Overview over all Changes made after the last Version by ↔
Aliendesign

For Details of

MCP
or
MCPPrefs
have a look there

V1.43 ----- (29-Dec-2003)

- update MCPAssigns to V1.2: including the new Types "Hold/Lock" and "Hold/Path", update Copyright, make a faster Check after reading the MCP-config. Also a Bug removed if any library not found.
- update MCPPrefs-catalog 1.43: english(internal), german, french and espaniol.
- update MCPguide to V 1.43: english, german, french.
- Edit MCPPrefs.info: The Icon has not have any Tooltypes and the Stack was to great (300000 Bytes). Now all Tooltypes there, but deselected. Change the Stack to 200000 Bytes.
- new Version of MCPPrefs. ATTENTION ! You need NLIST and NLISTVIEW MUI-Classes now !
- new Version of MCP

V1.42 ----- (14-Mar-2003)

- Edit MCPPrefs.info to increase stacksize and start from Workbench.
- add disassembler.library to the package
- Installerscript: MCPCommodity was copied in the wrong Drawer, enstead the asked Drawer the one from MCP was set.
- Installerscript: MCPAppicon.info renamed to MCPapp.info, before this never was copied.
- Installerscript: set now autoinsert from MCP in Startup-sequence after "Assign ENV:", "HappyENV", "MounthappyENV", "MountENV" and "ENV-Handler".
- update Guides V1.42: german,english,french
- update MCP.catalog 1.42: german, french, russian, italian, spain
- update MCPPrefs.catalog 1.42: german, french, russian, spain
- update MCP.catalog 1.41: hungary, magyar
- update MCPPrefs.catalog 1.41: hungary, magyar
- new Version of MCPPrefs
- new Version of MCP

V1.41 ----- (04-Dec-2002)

- update Guides: german
- update MCP.catalog: english (internal), german
- update MCPPrefs.catalog: english (internal), german
- new Version of MCPPrefs
- new Version of MCP
- add Fendrix-icon found in Aminet for MCPPrefs

V1.40 ----- (04-Oct-2002)

- Installerscript: rename wrong name MCP.guide_fr to MCP.guide_fre,
add copy from MCP-History.guide (with icon) and mcp.html (for ←
FAQ)
- gfx.library: remove a bug by using copymem enstead copymemquick, because there
was not longaligned, update copyright and version, remove an unneeded clearcache
to increase speed.
- support.library: remove a Bug in Patternmatching while using Pipe
- update Guides: english, german, francais
- update catalogs: francais, spain
- correct catalogs: german
- new Version of MCPPrefs
- new Version of MCP

V1.39 ----- (03-Jun-2002)

- update catalogs: english (built-in), german, spain, russian
 - update Guides: english, german
 - new Version of MCPPrefs
 - new Version of MCP
 - update Installerscript (add Appicon)
 - added Defaul-Appicon (MCPApp.info)
 - update MCP.gurudat for all new Gurus from OS 3.1and extend existing
descriptions (Fulvio)
-

V1.38 ----- (20-Mar-2002)

- added hungarian installer Script
- update catalogs: english (built-in),german, espanol, russian, french
- update Guides: english, german, french, swedisch
- new Version of MCPPrefs
- new Version of MCP
- new Version of MCPAssigns: now works with envarc:MCP2/MCP.config and mspsupport2.library instead the old ones
- added a preview of the new MCPPrefsprogram (thanks to Jacek)

V1.37 ----- (12-Feb-2002)

- Installer added for italiano language (Fulvio Peruggi)
- New Version of MCP
- New Version of MCPPrefs
- update Svenska-catalogs (Jan Andersson)
- added svenska-Guide v1.36 (Jan Andersson)
- controled .cs-Files for Catalogs, changed german-catalog a little, add english
- extend catalog for new functions
- added PasisMCP-Icons
- update german, french and english Guide (1.37)
- new Version of Patchcontrol
- new Version of Showpatches with Parameters: TASK and LIBRARY can filtered

V1.36 ----- (29-Dec-2001)

- Fixed some errors in German catalog, which showed the wrong Functions
 - New Version of MCP and MCPPrefs
-

- New extended Version of Patchcontrol
- updated ArexxScript to convert MCP.prefs 1.32 (MCP) to >=1.33 (MCP2), updated and extend MCPon/MCPoff tools, added Docs (Fulvio Peruggi)
- update German Guide
- update English Guide (Richard Mulder)
- update French Guide (Phillipe Bovier)
- Installerscript would break on Line 1087 on all not German-installations
- Installerscript overwrote the config (but made Backup before)
- Installer added Français-language (from Phillipe Bovier)
- Installer added Svenska-language (from Jan Andersson)
- added Spanish-language in Installer and updated Spain-MCPPrefs.catalog (both from Javier de las Rivas)
- added Icon for MCP-Drawer

V1.35 ----- (15-Nov.-2001)

- New Version of MCP
 - New Version of MCPPrefs
 - Installerscript should now copy the right Catalog(s)
 - Installerscript now copies Fixjump only you have checked it
 - Old configuration from MCP1 (<V1.33) now should be converted when using the Installerscript
 - fixed many Errors in Installerscript
 - removed Icon from Installerscript
 - added an ArexxScript to convert MCP.prefs from 1.32 (MCP) to >=1.33 (MCP2) (thanks to Fulvio Peruggi)
 - new patchcontrol Version 2.4 (packet from 1.34 installed an old one)
 - added new Mousepointer "MAC_Copland" (also in Installer)
 - include new Russian catalogs and added Russian Installerscript (thanks to Michael Malyshev)
 - new English Guide (thanks to Richard Mulder)
-

V1.34 ----- (30-Cot-2001)

(20-Oct.-01)

- New Version of MCP
- Icons to OS 3.5 and 3.9 Style, old Icons stored
- Make one Histories from all Changes i know, shows confusing, but now i hope it will contain all changes.
- overworked German Guide and added some parts e.g. "snap"
- overworked German Catalog, rename some Functions.
- Installerscript from V 1.30 would never changed or updated, so it can't know MCP2 new ENVARC. Now it will be fixed. Also I killed many many Errors and extended it e.g. the Commodity.
- Can't change MCPPrefs at this time.

