## Virus Info Base

### 1.1 Killed

Name : Killed

Aliases : No Aliases

Type/Size : Boot/1024

Clones : No Clones

Symptoms : No Symptoms

Discovered : 12-09-93

Way to infect: Boot infection

Rating : Harmless

Kickstarts : 1.2/1.3/2.0

Damage : Overwrites boot.

Removal : Install boot.

Comments : If you're booting with an Killed infected disk, the virus copies itself to \$7EC00. To infect disks the virus patches the DOIO()-Vector. Resident by changing the Cool-Vector. Sometimes a GFX-Message appears (while booting!):

"KILLED" after that "COPY: XXX"

Click on the gadget to see a Demo of the Killed virus. Push left mouse button to return.

NOTE: I can't believe it!!! There are still some FUCKING virusprogrammer-assholes out there who are thinkig that such viruses are superCOOOL !!!

Come'on guyZ even such stupid people like you know

---

that such a fuck won't spread....

There are so many other cool computer-activities you can do.

For example: The SCENE, programming useful tools....

THINK ABOUT IT!

A.D 09-94
