1.7 232.guide/Economy (Tajikistan)

Economy (Tajikistan)

=====

Overview:

Tajikistan has had the lowest living standards of the CIS republics and now faces the bleakest economic prospects. Agriculture (particularly cotton and fruit growing) is the most important sector, accounting for 38% of employment (1990). Industrial production includes aluminum reduction, hydropower generation, machine tools, refrigerators, and freezers. Throughout 1992 bloody civil disturbances disrupted food imports and several regions became desperately short of basic needs. Hundreds of thousands of people were made homeless by the strife. In late 1992, one-third of industry was shut down and the cotton crop was only one-half of that of 1991.
