## 1.7 127.guide/Economy (Kazakhstan)

### Economy (Kazakhstan)

=====

#### Overview:

The second-largest in area of the 15 former Soviet republics, Kazakhstan ↵  
 has  
 vast oil, coal, and agricultural resources. Kazakhstan is highly dependent  
 on trade with Russia, exchanging its natural resources for finished ↵  
 consumer  
 and industrial goods. Kazakhstan now finds itself with serious pollution  
 problems, backward technology, and little experience in foreign markets. ↵  
 The  
 government in 1992 continued to push privatization of the economy and freed  
 many prices. Output in 1992 dropped because of problems common to the  
 ex-Soviet Central Asian republics, especially the cumulative effects of the  
 disruption of old supply channels and the slow process of creating new  
 economic institutions. Kazakhstan lacks the funds, technology, and  
 managerial skills for a quick recovery of output. US firms have been  
 enlisted to increase oil output but face formidable obstacles; for example,  
 oil can now reach Western markets only through pipelines that run across  
 independent former Soviet republics. Finally, the end of monolithic  
 Communist control has brought ethnic grievances into the open. The 6 ↵  
 million  
 Russians in the republic, formerly the favored class, now face the ↵  
 hostility  
 of a society dominated by Muslims. Ethnic rivalry will be just one of the  
 formidable obstacles to the prioritization of national objectives and the  
 creation of a productive, technologically advancing society.
