## Chapter 1

# Virus Info Base

### 1.1 Disktroyer

Name : Disktroyer

Aliases : No Aliases

Type/Size : Trojan bomb/ 804 bytes

Incidence : No Incidence

Discovered : 10-09-91

Way to infect: No Spreading

Rating : Dangerous

Kickstarts : 1.2/1.3/ and 2.04

Damage : FastFormat of all Disks.

Manifestation: DisplayAlert

Removal : Install the virus bootblock

Comments : The Disktroyer virus is probably spreaden as a new CLI command because it take over this command and add a new line in your s/startup-sequence.

After infection your disk drive is going crazy and the read/write heads maybe can be damaged together with the floppy disk.

Together with the drive steps are starting you will get the following DisplayAlert:

Disktroyer V1.0 by the powerful  
(w) and .1991 by the powerful  
The Fanatic Crew.