20-10-01 I have gotten the Source ! I see, it will be a hard work....

Dieter Groppé

1.3 History of MCP

History of MCP

=====

The programmer: {s}:Stefan, {m}:Michael, {v}:Vincent, {o}:Soeren, {d}:Dieter This ↵
 doesn't mean,
 that each programmer only revise your own routines!

>>USER<< is the name of the user, who reported the bug.

FIXED = fixed ADDED = new REMOV = removed REWRI = rewritten OVERW = overworked ↵
 IMPRO = improved

MCP V1.43----- (29. Dec. 2003)

- {d} FIXED ReqToolsPatch not work sometimes correct.
- {d} FIXED NewEdit will not use all new Keys.
- {d} IMPRO set Appiconname to 200 enstead 100 Bytes.
- {d} FIXED Appicon-Semaphore was not cleared after ending Appicon.

- {d} FIXED Empty String for Appicon crashes.
 - {d} ADDED Appicon-Refresh for DOPUS.
 - {d} REWRI The new-Clockroutine with buffering the behind layer.
 - {d} OVERW VirtualIcons, many optimations, very fast.
 - {d} FIXED VirtualIcons add one ".info" more by open in some case. Getting and writing Icon was wrong.
 - {d} FIXED VirtualIcons will bring a Bug sometimes, fixed.
 - {d} REMOV New Clockroutine, switch back to old Clockroutine.
 - {d} ADDED new Assignmanger-functions: "Hold/Path" and "Hold/Lock" see Guide for more information about it.
 - {d} FIXED one more bug in Snap: first snap will end in chaos, because the semaphore is not ready in this time. Now MCP will wait for it.
 - {d} FIXED remove a little Bug: if the inputstream not set (empty), but the hotkey definated and pressed, a little crash may occure.
 - {d} ADDED Quickdraw-Function.
 - {d} FIXED Enforcerhit in Lock- and OpenPatchroutines.
 - {d} FIXED one more Hotkey-Problem, sometimes the Key was not found.
 - {d} FIXED If Lockpatch and/or MCPVARNAMES on but MCP deactive, the system crashes. All Lock-operations where wrong in this state.
 - {d} FIXED Some Hotkeys will destroy MCPs internal keyhandler-structure. After this, some Keys not arriveable for MCP anymore until restart. This may clear the problem with some Keys, which doesn't work on some systems.
 - {d} FIXED Hotkey 42+43 sometimes will freeze the Amiga, because the returned value was bad.
 - {d} ADDED new Hotkey to deactivate MCP
 - {d} OVERW Crunchpatch now integrated in the new OpenPatch-Routine, so only one patch is setted, even both patches are active.
 - {d} OVERW Lockpatch is implement now in the new LockPatch-Routine. so only one patch is setted, even both patches are active.
 - {d} ADDED new Hotkey to maximize active Window.
 - {d} ADDED new Hotkey to pause/continue/change logbook
 - {d} ADDED new Hotkey to insert a String (with variabels) in Clipboard
-

- {d} ADDED new Feature: MCPVARNAMES

MCP V1.42----- (14. APR. 2003)

- {d} FIXED Where in HardDiskPrefs a device selected, but no option setted, all HD-Prefs functions will disable or crash.
 - {d} FIXED ReqToolsPatch for ASL would free wrong Filelist, this will crash the Amiga every restart from MCP (e.g. changing config)
 - {d} FIXED Blanker (black Screen only) should gone again. A System-pointer from MCP-Main was destroyed everytime read prefs.
 - {d} FIXED SNAP wouldn't work with GZZ-Windows correctly.
 - {d} FIXED Where reqtools.library not aviable, MCP quits without any comment. Now MCP starts without loading it.
 - {d} FIXED one Subroutineexchange will use wordincrement instead longwords for adresses. this bug shouldnot very important, because the wordoverflow will be in reality not very often.
 - {d} FIXED Hotkey Window2Front: The Screentype for the options "only Workbench" or "only Pupscreens" will work totaly wrong.
 - {d} FIXED If no or only one Window on the actual Screen, Windows-menu by some configs will blocking Intuition.
 - {d} FIXED WBClock will try to unlock IBase without locked before, e.g. if the Definitonsstring empty, or the Workbench not running (by starting MCP). Because the Unlock will tried with a Zero-Lock, the system will slow down only, and not crash most time. Now all locks where verified, but the wrong Unlock is fixed,too.
 - {d} FIXED On restarting MCP (e.g. by changing config), the logbook would start one more time, if the waitingtime longer than the needed restarttime.
 - {d} FIXED ReqTimeOut finally work with all options and new Tags from ReqTools.library. All Bugs (hopeful) removed.
 - {d} IMPRO ReqTimeOut now will regognize TAGS for Gadgets (UseDefaultFlag and SetDefaultTag) and this with the correct catalog or english as Default (" _OK |_Cancel") or the one from catalog.
 - {d} IMPRO Calculate NoGuru-Disasslines now better.
 - {d} FIXED Remove a space in NoGuru-Output, only cosmetic change, to get all in the same row.
-

