Economy (Kyrgyzstan)

=====

Overview:

Kyrgyzstan's small economy (less than 1% of the total for the former Soviet
 Union) is oriented toward agriculture, producing mainly livestock such as
 goats and sheep, as well as cotton, grain, and tobacco. Industry,
 concentrated around Bishkek, produces small quantities of electric motors,
 livestock feeding equipment, washing machines, furniture, cement, paper, ←
 and
 bricks. Mineral extraction is small, the most important minerals being coal ←
 ,
 rare earth metals and gold. Kyrgyzstan is a net importer of many types of
 food and fuel but is a net exporter of electricity. In 1992, the Kirghiz
 leadership made progress on reform, primarily by privatizing business,
 granting life-long tenure to farmers, and freeing most prices. Nonetheless,
 in 1992 overall industrial and livestock output declined because of acute
 fuel shortages and a widespread lack of spare parts.
