Chapter 1

Virus Info Base

1.1 ByteParasite 2

Name : Byte Parasite II

Aliases : No Aliases

Type/Size : Bomb/908

Clones : No Clones

Symptoms : No Symptoms

Discovered : 17-07-91

Way to infect: No Infection

Rating : Less Dangerous

Kickstarts : 1.2/1.3/2.0

Damage : Damages VirusX

Manifestation: Pretends to be VirusX

Removal : Delete File immediately.

Comments : HA! Again such a LAME code. If you're starting the Bomb it opens a Window:

```
"VirusX: Checking Device DF0:"
```

```
After that it tries to open "DF0:c/VirusX" if existing
the virus creates "DF1:c/VirusX". This new VirusX is
1 byte long and contains the value 0. I don't
understand for what this Bomb is used for. Maybe to
damage a special person !?!
```

```
In the end of the file you can read:
```

"Now you had have your fun with ByteParasite II!"
"by Hacker & Cracker GmbH GERMANY in 9.91"