- {d} FIXED REQTimeOut have not check the correct Title, if this was not found, MCP tries to find out a Zero as Text.
 - {d} FIXED Some functions will not start by first start of MCP, but after deactivate/activate or changing prefs. This was because the Workbenchversion was not set by starting before MCP controls which Patch on which Workbenchversion should be started.
 - {d} FIXED WindowsMenu: Was "showallwindows" not set to yes and the active window was the only "normal window", the List will destroyed and the Amiga hangs. Or if "showallwindows" not set, the width of the window instead the Backdrop-Flag will controlled.
 - {d} ADDED PowerUp will now show the correct processor, too.
 - {d} OVERW Workaround for processor-recognition. Now PowerUP will better found.
 - {d} ADDED new Variables for Processorsystem and Grafiksystem: %gs will show P96/CGX/RET/AGA/OCS/ECS, %ps will show PUP/WOS/68k for now (OS4 will follow).
 - {d} FIXED Remove 2 Bugs in Windowsmenu: if the selected Window or Screen changed while running Menu, and the font was never found but set to a silly adress.
 - {d} ADDED new Variables %wn and %WN for number of opened Windows %wn will show windows on act. Screen, %WN on all screens.
 - {d} OVERW Overworked startcode which will ask for mousebutton or pressed Capslock-Key, because problems on some Hardware.
 - {d} FIXED Logbook no longer will use a own semaphore, which was never freed.
 - {d} FIXED Logbook will set "return" to wrong memoryadress, fixed. Return was also set to \$a0 instead \$0a.
 - {d} ADDED Header in Logbookfunction added. Is not setted, nothing changed, but if setted, the "HEADER"-String will write at any start of logbook. This is for more readable output, e.g. to printer or for Startinformation, so the Date only needed in Header, not in the lines.
 - {d} FIXED Remove a little Bug in FreeSemaphore-routine.
 - {d} ADDED Now in Noguru can ask for filename by saving Guru per option.
 - {d} FIXED Logbook will not restart, if MCP was deactive and activate again.
 - {d} OVERW Change Brokername "Master Control Program" to "MasterControlProgram".
-

- {d} FIXED Logbook was not killed, when MCP not use it, e.g. on change Prefs or MCP will not running anymore.
- {d} FIXED Logbook: now will recognize inactivity correctly
- {d} FIXED NoGuru: If disasslines=0, now MCP will not tried to open disassembler.library (and open it, if it was aviable).

MCP V1.41----- (10. Dec. 2002)

- {d} FIXED Bug in NoGuru-Routine. Every second call MUST crash the Amiga after a while since V 1.33. By this Bug the "Change PC" will work again, even is no reqpatch activ or no Req.library avialble.
- {d} FIXED The "SNAP"-Hotkey will work now again. Some hotkeys have destroyed Structures from Blankerroutines.
- {d} FIXED remove Hotkey-Bug. Sometimes "repeat"-Bit will comming with key, and the key wasn't recognize.
- {d} FIXED a little bug when using Workbench with DOPUS for "activate on Workbenchtitle".
- {d} ADDED New Function "logbook", see in Guide.
- {d} OVERW Windowmenu cleared all unneeded Code..
- {d} FIXED stopping or deactivate MCP would give an GURU since V 1.39, (stop APPICON hasn't return to maintask, but to gethotkey).
- {d} IMPRO Noguru now will accept "disass-lines", to solve problems with to long Requesters (e.g. in AGA-Mode), is set to 0 will deactivate.
- {d} OVERW WindowsMenu will now use the Windowfont and Colors.
- {d} OVERW MCP-Main will only use MCP.catalog 1.41 or higher now, other functions, like Reqtoolspatch may use the old one. This is because the new functions will have problems with old castalog.
- {d} ADDED In Windowmenu if no title found, the signaled Taskname is set (e.g AmiDock or Workbench), if this not found, "<No_Title>" is set enstead emptystring (like change in Screensmenu).
- {d} IMPRO Screenmenu now set string "<NoTitle>" enstead empty String, when no title is found.
- {d} FIXED problem with copied Pattern of ASL2Reqtools-Patch, remove one Bug, but there maybe still some more.
- {d} ADDED Windowmenufunktion like Screenmenu for initial functions like

"Depthmenu". The Author from Depthmenu will give me descriptions of his Modules later.

- {d} IMPRO NoGuru get own mem by any call, this means no crash anymore, if more than one Guru in same time.
- {d} ADDED Requester from NoGuru now have new Button "Save", to save this Output in a file.!
- {d} IMPRO New Routine for Requester from NoGuru, now it is localized !
- {d} ADDED NoGuru now will support disass.library for output of the ASMcode, if avialble.

MCP V1.40----- (30. Aug. 2002)

- {d} OVERW optimize some Code (about 180 Bytes)
- {d} ADDED Add all Blankerroutines for Garshne and Swaz, no functionable in moment. (no black Screen anymore, but nothing else) ←
- {d} OVERW Remove some unused Memory-allocations.
- {d} ADDED now MCP has an Idlecounter (see "%pf" and "%pp" in guide)
- {d} ADDED New Titleclock-Function by using Graphicslibrary. This should have some postiv effekts, like faster, more compatible, Fore- and Backgroundcolor could be (later) definable, clock can displayed outside the Titlescreen. No Font will be ~ used in moment, so it will switched on, if no font selected, otherwise the old Routine will be used. ←
- {d} FIXED solve a problem by leaving MCP (or only deactivate) some functions will destroy Stackpointer. ←
- {d} FIXED remove a Bug in all Toolalais-functions (and VirtualIcons) by getting Icons. ←
- {d} ADDED Options "use WB" and "use Pubscreens" for WindowToFront-Hotkey (request from some Users)
- {d} FIXED remove a Bug in "Toolalias" with systemfunction "GetDiskObjectNew" (maybe Diropus use it ?)
- {d} ADDED New Feature "VirtualIcons", with Patternmatching for Devices to filter. ←
- {d} FIXED WBtitle and WBClock sometimes destroy the address for output.

