# **Chapter 1**

# **YAGG**

### 1.1 Y.A.G.G.

```
Y. A. G. G.
Yet Another Gravity Game
```

Black Blade Desing

```
What is Y.A.G.G.?

Installation.

What do you need to run Y.A.G.G.?

Setup screen.

Weapons.

The game.

History.

Known bugs.

Shareware notice.

How can you reach the author?

Registration - orderform.

Greetings.

Copyright 1995 -

Black Blade Desing
(sorry for my bad English...)
```

YAGG 2/9

#### 1.2 What is Y.A.G.G.?

YAGG is a gravity game like Roketz and Bratwurst. 2, 3 or 4 player must destroy their opponents ASAP.

#### 1.3 Installation

Just drag YAGG drawer anywhere you want. No assigns are needed.

If you cliks on YAGG icon once and select "icons/informations" from WB menus, you'll find the tooltype FIELD=<arena's name>. Write here the default battlefield name, if you want...

### 1.4 What do you need to run YAGG?

- A fast Amiga. 68030/25MHz or above highly recommended.
- Kickstart v.39 (3.0) or above.
- FastRam recommended.
- At least 490KB free chip ram
- AGA recommended (Blitter will thank you) but not required.

YAGG is written in 40% assembly and 60% in BlitzBasic2. Due to using a high level language a data cache will increase the speed very much.

YAGG opens a standard "intuition" screen, so you are free to use a screen promotor to use a non-PAL screenmode (e.g. try to activate the "mode promotion" option in Prefs/Icontrol). Anyway you should not use a vertical refresh frequency different by 50Hz.

YAGG accesses directly to the blitter, anyway, it multitasks happily.

YAGG has been successfully tested on:

```
Amiga 4000/040 25MHz 8MB Fast + 2MB Chip Os v.3.0 SetPatch v40.16
Amiga 4000/Ec030 25MHz 8MB Fast + 2MB Chip Os v.3.1
Amiga 1200/TQM50 (030/50MHz) 4MB Fast + 2MB Chip Os v.3.0
Amiga 4000/Cyberstorm060/50MHz 8MB Fast + 2MB Chip Os v.3.1
```

PAL and DblPAL AGA modes and ECS/OCS emulation modes.

### 1.5 Setup screen

-----

From top to bottom:

Player ? - Select the current player

CPU modes are not yet implemented.

PlayerName - Write your name here.

Quit - The end.

Start - Starts a new battle.

Available ships - These are the ships you can use. Just click on the name of the ship and it will be displayed in the box below.

Flms - Enable the "flame" effect.

Cmt - Enables the comet-like missile trails

LastMatchWinner - It explains itself.

L. - The number of lives.

g - Gravity acceleration. Useful values are -3000...3000.

Arena - Click here to choose the battlefield.

Weapon? - Each ship can mount up to 4 different weapons. Select here what mounting you are going to select the weapon. The mounting is highlighted in the ship box and you can select the type of weapon in the list.

Each mounting can carry a certain amount of weight. According to the chip you have and the mounting you have choosed, the same weapon can have a different amount of ammunitions.

#### Ship Infos:

Shields - The damage yuor ship can sustain.

YAGG 4/9

Rot. sp. - Rotation speed.

Mass - Ship mass.

Antispin - How fast your ship regain control after an uncontrolled spin.

Acceler. - Acceleration.

#### Weapon infos:

Speed - Starting bullet speed.
Shots/s - Mah, I don't know :-)

Deviat - The lower, the better precision.

Range - The distance the bullet can reach. In case of autoguided weapons this is the distance after which the missile begins to

follow the nearest ship.

Damage - Single bullet damage. (before arming and not counting splinters).

Power - Average damage for 1 second burst.

Ammo - Number of shots.

Time - Lifetime of the bullet. For autoguided weapons this is the time after which the missile begins to follow the nearest ship.

## 1.6 Weapons

Machine Gun 1-5	Standard gun. Medium range. Quite weak.	Each model
	have it's own speed ang Shots/s rate.	
	Bullets appears grey in color.	

Big Gun 1-3	Same as	ak	ove,	but t	he auto	ofire	is	very	slow.	It's
	between	5	and	6 time	more o	danger	ous	than	MG.	
	This is	а	long	range	weapor	n. Bu	ıllet	s are	e orang	ge.

Small Rocket 1-3	They	have	acc	celerated	d n	novement	and	d an	expo	sive
	warhe	ad.	They	strike	а	damage	just	like	BG1,	but
	can bump your opponent against a					wall.	•			
	The c	olor	is wh	nite.						

Medium Rocket 1-3	They	are	similar to	SR,	but	they	are	slower	and
	3-4 t	ime m	ore harmful.						

Large Rocket 1-3	More	dangerou	s ver	sions	of	MR.	. They	are re	ally
	power	ful, but	also	very	hea	vy.	Usually	you you	can
	carrv	only a f	ew she	lls.					

