Economy (Nicaragua)

=====

Overview:

Government control of the economy historically has been extensive, although the CHAMORRO government has pledged to greatly reduce intervention. Four private banks have been licensed, and the government has liberalized ↔ foreign

trade and abolished price controls on most goods. In early 1993, fewer than 50% of the agricultural and industrial firms remain state owned. Sandinista economic policies and the war had produced a severe economic crisis. The foundation of the economy continues to be the export of agricultural commodities, largely coffee and cotton. Farm production fell by roughly 7% in 1989 and 4% in 1990, and remained about even in 1991-92. The ↔ agricultural

sector employs 44% of the work force and accounts for 15% of GDP and 80% of export earnings. Industry, which employs 13% of the work force and contributes about 25% to GDP, showed a drop of 7% in 1989, fell slightly in 1990, and remained flat in 1991-92; output still is below pre-1979 levels. External debt is one of the highest in the world on a per capita basis. In 1992 the inflation rate was 8%, down sharply from the 766% of 1991.