- {d} REWRI renderroutine Modul for AGAchipset, now shorter.
- {d} ADDED new variables from locale-library with %l1.
- {d} IMPRO Variablesrendering-routine will test more efficient for used and needed Memory and allocate earlier. By this i have found and remove a FreeList-Bug.
- {d} FIXED WBtitlescreen have locked wrong screen with DOPUS or Scalos.
- {d} OVERW Workaround for a WBClock-BUG. NoWorkbenchScreens (like DOPUS or Scalos) will allow Multitasking and can't close or reset Screen between found Screen and write the Clock anymore. Thanks to Harry Sintonen.
- {d} ADDED ScreenMenu-2Screensmenu handling. Now the Prefs will read and used correct, new handling for 2 Screens, will not hanging like older versions.
- {d} FIXED Enforce a problem while MCP read prefs from Screensmenu, the "ALLSCREENS" was never read.
- {d} OVERW check Processorflags and the subrotuines for "SSPtoFastram" and "AudioFilter".

MCP V1.39----- (15. May 2002)

- {d} FIXED Make all "FindPort"-Calls now with forbid multitasking, this should remove some crazy Enforcerhits by using ReqAttack or Diropus and hopeful Snoopdos singlestep running again.
 - {d} FIXED Doublestart was not detected.
 - {d} FIXED Commodity can't load the full catalog, so some strings still in english, removed.
 - {d} FIXED HDPrefs Formatprotection sometimes will loose the Devicename
 - {d} FIXED Hotkey-Bug: NUMPAD-Keys and Repeat now works fine for first time. Some other Keys maybe also now works again.
 - {d} FIXED WBClock now refresh every second again
 - {d} IMPRO WBClock do not open the standard-Font every second, if there no Font selected on startup from WBClock.
 - {d} FIXED find out a Bug: MCP doesn't register the correct FPUtype, this may solve some problems.
-

- {d} OVERW change a little Code to save some Bytes (about 200)
- {d} ADDED AppIcon, WBTitle and Titleclock now use same Renderrotuine, so all variables from wbclock and WBTitle can used for all.
- {d} FIXED Enforcerhit with %aw and %AW by no active window
- {d} ADDED MCP-Versionsname will shown for Exchange
- {d} FIXED remove a little Bug, which destroy execute-command when hotkey-definition if this are not very short
- {d} OVERW workaround for the ReqAttack-probs
- {d} OVERW workaround for the Bug with some P96-Systems, now it should be stable, and remove some Enforcerhits.
- {d} ADDED New Variable: %mv
- {d} IMPRO new Routine for %cp, added %CP for full FPU-name
- {d} ADDED New Feature "AppIcon"

MCP V1.38----- (20 Mar. 2002)

- {d} FIXED HDPrefs now works completely
- {d} ADDED new Variable for WB-Title: %pd shows the number of patched Devices ↔ from HDPrefs
- {d} FIXED Mainbug in Patternmatching, 2 Bugs would run only together sometimes ↔ .
- {d} FIXED Reqtoolspatch and Assignwedge should not have any problem with ↔ ReqAttack anymore
- {d} FIXED 2 HDPrefs-Bug, now it will not destroy all other Configs. (but is still deselected by MCP in moment).
- {d} OVERW change the ReqAttack-Autodetection, now only one Subroutine
- {d} REWRI CLI-Parameter-reading, now more compatible and shorter
- {d} ADDED more new Variables for WB-Title: %aw and %AW shows the Active-Window Title (long and short), %mx and %my shows the Mouseposition, it maybe to ↔ slowly to use with sence.
- {d} FIXED Hopeful to remove a Bug for Powersaver in AGA-Mode, now should ↔ restart Monitor

- {d} FIXED Find and Remove the Bug in Assignprefs/AutoMount
- {d} ADDED new Variables for WB-Title: %lg, %Lg and %LG for greatest free ←
Memblock in
Grafikmem and: %OS, %KS, %OV, %KV, %tg, %Tg, %TG, %pg and %PG
- {d} FIXED remove a Bug in WBTitle: %fr, %FR, %Fr now gives correct Values !
- {d} REWRI the WBTitle-subroutine for Variables completly incl. OS-detection

MCP V1.37----- (01 Feb.-2002)

- {d} FIXED Reqtoolspatch and Assignwedge should not have any problem with ←
ReqAttack
anymore
- {d} ADDED PPC and his Type will be recognized by MCP with WarpUp, for further ←
use
- {d} REWRI WBTitle-Processorvariable-Routine completly, quicker and many ←
shorter
- {d} OVERW Powersaver- and Dimmeroutine: starting and stopping
- {d} FIXED Powersaver all routines in AGA wouldn't start the Monitor again
- {d} ADDED 2 new Variables for WBtitle: %Pr and %PR, see Guide or MCPPrefs
- {d} ADDED HDPrefs with all his functions (and Problems) will be back
- {d} ADDED WBTitle: P96 support for %fr, %Fr and %FR (shows free Graphics-Ram)
- {d} FIXED SNAP wouldn't run one some Systems correct
- {d} FIXED MCP will running out of Stack very slowly under some configs

MCP V1.36----- (28Dec.-2001)

- {d} FIXED "Screensmenu" with 2 Screens now works correct.
- {d} OVERW New function "NotStarting" with Leftmousebutton, Firebutton or ←
Capslock
now is faster, and only on start from CLI active.
- {d} ADDED MCP has now a Parameter: "NOLMB" ignore "NotStarting"-Option
- {d} OVERW some Routines, should be more stable and faster ?
- {d} FIXED Screenblanker was corrupt since V 1.34