Turbo Gun 1-3	High p	powered	versi	on of	machine	guns.	Only	little
	ships	(which	can't	mount	heavier	weapon	ıs) car	n carry
	these	guns.						

	these guils.
Missiles 1-4	Simple missiles. They are quile easy to avoid beacuse of their strong inertia, but don't try to
	exceed them in speed!
	When you launch a missile, it starts just like a
	small rocket. After a certain amount of time
	(lower in Mis-1, higher in Mis-4), the missile
	begins to follow the nearest ship. So don't launch
	a missile-1 when your opponent is far and
	vice-versa.

YAGG 5/9

Mini Gun 1-3 Between MG and TG.

Shooting missile 1-4 :-)) Really bad weapon. After they are armed (arming time varies very little), they begin to shot to the nearest ship. The higher the model, the longer is the lifetime.

Class-A Smart Missile 1-4 Slow and hard to avoid missiles. They are a bit less powerful than standard missiles.

Auto Rockets 1-3

Just like Small rockets, but they can change they direction a bit. You can hit yor opponent much more easily. Higher models have higher precision.

Shooting Mine 1-5 Very very slow shooting missiles. You are recommended to not collide with them....

Class-B Smart Missile 1-4 Faster version of Class-A smart missiles.

Mine 1-4 Simple and powerful proximity mines.

If a missile (mines and smart too) hits before being armed, it strikes a very low damage. Actually, you waste a bullet.

## 1.7 The game

Ship controls are:

Left and right - Rotate the ship.

Up - Accelerate.

Fire e - Shoots weapons 1 and 2.

Down - Shoots weapons 3 and 4.

Keys:

Keyboard 1 LShift 1 2 3 numeric pad

Try to not bump against the wall. You must destroy your opponent before you can do it with you.

To the edges of the screen are displayed the following informations:

Lives (2 pixel = 1 life)
Shields
Ammol (1 pixel = 16 bullets)
Ammo2 (1 pixel = 16 bullets)

YAGG 6/9

```
Ammo3 (1 pixel = 2 bullets)
Ammo4 (1 pixel = 2 bullets)
Number of missiles that are following you.
```

### 1.8 History

```
DO NOT USE OTHER VERSIONS BUT THE FOLLOWING ONES !!
v1.0
      * First release.
v1.8
       \star Fixed stupid bug in the GUI. Now player 1 has no more need to
         reselect the first weapon after every match.
       \star Simple mine added. (Old mines are renamed to Shooting mine).
       * Some changes to the ships.
       * Minor changes.
       * Added "Arena:" button to choose the battlefield at runtime.
       * Added some undocumented weapons.
       \star Speeded up by 50% ship's points calculation.
       \star The direction of weapons in the pre-battle screen was wrong.
       * Small change to the sound routine
       * New intro screen
v1.12 * When you ship is damaged you cannot shoot well
       * Ships no more reappear over another ship.
       * Stupid bug that trashed 115KB of memory removed
       * Now missile trails are much more fun :))
       * Now you cannot completely disable the flames
       * Little bug in the GUI fixed
v1.13 * Now takes care of the ship mass when you are hit.
       * Code is a bit shorter
       * Two ships added
v1.14 * Stupid bug introduced in v1.13 fixed
       * Various changes in collision handling routines
```

# 1.9 Known bugs

- On A1200s the keyboard controller can't handle multiple key pressings, so you can't control your ship by keyboard on A1200s :- (
- YAGG seems to hang when QuickGrab is running.

\* "Eracle" collision detection error fixed.

Please report all the bugs you find !!

#### 1.10 Shareware notice

```
This program is shareware. If you often use it, you must register.
```

This software is subject to the "Standard Amiga FD-Software Copyright Note"

YAGG 7/9

It is SHAREWARE as defined in paragraph 4s. If you like it and use it regularly please send \$8 to me (see below). For more information please read "AFD-COPYRIGHT" (Version 1 or higher).

YAGG has the following limitations:

- You can load only 7 ships.
- When you load the game, you must wait 10 seconds.
- After 3-5 matches YAGG quits and you have to reload it.

If you want to regiter, fill the form at the end of this document and send it to me.

Please send only cash, EUROcheque or postal orders. I cannot cash foreign cheques. I'll send you the password to disable all the above limitations. I also accept the registered version of a your program (if I like it, of course).

If I will not receive enought registration agreements, I'll stop development.

## 1.11 How can you reach the author?

```
To pay the registration fee, send bugreports, ...

#### 1.12 Greetings

Thanks to:

Francesco Leonardi - Black Blade Desing - Betatester, designer and author

of presentation screens.

EMail: 2:332/807.19@fidonet.org

Dario Pochini - My brother, author of a few ships and betatester.

Jukebox/talent - Author of the really good PD music.

Acid Software - For BlitzBasicII!!

YAGG 8/9

Martin Huttenloher - For MagicWB.

Prrrr! to:

My mum - To be so much demoralizer.

Acid Software - To not fix those stupid old bugs!!!

Stefano - My brother's friend. He promiser to draw some ships,

but he did nothing, wasting my time.
