1.4 Requirements

Requirements:

To run properly, IRT needs the following :

- _ an Amiga

- _ The Reqtools.library.

1.5 life team

Life Team :

The Life Team is a small French programming group, which has for main goal to distribute freeware proggyes, Shareware's (and why not commercial's ;-)) on Amiga. Our programmms are made with the powerfull Blitz Basic 2 by Acid Software. Our second goal is to make Blitz wellknown (mainly in France), because it is probably one of the best languages.

Life Team programmms :

W-Anim : an IFF anim in window viewer. It has lots of functions (frame rate, palette choose ...).

Insulte : a program that insults you (french only at the moment :-() !!!

LTAssign : an AppIcon that assigns files you drop on it.

Searcher : a powerfull file finder with a superb GUI.

SmallGrabber : a screen grabber with another superb GUI ;-)

SmallPlayer : A small module player for low-memeroy amiga

AppSize : An AppIcon that tels you the size of the directory you launch on it.

IconPlayer : An AppIcon to play .mod files.

You can find all those programmms on your favourite aminet site or at the following address :

No modifications can be made at the present archive without author's permission. No payement can be exiged for it, only the support and the copy fees.

1.7 irt

A baby could use IRT so it is simple ! Choose a Source icon and launch it on the left side of the window (you can also use the "Load Source" button and the "Load Source" menu). Do the same with the destination icon. Once done, just click on the "Install" button and it's all over.

And if you made a mistake, the "Undo" button is here to help you :)

I think that's all you need to know to make good use of Icon Replacement Tool.

1.8 installation

You just have to copy IRT directory where you want to fix it.

1.9 history

_ Version 1.5 : due to a big hard disk crash, I had to re-write IRT entirely. So there are a lot of new things :

IRT is now **Shareware** .

A new and powerfull GUI

An "Undo" button.

IRT is localized.

_ Version 1.0 : First version released

1.10 credits

Without their help, IRT wouldn't have been released :

_ OFS for his advises.

_ Pierre for the bugs I found.

_ RWE for the Blitz Support Suite.

_ Acid Software for the Blitz Basic.

1.11 help

I need some help to finish IRT localisation. I would like Italian, German and Spanish people to translate the catalog file and the documentation. If you accept to do that, you'll receive a free registered copy of IRT.

1.12 register

When releasing IRT as a Shareware program, I decided to do REAL Shareware. IRT is not limited in any way, but it has some requesters. If you register, you will receive a personnalised copy of IRT plus extra-bonuses from the Life Team.

Please don't forget that when registering IRT you support the developpement of high quality software for the Amiga !
