1.2 Description

Disciption

With this tool, you can undelete files on PFS3 and PFS2 formated drives.

Simple doubleclick the device to get the .deldir list of this device. To undelet files just doubleclick them so you'll find the files stored for undelet in the List below. Select files from different devices is no problem. If you have selected all files you want to restore, so click on the Restore button and you'll find all files in the selected Destination. If you did an mistake, just doubleclick the file in the List to remove it.

1.3 Problems

Problems

1 If you have the PFS3 standartversion installed (TD64) and have a larg deldir list or larg files in the deldir list, your machine sometimes lockup. This is not an error of my program, it is an error from PFS3 (TD64). I have tried to salv the problem and I have found a way: Just install the PFS3ds (direct scsi) version and all works fine!

2 If you have larg deldir list or larg files in the deldir list, the reading take time. Thats normal. Also to undelete a big file needs some time.

1.4 Menu

Menu

Project About Prints information abou the program.

Quit Quit the program.

Use Get .deldir Get the deldir list of the selected device in the Source list.

Restore Restore the Files from the List in the selected device from the destination list.

1.5   History

History

25.11.1999 PFS3ud V 1.0 First release.

1.12.1999 PFS3ud V1.1 Problem with PFS TD64. See Problems for info. Bug fixed for reading non PFS devices. Now programstatus is displayed below the deldir list.

5.12.1999 PFS3ud V1.2 Not released testversion. This version is only for test the PFS3 deviceselection. Filenamecorrection of restored files implemented. First Beta version.

10.12.1999 PFS3ud V1.3 Realese now all the featurs wich are includet in the version 1.2. They work all now.

New: - Only PFS devices are displayed in the source device. - Only valide devices are displayed in the destination device. - The extension number of restored files are now removed.

15.12.1999 PFS3ud V1.3a This version isn't released in the AmiNET. Only the doc's has changed. History now in the documentation.

23.12.1999 PFS3ud V 1.4 New: - Now you have to creat an undelete List. This list allows you to undelete files from diffrent devices with one click. Restoring of files with a space-char did not work. Fixed. Some User told me, that PFS3ud work fine with PFS2. Thanks to them for report.