- {d} FIXED Processor-Function "VBR to Fastmemory" freeze or reset the Amiga
- {d} FIXED "VBR to Fastmemory" would sometimes have no effect
- {d} ADDED activate on Workbenchtitle will work now with DOPUS Magellan
- {d} OVERW the titleclock now will be faster and more compatible
- {d} OVERW many Routines, now faster and shorter Code
- {d} FIXED some Routines will be deselected on Kickstart-Version instead OS- ↔
Version
- {d} ADDED If ReqAttack is active, MCP-ReqToolsPatch sets ARQ-Mode to ON
- {d} ADDED "MapUmlauts" now maps EURO, too. (on sign 128 and 164=Alt-z or Alt- ↔
y)
change a little code, now is shorter and can be improved for other ↔
signs
- {d} ADDED Toolsalias now works with all Icons and Deficons (added ↔
GetDiskObjectNew
for some >=2.0 and GetIconTagList for all >=3.5 Functions)
- {d} OVERW WBAbout will never more installed on OS 3.5 or higher
- {d} OVERW Unavailable features will now full ignored (e.g. Quickdraw or ↔
HDPrefs)
- {d} ADDED Quicklayers, i can't test it, but should work !
- {d} FIXED ARQ-Mode will not longer ignored from some Functions

MCP V1.35----- (19-Nov.-2001)

- {d} OVERW CopyMemQuickPatch a little faster and remove an Error
(1 Byte sometimes not copied)
- {d} FIXED MCP hangs when using Screenmenu with only 2 Screens
- {d} FIXED ReqToolspatch sometimes hangs with reqtools.library 39.2,
now MCP will read ReqToolsVersion and make wrong Tag to work.
(a new reqtools.library is in this packet, thanks to Georg Steger, ↔
the
author of reqtools.library for debugging)
- {d} ADDED CAPSLOCK On, press LeftMouseButton or Firebutton by starting MCP ↔
will not
start MCP, so you can temporary start the Amiga when an ↔
Configuration
e.g. because MCPErrors don't work with your Amiga.

- {d} FIXED Packerpatch (Crunchpatch) should now work again !
- {d} FIXED some Errors in Subroutines, would have Effect on all Functions and Patches ←

MCP V1.34 ----- (30-Oct-2001)

(20-oct-01)

- {d} ADDED OS 3.5 and 3.9 in variabels os and ks (not really used for ks)
- {d} ADDED now MCP would try to use C:Env-Handler first and then L:happyenv-handler as second if ENV: is not mounted
- {d} ADDED Version (full) now shows Processor and Commodity
- {d} ADDED 68020+ Version of the MCP-Commodity

MCP V1.32b12 -----

(10-Jul-98)

- {m} FIXED MemoryPatch didn't work with the "Include" option.
>> Sergio Martín <<

(05-Jul-98)

- {m} IMPRO look of the MWB frame style for NewGadTools.
>> Mario Cattaneo <<
- {m} IMPRO Joystick check now works with every device on Joystick port.
- {m} FIXED Joystick check didn't works correctly.
>> Mario Cattaneo <<

(03-Jul-98)

- {m} FIXED another bug in InsertClipboard with the '{', ''}' chars.

(26-Jun-98)

- {m} FIXED timer hotkeys didn't work after disable and enable MCP.
>> Steve Clack <<

(24-Jun-98)

- {m} FIXED ARexx scripts for Blanker and Powersaver were called multiple times.
>> Mario Cattaneo <<
- {m} FIXED AppChange didn't work.
>> Trevor Morris <<

MCP V1.32b11 -----

(21-Jun-98)

- {m} FIXED wrong character in the 'Okay' string of WBAbout.
>> Steve Clack <<

(20-Jun-98)

- {m} FIXED InsertClipboard didn't insert '{', '' and some other characters.
- {m} FIXED Options %nl, %np, %nd from ChangeWBTitle didn't work.
>> Michael Kilimann <<

(19-Jun-98)

- {m} IMPRO WindowToFront hotkey now activates the window.
>> Andreas Frank <<

MCP V1.32b10 -----

(18-Jun-98)

- {m} FIXED a qualifier bug in KeyBlanker.
>> Mario Cattaneo <<
- {m} FIXED ScreenActivation now works correctly with PowerWindows.
>> Luca Longone <<

(13-Jun-98)

- {m} FIXED now MCP CopyMemQuick function is disabled for chipmem.
>> Steve Clack <<

(12-Jun-98)

- {m} FIXED pointer wasn't refreshed after a dimmed screen.
>> Jens Rosenboom <<

(05-Jun-98)

- {m} FIXED not freed memory in all WaitValidate routines.
- {m} ADDED a lot of Forbid/Permit calls.

MCP V1.32b9 -----

(03-Jun.-98)

- {m} FIXED all timer values wasn't set correctly.
- {m} ADDED some security checks in the ScreensMenu function.
>> Hans Ponsen <<

(02-Jun.-98)

- {m} REMOVE It's not necessary to set an Env variable for the language of MCP.. Sorry for the wrong history entry!

MCP V1.32b8 -----

(31-May-98)

- {m} FIXED bug in MemPatch.
>> Juergen Urbanek <<
- {m} FIXED bug in ScreenActivation code.

(30-May-98)

- {m} FIXED MCP didn't start from WB.
>> Mario Cattaneo <<

MCP V1.32b7 -----

(24-May-98)

- {m} FIXED now SunKey option only activates an other window if the current window has no opened menu and no active string gadget.
>> Rolf Rotvel <<
- {m} FIXED little bug in the MCPFLUSH tooltype option.
>> Alexx Riedel <<
- {m} FIXED a garshne blanker problem.

(23-May-98)

- {m} IMPRO all internal protection routines.

