1.2 How to use the poke guide

Well, this is really easy peasy...

- Just start ZXAM (the poke guide supports no other emulator).
- Load the game you want to play, but do NOT run it. It is crucial that the emulation has been stopped!

- Go to the poke list and search for the game you have currently loaded. If it is not there, well, bad luck to you... :)
- If you've found it, just move the mouse towards the box and click on it.
- All games marked with a "->" open a sub list. You can select some more different pokes.
- All games marked with a "?>" open a sub list with some nice hints.
- Yeah, that was all the hard work. You now just have to start the emulation... :-)

I tried very hard to make no typo while typing all the pokes down...
But - as nobody - i am not perfect at all. It is possible that a poke does not work or even crash your emulated spectrum, since most of the pokes in this list are not checked.

The function of some pokes are not known, too... But i think you will detect their function yourself.

If you have more pokes, better pokes or whatsoever, please feel free to **contact** me...

I'm also looking for comments on the pokes. Do they work?

1.3 Get in contact with me !!!

If you've found some bad pokes, found out the function of the anonymous pokes, have some additions or even new or much better pokes or just want to swap poke lists, PLEEEEEEEZE contact me immediately!
This poke guide lives by YOUR help only! The more you help me, the better this guide will be finally!!!

You can contact me, too, if you tested some pokes (even if they did or didn't work)...

But remember: if you want to send me some new pokes, you always have to send the full game name, the poke and its function... I'll include your name into the greetings list! :-)

You can also send me a game you want to have POKES for, and i'll see what i can do... :-)

Well, i just reached my aim to get 500 pokes! YEAH! I even exceeded it by 177 pokes! But i wonder if it is possible to get 800 pokes...

I prefer E-Mails. Send them to:

rkoerber@tfh.dssd.sub.org

Until September 1996, you can also visit my home page:

Sorry, German language only...

I'm reachable via snail mail, too:

Please include a self addressed and stamped envelope if you want to get a reply...

You can always get the latest version at my support BBS...

1.5 Thanks and greetings...

I wish to thank these people...

Sven Arke for supporting me with his BBS

Antonio J. Pomar Roselló for the ZXAM Spectrum emulator

Clive Sinclair for inventing the ZX Spectrum :-)

For their poke lists, i wish to thank...

ASM, Mad Hynek, Lorenz Glatz, cotrina@lia01.unizar.es and the coders of 'poke-sna'.

And especially: Dalibor "dulus" Schon, Simon Owen and

Wojciech Kaminski

For poke testing, i wish to thank...

Wojciech Kaminski

1.6 Self made pokes...

I've found the POKEs of these nice games by myself... :^)

1.9 Declaration of all shortcuts

These are all shortcuts i used in this guide, and their explanation:

BF - bug fix removes some bugs

EG - easy game removes some difficulties etc.

IM - immunity immunity against shots, enemies etc.

ML - maximum lives your lives are still limited (normally 255)

MP - multi-poke does many good things... :-)

NC - no collision you cannot collide with enemies

NE - no enemies you're alone in this game... :)

NS - no sound useful late at night's

UC - unlimited credits you have unlimited credits

UD - unlimited deflector your shields are eternal

UE - unlimited energy you won't lose any energy

UF - unlimited fuel no fuel problems

UL - unlimited lives you have thousands of lives

UM - unlimited money you are rich :-)

UO - unlimited oxygen enough of air to breathe

US - unlimited shots rockets, grenades or whatsoever...

UT - unlimited time you have enough time to finish

-> - link to a sublist here you can select different pokes

?> - link to some hints no pokes but useful anyway...

?? - function not known i don't know what this POKE does... if

YOU know, please tell me!

All pokes that are marked with an asterisk '*' are tested. If this poke does not work with your game, you do probably have a newer/older version.

Please write me, and I'll try to include another poke which might work.
