# Chapter 1

## 07725350-0

### 1.1 Welcome to FrexxEd

Welcome to the world of FrexxEd!

We are proud to announce that you have just installed four years of hard work on your Amiga.

FrexxEd offers a *\*large\** amount of functions, features and comfortable details. Even more can be added by the user; if the proper FPL program is started or if the right commands are typed in.

To properly get to know FrexxEd, you ought to give it at least a little time and a little reading!

Make a first customization - select which FPL programs to run at startup. (It takes a while to build the list, but hang on!)

What is FrexxEd? - Text about the principles behind all this...

Changes since last version - What has been done lately?

Display the online manual from start - Main gate into ~600 KB manual!

Show me the feature list - Just a few things FrexxEd can do...

How do I start FrexxEd? - Command line options/tool types etc.

Internal function reference (*\*HUGE\**)

Distribution details and rules - Freely distributable but ShareWare!

Problems or questions, complaints or ideas. Mail us at:

Daniel Stenberg - Daniel.Stenberg@sth.frontec.se

Kjell Ericson - kjer@pki.philips.se

Mailing list - dastmail@sth.frontec.se

You won't find FrexxEd to be a beautiful editor, not even as user-friendly as many other editors can be. But when you look under the hood, you'll find an engine with power enough to dance around just about any competitor...
