

Fs5 **\*\*\*\*Frankfurt Main Intl Airport scenery\*\*\*\***

BY Henrique Uslar( [Juslar@true.net](mailto:Juslar@true.net))

1. What's that?
2. Features
3. Installation
4. Author
5. Etc

1.\_ This is a scenery of the Frankfurt Main Intl airport. This is one of the most important airports from Europe. It is the central airport from Lufthansa and other german airliners. FltSim5 doesn't include in the default world, so you've to buy the Bao Europe scenery, which is difficult to find for people who lives in South America (Me) Central America and many other areas. Also there isn't in the net any good scenery of this airport. Well , I decided to do it!

2.\_ This scenery features the two terminals, with jetways, all the taxiways( some were inveted by me) , the three runways , some hangers . Dinamic scenery can be seen at some of the gates from the terminal. There's also a plane which takeoff from RWY 7L . Service cars can be also seen at some gates. ILS for the 4 main runways are included, as well as the Frankfurt main Vor, and other two Vors that help in the approach. The Scenery was made using real charts. The scenery just include the Frankfurt airport, but if someone wants to help me doing the rest, you're welcome! I used Airport 2.02 to make this scenery. It is a really good scenery maker, and its free!

3.\_ This scenery is compatible with the Fs default world. If you want to use it with Eurbgl or another europe scenery, you have to deactivate them in order to see this scenery. I'll try to make it compatible with Eurbgl in the future. It should run with Fswin95 . But if you have problems , just send me a request for a fs6 scenery, and I'll do it. .... Copy the FFM.bgl into the main fs5 scenery directory. The texture files go into the texture directory.

4.\_ I'm 16 years old and I'm Venezuelan. I've landed (Real) in Frankfurt several times, what makes the feeling of landing in Frankfurt( Fs) really cool. We used to fly to Germany with Lufthansa. But now Lufthansa doesn't fly from here anymore. Our national airline Viasa, also flew to Frankfurt, but now she's broken. Avianca , the colombian national airline, is now flying from Caracas to Frankfurt. You can also fly with KLM or Air France. Any question you have about my country?

5.\_ Please , don't dude on aking me anything about the scenery. If you want to add anything to the scenery, do it but before that advise me. The cost of the scenery are your comments. Please write to me saying what you thing about the scenery.

Enjoy it  
Aufwiedersehen
