1.2 System Requirements

System Requirements

~~~~~

This game requires approximately 1.5 MB to run and does not need AGA. It was written using an A1200 and has been tested on an unexpanded A500 Plus (1MB of RAM) and did not work!

### 1.3 Hard drive Installation

---

#### Hard drive installation

~~~~~

If you have received this game on disk just copy the disk to your games directory.

If you have downloaded this game from a BBS or other such place then you should have received it in an LHA archived form. If you unpack it to your games directory a new directory will be created. The game will be inside this.

If you do not have the AMOS.Library in your LIBS directory then you should run the LIB_INSTALLER program. This will copy it for you.

To run the game double-click on the 4LYNX4 icon.

1.4 Floppy Drive Installation

Floppy drive installation

~~~~~

If you have the game in LHA form and wish to install it to a disk here's what ya do...

1. Unpack the 4LYNX4.LHA file to you RAM disk. The command would be something like this:

```
Lha e 4LYNX4.LHA RAM:
```

2. Format a disk and name it "4LYNX4".
3. Install a bootable bootblock using this command from the SHELL:

```
Install DF0:
```

4. Go into the 4LYNX4 directory on your RAM disk. Copy ALL the files to the the 4LYNX4: disk.

The game should now boot from disk.

## 1.5 Copyright Stuff

#### Copyright Stuff

~~~~~

This game is NOT public domain. It can be freely distributed so long as all the original files are contained within the LHA or on the disk.

The files contained on the disk/LHA:

```
4LYNX4 ..... The executable
Lib_Installer ..... The AMOS.library installer
READ_ME ..... This read-me file in standard txt format
READ_ME.GUIDE..... This amiga guide read-me file
```

The disk also contains the standard FONTS, LIBS, DEVS, C & L directories with all thier respective files contained within.
