## 1.7 62.guide/Economy (Cuba)

### Economy (Cuba)

=====

#### Overview:

Since Castro's takeover of Cuba in 1959, the economy has been run in the Soviet style of government ownership of substantially all the means of production and government planning of all but the smallest details of economic activity. Thus, Cuba, like the former Warsaw Pact nations, has remained in the backwater of economic modernization. The economy contracted by about one-third between 1989 and 1992 as it absorbed the loss of \$4 billion of annual economic aid from the former Soviet Union and much ← smaller

amounts from Eastern Europe. The government implemented numerous energy conservation measures and import substitution schemes to cope with a large decline in imports. To reduce fuel consumption, Havana has cut back bus service and imported approximately 1 million bicycles from China, domesticated nearly 200,000 oxen to replace tractors, and halted a large amount of industrial production. The government has prioritized domestic food production and promoted herbal medicines since 1990 to compensate for lower imports. Havana also has been shifting its trade away from the former Soviet republics and Eastern Europe toward the industrialized countries of Latin America and the OECD.
