## 1.7 38.guide/Economy (Bulgaria)

### Economy (Bulgaria)

=====

## Overview:

Growth in the lackluster Bulgarian economy fell to the 2% annual level in the 1980s. By 1990, Sofia's foreign debt had skyrocketed to over \$10 billion

- giving a debt-service ratio of more than 40% of hard currency earnings and

leading the regime to declare a moratorium on its hard currency payments. The post-Communist government faces major problems of renovating an aging industrial plant; keeping abreast of rapidly unfolding technological developments; investing in additional energy capacity (the portion of electric power from nuclear energy reached over one-third in 1990); and motivating workers, in part by giving them a share in the earnings of their enterprises. Political bickering in Sofia and the collapse of the DIMITROV government in October 1992 have slowed the economic reform process. New Prime Minister BEROV, however, has pledged to continue the reforms initiated

by the previous government. He has promised to continue cooperation with the

World Bank and IMF, advance negotiations on rescheduling commercial debt, and push ahead with privatization. BEROV's government - whose main parliamentary supporters are the former Communist Bulgarian Socialist Party (BSP) - nonetheless appears likely to pursue more interventionist tactics in

overcoming the country's economic problems.
