Where To Find Help:

Depending on your needs, there are a large variety of resources available to users of the world networks.   The most easily accesible of these are various LISTSERV mailing lists that deal with net related topics.   Some of these are listed here, others can be found by checking the global LISTSERV mailing list. More information about using LISTSERV functions can be found in the appropriate chapter of this document.   All mailing list addresses are in BITNET format (except THINK.COM).

Network-Related Mailing Lists:

HELP-NET at TEMPLEVM - Established as a reference source for all areas of net usage, Help-Net serves as an informal forum for discussion for both expert and novice users.

INFO-NETS at THINK.COM - Discussion list dealing with inter-network connectivity, especially in regard to mail, mailers, and gateways.

ADVISE-L at UGA - Discussion list for   student consultants.

GGUIDE at BITNIC - Discussion list regarding questions about the BITNIC documentation.

Machine Specific Mailing Lists:

These lists deal with topics only related to a specific machine.

Macintosh

INFO-MAC at RICEVM1

MAC-L at YALEVM

SYS7-L at UAFSYSB (System 7.0 Discussion)

IBM-PC

IBM Mainframes