(22-May-98)

- {m} FIXED "ChangeWBTitle" option %wv didn't show the full version.
>> Laurent Papier <<
- {m} ADDED MCPWaitValidateColor tool which changes every 5 seconds the background colour shortly to blue if the system validates a disk.
- {m} IMPRO increased the buffer of the validating disk in all WaitValidate routines while validating a disk. The size of the buffer is set to the half of the largest free memory block.
- {m} IMPRO removed the hotkeys for the NoGuru requester.

(21-May-98)

- {m} IMPRO now all strings in MCP are localised. You have to set an
-

environment variable to set the correct language, because otherwise it doesn't work when MCP is started before IPrefs.

(19-May-98)

- {m} FIXED the transition between the Dimmer and Blanker.
>> Mario Cattaneo <<
- {m} FIXED Pointerblanker didn't work when a qualifier was hold while typing a key.
>> Alessandro Gerelli <<
- {m} FIXED option "off when new window appears" is deactivated internally when a Garshne or a Swaz blanker module is running.
>> Teemu Kärkkäinen <<

(14-May-98)

- {m} FIXED OpaqueSize problem with IDCMP_SizeVerify windows.
>> Sebastian Bauer <<
- {m} ADDED option to enable/disable the opaque sizing for IDCMP_SizeVerify windows.

(09-May-98)

- {m} FIXED dimmer, blanker and powersaver timeout calculation.
- {m} FIXED border disable for DMA Powersaver.
>> Ognjen Nedeljkovic <<

(08-May-98)

- {m} FIXED illegal unlock of intuition base in window activation code.
>> Thanx Stefan Becker for the Enforcer Hits <<

MCP V1.32b6 -----

(05-May-98)

- {m} ADDED HDOff feature. You can find this in conjunction with the format protection in the 'HD Prefs' function.

(01-May-98)

- {m} FIXED wrong argument for CloseCatalog() in two patches.
- {so} FIXED snapping of underline characters and crash with 16, 24bit.
- {m} FIXED filtering of the modeid for the internal screen blanker.
>> Guno Heitman <<

(30-Apr-98)

- {m} ADDED switch to activate or deactivate the joystick check.
-

(29-Apr-98)

- {m} FIXED text placing for NewGadtools buttons.
>> Olivier Fabre <<

(24-Apr-98)

- {m} FIXED a RamlibPatch problem.
>> special thanx to Stephan Rupprecht for the source <<

(22-Apr-98)

- {m} ADDED SegTracker support for MCP NoGuru function.
>> Eric Sauvageau <<
- {m} FIXED order of the NoGuru window gadgets to make "Suspend" if the user pressed 'ESC'.
>> Mario Cattaneo <<

(18-Apr-98)

- {m} ADDED SetQuantum function to change the quantum value in the exeabase.
>> Mathias Karlsson for the idea in his QuantumX program <<

(16-Apr-98)

- {m} IMPRO window activation and some other code.
- {m} IMPRO Dimmer, Blanker and PowerSaver

(13-Apr-98)

- {m} FIXED funny sideeffect with SolidWindow-Moving/Sizing.
In old versions you can press LALT+LCOMMAND+LBUTTON over the window titlebar/sizegadget and after some moving/sizing while holding the keys you can release both keys and the window moves/sizes magically.

MCP V1.32b5 -----

(10-Apr-98)

- {m} IMPRO "insert clip" hotkey. Now MCP makes a delay of 2 ticks on every newline character to allow other programs to process this line.
>> Eric Sauvageau <<

(05-Apr-98)

- {m} ADDED "Block Mouse Movement" hotkey
 - {m} ADDED Refresh option in the ReqToolsPatch.
>> Volker Remuß <<
-

(03-Apr-98)

- {m} FIXED Overscan settings in the ScreenManager didn't work correctly.
 >> Efsthios Persidis <<
- {m} ADDED pattern string for Dimmer
 >> Dies Koper <<

(22-Mar-98)

- {m} ADDED system friendly joystick check to Blanker/Dimmer/PowerSaver.
 The routine checks the movement of a joystick in the
 joystick-port only every 1 second.
- {m} FIXED look of NewGadTools arrows in original size.

(21-Mar-98)

- {m} FIXED problem when a window opens and the PointerBlanker was
 activated.

(18-Mar-98)

- {m} REMOV routine to increase the stacksize of the ramlib to an
 external program. Please run the MCPRamlibPatch in the
 first line of your startup-sequence.

(17-Mar-98)

- {m} FIXED %ev option from the ChangeWBTitle function doesn't free the
 memory.
 >> Mario Cattaneo <<
- {m} ADDED changable bordersize in which are Blanker/Dimmer/Powersaver
 disabled.
 >> Werner Mueller <<

MCP V1.32b4 -----

(17-Mar-98)

- {m} FIXED ReqTools didn't read the default path.

(15-Mar-98)

- {m} IMPRO look of the NewGadTools arrows. Cybergraphics has a bug in
 the line routine which misshapens the look of the arrows.
 - {m} ADDED configurable color of the font in the selected state of
 the Cycle2Menu popup menu and the NewGadTools buttons and
 cycle gadgets.
 >> Mario Cattaneo <<
 - {m} ADDED an option for the PointerBlanker that the pointer appears
 when a window opens.
 >> David Gerber <<
-

MCP V1.32b3 -----

(08-Mar-98)

- {m} ADDED patch for OpenFromLock() to make the CrunchPatch function working with the V45 datatypes.
>> Eric Sauvageau <<

(07-Mar-98)

- {m} FIXED ReqToolsPatch slider position when reopening the requester.

