Chapter 1

Virus Info Base

1.1 Blowjob

Name : Blow Job

Aliases : Memory Allocator 3.01

Type/Size : Boot/1024

Clone : No Clones

Symptoms : No Symptoms

Discovered : 08-04-91

Way to infect: Boot infection

Rating : Dangerous

Kickstarts : 1.2/1.3

Damage : Overwrites boot.

Removal : Install boot.

Comments : This virus uses the kick-vectors to stay resident. At the top of the virus you can read:

```
[0.5] [1] [1.8] Memory Allocator 3.01
```

```
The DoIO()-Vector will be patched to infect other disks. Further the virus installs a patch in the vertical-blank-interrupt, to show after 10 Minutes a (alert)message:
```

```
ONCE AGAIN SOMETHING WONDERFUL HAPPENED (HE HE HE)..  
PLEASE POWER OFF - PLEASE POWER OFF - PLEASE POWER OFF
```

```
Click on this gadget to see a Demo of the blowjob virus. Push left mouse button to return.
```

This alert text is coded and cannot be read in the bootblock.

NOTE: The Blow Job virus is very similar to the SADDAM HUSSEIN Bootblock virus (ca. 90%). Maybe the same "programmer" !?!
