            and download, unlimited size scrollable review buffer, solid  
            and fully-featured VT102/VT220/ANSI emulation, support for  
            external terminal emulation libraries, optional fast atomic  
            terminal emulation, hotkey support, powerful phonebook and  
            dialing functions, ability to save and print the contents of  
            the screen as IFF-ILBM or ASCII file, full overscan and screen  
            resolution support (AGA and ECS screen modes included), async-  
            hronous operation and a lot more. This is version 3.1, an up-  
            date to version 2.3 on disks 725 and 730. This is part one of  
            a three part distribution, and contains the main program, doc-  
            umentation, and auxiliary data files.

---

This is disk 833 of the freely distributable AMIGA software library.

**Term** A gift-ware telecommunications program written for AmigaOS 2.0 or higher. Features include total configurability, full ARexx control, Xpr-transfer support, filetype-identification after download, cut & paste/point-and-click on screen, auto upload and download, unlimited size scrollable review buffer, solid and fully-featured VT102/VT220/ANSI emulation, support for external terminal emulation libraries, optional fast atomic terminal emulation, hotkey support, powerful phonebook and dialing functions, ability to save and print the contents of the screen as IFF-ILBM or ASCII file, full overscan and screen resolution support (AGA and ECS screen modes included), asynchronous operation and a lot more. This is version 3.1, an update to version 2.3 on disks 725 and 730. This is part three of a three part distribution, and contains the documentation in DVI and PostScript formats.

Author: Olaf 'Olsen' Barthel  
comm/term/term42Doc.lha           Readme

**ZIP** A program which can interpret and run standard series and interactive fiction plus Infocom game files. Includes sound and proportional font support and other Amiga specific features. Version 1.00, Amiga release 2.2, includes source in 'C'.

Author: Mark Howell, Amiga port by Olaf Barthel  
game/role/ZIP\_1\_0.lha            Readme

=====  
This is disk 834 of the freely distributable AMIGA software library.

**PInfocom** A portable Infocom standard series game file interpreter that can also analyze any Infocom game file and display vocabulary lists, object trees, etc. Has many informative and debugging options that can be enabled at runtime. Includes extensive documentation, sound and proportional sound support, and many Amiga specific features. This is version 3.00, Amiga release 2.34. Includes source in C.

Authors: InfoTaskForce & Paul D. Smith; port by Olaf Barthel  
game/role/pinfocom\_3\_0.lha    Readme

=====  
This is disk 835 of the freely distributable AMIGA software library.

**Mine** A new Modula-2 implementation of an old computer game. You have an N \* N square with mines hidden in some fields. Your job is to mark them with a flag as fast as possible. High-score lists are supported. This is version 1.8, an update to version 1.6 on disk 758, and contains a few improvements and some bug fixes. Requires AmigaDOS 2.0, includes source.

Author: Thomas Anson  
game/think/Mine.lha            Readme

---

Mines A game in which you have to logically find out which parts of the mine-field are not mined. There are many kinds of mine-fields and you have to be very careful to be able to solve the most difficult levels. Mines opens its own window on a Workbench screen and it's multitasking friendly. This game was made and tested under Workbench 2.0, so the colors may look a bit strange under WB1.3. Version 2.0, binary only.  
Author: Teemu Sipilä and Marko Malmberg  
game/think/mines.lha Readme

KingFisher A specialized database tool providing maintenance and search capabilities for the descriptions of disks in the format used by this library. KingFisher's database can span multiple (floppy) disk volumes, can be edited by text editors that support long text lines, can add disks directly from unedited email or usenet announcements, can remove disks, rebuild a damaged index, find next or previous software versions, print or export (parts of) the database, and more. Includes a database of disks 1-850. This is version 1.30, an update to version 1.15 on disk 808. Binary only.

CFX Crunched File eXaminer allows the user to examine and find files using several different search criteria. CFX knows a huge amount of the current Amiga filetypes, including a vast number of "cruncher" types. CFX can also give in-depth dis-assemblies of crunched files, including most address crunched files, relocater crunched files, and some major archive crunched types. This version requires kick 1.3 or 2.0. Version 5.275, an update to version 5.242 on disk number 750. Binary only, freeware.

StatRam Stat-RAM or 'SD0:' is a very fast recoverable ram drive that takes advantage of FFS under WB2 or FFS International under WB2.1 or 3. This work is based on ASDG's 'VD0:'. ASDG-RAM has been reliable for many years since it was placed in the PD. However it has always been slow because it uses OFS, or old file system. On an accelerated machines, SD0: is up to 7 times faster, and averages 5 times faster than the original VD0:. It's also 4 to 5 times faster than RRD. It survives the deepest re-boot, even the ColdReboot of re-kicking a KS file. Version 1.5, binary only.

ArmyMiner An ultimate "XMines-type" game that integrates all of the best  
          aspects of the previous Amiga versions of the game. Options  
          include: Automatically mark or clean the neighbours of a  
          square; Safe start (no explosion at first click); Safe click  
          (gadget-like behavior for squares); Question marks (for con-  
          figuration analysis). You can also specify your own custom  
          board settings. The game has a very useful pause option,  
          sound effects, high-score tables and a very nice interface.  
          It works under OS v1.3 or 2.0, NTSC or PAL. Version 1.1, an  
          update to version 1.0 on disk number 851. Binary only.  
Author: Alain Laferriere
