## Chapter 1

# GHOSTGUIDE

### 1.1 I say boom, boom, BOOM'n let me hear you say WOehOh !

Hello dudes, how are you ?

You were once again waiting for it and now here it is. As you noticed the filename of this guide is 'GHOST GUIDE' that's because we, the **BNS union** can't be bothered to do for every a guide everytime we release something (We always saythe same things). So we construct guides from bits'n pieces of other guides. Ok ! Enough talken 'bout us, read further...

**Who are the mighty ones**

Next time (and that's for sure) we will split our work in two parts:

One for the icons

Another one for the patterns

As I don't think, many people will download a 2MB archive to have 400KB of icons and the rest of patterns they can't/won't use.

One thing concerning/for mister Kanin or Lepus.

Sir Kanin/Lepus released in his RabbitPatterns 4 a picture called 'Wild B Gang.fin' or something... Well, I'm hardly seekin' the original of this masterpiece. If any body got it (including you, dear Kanin/Lepus) PLEASE, Please, please send it to **me** via E or Snail mail.

Signed - BNS

### 1.2 Legal Notes

Informations

Archive Status : FREEWARE

Distribution conditions : Good magazines (i.e. not DReAM) are allowed to ditribute this archive on their cover Disk or CD provided NED, Gino and I get a free copy of the magazine and its cover disk or CD for free, one for each (Come on ! Is it REALLY expensive ?)

Last important thing: If when you click on our icons everything collapses around you and your best friend Kenny gets killed in the catastrophe or any similar situation (like your hard-disk crashes, your monitor turns into a micro-hoven, etc...) occurs, three words to remember :

WE AREN'T RESPONSIBLE !

---

## 1.3 System requirements

What you need

### MINIMUM

a PeeCeee with the following configuration

Pentium MMX 166MHz with at least 64MB

A 3DFX Graphic Card with a minimum of 4MB of memory

Windo98

And UAE for the Emulation

### RECOMMENDED

An Amiga

## 1.4 Credits

I would like to thank :

SBN :

for lending me his NET access from time to time and for giving me fresh stuff and for his technical help (DOOM DOOM DOOM).

NED :

for the hard disk icon (I had to rework it for me) and his support

GINO :

for his huge work and his support (Hey, what the english for 'retinatura', dude ?)

Trevor Morris :

for THE (!) template & the rest (the icons).

Remco Komduur :

for his letter (and two grabs of his workbench showing my own wife, Cindy C.)

R.E.Spence (the guy behind RESicons) :

because I recolored his icons of Maxxon Tools to my own taste ; if somebody wants more, e-mail me...

Eric Schwartz :

for Sabrina the bear and sheila the camel.

David Swasbrook :

for SWAZinfo (workbench information replacement)

Chad Randall :

for Iconian & PictIcon (too bad you left the Amiga for the Kr... EHrggg.. Grahh.. Peeeeh.. Ceeeirkhh... huh..)

And the others...
