1.6 Èspaisse d'analfabête !

Vous avez répondu oui à cette question. Je vous invite donc cordialement à vous munir d'un dictionnaire afin de ne pas avoir totalement l'air con(ne) et de pouvoir cerner la compréhension de certain termes familiers tels que:

- FUCK
- SHIT
- ASS
- DICK (Oui, ça ce prononce comme Dick Rivers)

etc...

Sur ce, je vous souhaite une bonne **lecture**

1.7 Booooooring...

This archive is NOTHIN'TOPAYWARE but if you want to send me something I won't refuse, I accept:

- Classic CDs (I am seeking "la dance du sabre" and the tune Harpo Marx -of the Marx brothers- plays with his harp)
- Old hard-disks you wanna send to the bin (ST506, IDE or whatever, it's for my personal collection)
- ForceIcon (I know the Archive is on Aminet 3 CD. HELP! I need somebody... HELP!)

Hey listen:

This shit is distributed as is. I cannot be held as responsible for any damage caused to your disk, hard disk, brain, screen or whatever. If your machine just blows while your using my stuff, don't blame me. And if you're offended by my words, just remove

the umbrella you got in your ass.

DReAM is not allowed to distribute my archive.

If I'm writing this, It's because I know that no-one will read this part, and I'm typing it... it, it's no use. Raahh!

1.8 Installation of the pack

How to install the whole thing properly...

First, set the **palette** , then use an Icon utility like Iconian, SwazInfo (the best for that kind of job i think), etc... to replace your Icon Images by the BNS ones.

1.9 Thanks, Credits & Excuses

CREDITS & THANKS

First I would like to honorate my buddy S.B.Nose :

Thank you my brother, without you this hard work would have been nothing, long life and prosperity. _\V/

Then my NET-PAL Trevor MORRIS, who allowed me to use his icon template :

Thank you too, without your work, mine would have never existed. Hmm... Prolite's icons are a little antique for me Hmm... Err. A special thank to MSD Informatique for having given me a 1438s monitor in exchange of mine (which has some problem). It helped me a lot for doing icons.

I don't (and I can't) forget :

Roman Patzner for his very-good RomIcons, Pix & patterns (Sorry for not having sent you a PostCard, but Saint-Etienne is a horrible place to live in, if you win a travel to Saint-Etienne, offer it to your worst enemy, but I can

send you some postcard with an animal, baby, sexy or naked woman, famous-sites, food, etc...)

Martin Huttenloër XEN for creating Magic Workbench (Where's the "More than 8 colors" version of Magic Workbench ? Mmmmh ? Oh yeah. You're still enjoying from MWB2.0 registrations'big money in Acapulco ?)

H.-W.Schober for his Fast IPrefs (I got the version 40.35. I couldn't close my WB screen with further versions of FastIPrefs)

R.E.Spence (the Guy behind RESICONS) I cut, remapped, reworked some of his icons to make mines, the part called **Set the 16 colors palette** is taken from his guide.

Makers of : Iconian (Chad Randall), PPaint (Cloanto), ADPro (I. Dunno).

EXCUSES

Yes ! I also make mistakes, the proof...

Mommy, I'm sorry for all bad things I've made to you :

During nine months, she held me deep inside her, loved me, took care of me when I was ill, cried for me when I was away, grew me the man I am today.

I dedicate this work to all the mothers around the world and especially the broken mothers of Algeria.

Daddy, I'm sorry for all bad things I've made to you

During a long time, he worked hard to get for mum & me the necessary, took care of us, loved us, taught me the good and the bad

The readers, I'm sorry for my distorted English.

1.10 Destroy racism, facism & xenophobia

I could not include this page in the credits page because it would had have been insulting for the people listed there.

INSULTS

Here, in france, we got some guy not very friendly, a real stupid stupid man, not very intelligent but very nasty. So I got some message for this cretin (you can call him jean-marie):

If you think that the jewish massacre by the nazies is only a detail of the second world war, you got nothing to deal with french power, le pen (your name doesn't even meritate capitals letters). Just ask someone to help you suicide by putting one or two bullets in your empty head full of smell of death, in which case i'd be glad to help.

fuck you deeply in the ass,

BNS (this little message was necessary)
