## 1.4   Was ist das ? Haguendäs ? Nique la Stas ?

In case you didn't knew it, this pack features 16 colors icons only for you.

Well you shoudln't be here, go to installation now !

## 1.5   What you need...

You don't have to be rich or to make Bill Gates richer.

The minimum is...

An Amiga (even an A500+ will do fine)

A monitor (well, a resolution of 1x1 is just an advice)

A hard disk, a floppy disk, a Zip disk, whatever disk.

A couple of eyes (Those you have on your head not on your screen, put on your glasses if they're deficient)

But I recommend...

An Amiga 1200 (Kick 3.1 installed, not only to have the latest but to have better gfx results)

A Good hard disk (the more GBytes the better)

2 or 4 Mbytes of FAST (the more the merrier)

A MC68020 or more

That's it

## 1.6   Installation

You should proceed in two steps

1° Set the 16 colors palette ,

2° Replace your icons using SwazInfo, Iconian or anything else...

3° Remap the MWB icons that look trashed and contact the author to ask him if he can do something for these icons.

## 1.8 Read this contentious

The status of this archive is NOTHIN'2PAY-WARE, i.e. you can spread it without limits.

Just two or three things to know:

- I'm not responsible of material damages caused by the use or misuse of my software,

- This archive couldn't be done without the help of some great human beings ,

- I'm always seeking the symphony of CHOPIN (Yeah I know who's the composer now):

you know some WARNER & HB like to play it (Harpo Marx plays it with his harp). if someone knows the title of this masterpiece, please tell it to me (SHAREyourKNOWLEDGE).

## 1.9 A cyberfriend called GINO

Thank you man for your icons, FORCEICON, V.ICONS and your grab . Your TNG prefs icons didn't look so clean, that's because I didn't included my templates in the last release (SORRY) so I reworked them a bit so that they look correct.

Well, nice try (Getting a template from an Icon is not that easy).

...Oh Yeah, just a question :

How do you get the "XEN" border around the icons , I mean erhh...

1° Did you draw it by hand and used NOICONBORDER ?

2° Is there an utility that does the job ?

In case you anserwer number two, could you please send the util to me or tell me how to get it.

That's it.