(06-Mar-98)

- {m} IMPRO look of the NewGadTools arrows.
>> Mario Cattaneo <<
- {m} FIXED ActivateOnWBTitle with DOpus5.
>> Allan Odgaard <<

(28-Feb-98)

- {m} FIXED MultiSelect mode in ReqTools patch. Term ignores the filelist and reads the name of the file from the string gadget if only one file is selected.
>> Mario Höhne <<
- {m} FIXED changed the HTTP string to HTML for MapUmlauts.
>> Mario Cattaneo <<

MCP V1.32b2 -----

(22-Feb-98)

- {m} ADDED a new variable for the ChangeWBTitle function which shows the contents of a ENV-Variable.
>> Mario Cattaneo <<
- {m} ADDED new hotkey which allows to enable and disable both types of the MapUmlauts feature.
>> Mario Cattaneo <<
- {m} FIXED an other little design error in the SysIHack gadgets

(21-Feb-98)

- {m} FIXED bug in ActivateOnWbTitle for DOpus5 screens.
>> Allan Odgaard <<

(19-Feb-98)

- {m} FIXED DMA Powersaver didn't unblank.
>> Gero Busse <<
-

(18-Feb-98)

- {m} FIXED a little design error in the SysIHack gadgets
- {m} FIXED some Blanker/Dimmer/PowerSaver problems

(15-Feb-98)

- {m} FIXED the complete output of MapUmlauts was uppercase when SHIFT key was pressed.
>> Mario Cattaneo <<

(08-Feb-98)

- {m} FIXED ActivateWindow hotkey didn't work correctly.
>> Troy Davis <<
- {m} ADDED MapUmlauts feature to create http chars.
>> Mario Cattaneo <<

(07-Feb-98)

- {m} FIXED Dimmer is now disabled on hicolor/truecolor screens.
- {m} FIXED some little bugs in the blanker code
- {m} IMPRO internal blanker
- {m} ADDED feature to disable Blanker, Dimmer or Powersaver if the mouse is in the border of the screen.

(06-Feb-98)

- {m} FIXED bug when no gurudat/history files specified in the config.
>> Rolf Rotvel <<

(01-Feb-98)

- {m} FIXED possible enforcer hit in the "Activate on WBTitle" function.
>> Ian Kumlien <<

(25-Jan-98)

- {m} ADDED option to start an ARexx script when a Blanker or the DPMS appears or disappears. The 'rx' command should be in the current path.
>> Francis Labrie <<

(11-Jan-98)

- {m} FIXED some ReqtoolsPatch problems.
 - {m} ADDED "Start WB-Program" hotkey which allows to start programs using the wbstart.library.
It's not possible to deliver arguments and the pathes are not checked.
-

- {m} FIXED bug in ReqtoolsPatch. Forgot to copy the initial drawer string.
>> thanx to Hakan Parting for the test program <<

(10-Jan-98)

- {m} FIXED little bug in window activation.
- {m} ADDED hotkey to close the window under the mousepointer. Unfortunately there's no window activated after closing.
>> Bodo Schulz <<
- {m} ADDED DOpus screen will be activated with the "Activate on window title", too.
>> Allan Odgaard <<

(05-Jan-98)

- {m} FIXED Click2Front and Click2Back didn't work with GZZ-Windows.
>> special thanx to Allan Odgaard <<

(04-Jan-98)

- {m} FIXED PatchMath only needed with Kick3.1.
>> Stephan Rupprecht <<
- {m} FIXED locked pubscreen with the %wp option in the ChangeWBTitle function.
>> Luca Longone <<
- {m} FIXED the SystemRestore hotkey to set the sprite resolution correct.
>> Luca Longone <<

(03-Jan-98)

- {m} FIXED requester from ToggleMemPatch hotkey shows always off, if MemPatch isn't switched on.

(13-Dec-97)

- {m} FIXED little bug in the AlertHistory (because of the new guru address writing routine)
>> Ian Kumlien and Peter Schulz <<
- {m} FIXED problem when creating the CacheFonts list.
>> Peter Schulz <<
- {m} FIXED possible Enforcer-Hit in the Snap code.
>> Sebastian Becker <<

(12-Dec-97)

- {m} ADDED a note to the information file which contents the correct parameters for PatchControl to make the APPChange function available in DOpus5.
>> Thanx to Varotto Riccardo and Neil Bothwick <<
-

(08-Dec-97)

- {m} FIXED forgot to check for the MMU in the new guru address reading routine.

(07-Dec-97)

- {m} FIXED made all version strings style guide conformal.
>> Frederic Steinfeld <<
- {m} FIXED WorkbenchTitle changing for french users. The title string is normally located in the Kickstart ROM, but the french string is different :(
>> P.B. Ninjaw <<
- {m} FIXED possible Enforcer-Hit in the Alert-Remove code.
>> Antti Siipola <<
- {m} FIXED possible Enforcer-Hit in the System-Restore-Hotkey function.
>> Christian Uceda Fernandez <<

(30-Nov-97)

- {s} FIXED all ReqTimeout problems.
>> Stingray <<
- {m} IMPRO reading the guru addresses. No Enforcer/Cyberguard-Hits from \$100 or \$104 anymore.

(29-Nov-97)

- {m} FIXED CacheFont bug. Forgot to uncomment some lines.

(23-Nov-97)

- {m} FIXED bug in ScreenManager. Execution stops if Autoscroll or CenterScreens found.
>> Torsten Bach <<

(22-Nov-97)

- {m} FIXED ReqtoolsPatch bug which caused a crash if long dirnames used.
>> Special thanx to Luca Longone <<

(21-Nov-97)

- {m} FIXED ScreenManager didn't handle more than one THEN assignments correct.
>> Mario Höhne <<

(02-Nov-97)

- {m} FIXED CacheFont problem if a program changes FONTS: assign. Now it works correctly with PPaint. It's needed to create a new fontlist in the Prefsprogram!!!
-

>> Neil Corbett <<

(01-Nov-97)

- {m} FIXED not freed Boopsi image for SysIHack sizedgadget
>> Allan Odgaard <<

(28-Oct-97)

- {m} FIXED reading of wrong hotkey entries in the config file
>> Marko Seppänen <<
- {m} FIXED version information in all files, to make it style guide compatible.
>> Frederic Steinfeld <<

(10-Oct-97)

- {m} FIXED hotkey 'RestoreSystem' now works correctly
>> Vlad Komkov <<
- {m} FIXED bug in %wp option of the ChangeWBTitle function.

(09-Oct-97)

- {m} IMPRO relayouted all SysIHack gadgets.. It looks especially with the 18, 16 values very good.
>> Thanks Mario Cattaneo for the great work <<
- {m} FIXED all PatchWork hits.
>> Ian Kumlien <<

(07-Oct-97)

- {m} FIXED Workbench screen was locked with the %wp option for the 'ChangeWBTitle' function.
>> Christian Uceda Fernandez <<

(04-Oct-97)

- {m} FIXED PubModes function always enabled Shanghai and Poppub.
>> Mario Cattaneo <<

(03-Oct-97)

- {m} ADDED feature to quit Dimmer, Blanker or Powersaver if a new window is opened
- {m} FIXED little problem while increasing the stack from the ramlib

(30-Sep-97)

- {m} FIXED crash if MCP restarts with the SysIHack-NewPropGadget function
>> Jens Granseuer <<
 - {m} FIXED 68020 command in the WBGauge function of the 68000 version
-

>> Jens Granseuer <<

(21-Sep-97)

- {m} IMPRO Rearrange gadgets feature in the SysIHack function.
- {m} ADDED increased stack for ramlib task.. This handler will be installed from the operating system to do some internal operations.
- {m} FIXED width of the Sizegadget must be 18 or higher!
>> Vesa Halttunen <<

MCP V1.32 ----- (22-Nov-96)

- Pattern for SolidWindowMoving and SolidWindowSizing didn't work
- Automount didn't work silent

changes from Alpha 36 to Alpha 37:

- hopefully fixed the problem with the not working hotkeys

changes from Alpha 35 to Alpha 36:

- removed FastGary and SpeedRamsey, because they made problems on some machines. Please use an other tool if you need one of these patches
- removed some debug output from MCP Alpha35
(There was some output to the serial port !!!)

changes from Alpha 34 to Alpha 35:

- fixed the dispose option of the Hotkey definitions
- disabled WBGauge on OS3.5

changes from Alpha 33 to Alpha 34:

- fixed a bug in the timer routines
 - added "Maximize Active Window" hotkey
 - added an "Assign+Prefs" entry to the AssignWedge dialog.
(please set the MCPPrefs path to the Shell search path before starting MCP)
 - fixed some other little bugs
-

changes from Alpha 32 to Alpha 33:

- fixed startup problem if MountENV is made from MCP
- fixed PowerSaver problems with Amiga screens
- fixed a typing error in Alpha32 which trashes the CycleToMenu function
- fixed NUMPAD hotkeys didn't work

changes from Alpha 31 to Alpha 32:

- fixed a PowerSaver problem with Amiga screens
- WBTitleActivate should be working with DOpus

changes from Alpha 30 to Alpha 31:

- fixed the restart problem. FileSystem and Ram-Handler doesn't set the length of a message which is (I think) a bug.
- fixed the problem with Arexx scripts in Blanker, Dimmer, Powersaver
- fixed randomly activated windows if a "private" PublicScreen comes up
- fixed VBRTToFastRam problems

changes from Alpha 29 to Alpha 30:

- added QuickLayers
- added QuickDraw
- added NoIconBorder
- added HDPrefs (only Formatprotection available)
PLEASE REBOOT AFTER CHANGING THE SETTINGS FOR THIS !!!
- added a workaround in the AppIcon Patch

changes from Alpha 28 to Alpha 29:

- bug in the restart code not fixed :(
new MCPNotifyTest available. Please test and mail Sushi output
- better DefaultPubScreen routine. Because MCP was too fast and some screens come up as private Public-Screens I have made a delay of 2 seconds for private screens to check again.

changes from Alpha 27 to Alpha 28:

- fixed a bug in the new restart code

changes from Alpha 26 to Alpha 27:

- hopefully fixed the restart problems

changes from Alpha 25 to Alpha 26:

- removed SwapJoyMousePort function
- removed InsertDate hotkey (until it is working)
- Blanker, Dimmer, PowerSaver, Pointerblanker now working everytime. (in earlier versions they were disabled forever after a temporary disabling if the mouse was on a screen border, or something else.)
- some options from PowerSaver now correctly loaded in the MCPPrefs program
- default dimm depth for ScreenDimmer hotkey. (The dimm depth must be set in the hotkey options!)
- DMA PowerSaver should work now
- CenterScreen from ScreenManager now centers correctly
- later attaching of the MCP task to do AssignPrefs and all other start functions before the MCP comes back to the Shell

PLEASE START MCPPREFS PRESS SAVE TO FIX YOUR OLD CONFIG !!!!

MCP V1.30 -----

(16-Sep-97)

- {m} ADDED note how the ChangeWorkbenchTitle should work with DOpus5.
>> Thanks to Michal Kozusznik <<

(05-Sep-97)

- {m} ADDED the new WWW-addresses to the guide.
Special thanks to Mario Cattaneo which makes it possible!

(04-Sep-97)

- {m} ADDED note for NSDPatch users to the guide. Formatprotection doesn't work without some changes.
>> Thomas Klein <<
 - {m} FIXED small underscores feature
>> Mario Cattaneo <<
 - {m} FIXED SysIHack bug.. The screen gadget colors were not correct.
-

>> Sebastian Becker und Edward Niedziejko <<

(31-Aug-97)

- {s} FIXED SysIHack problem. (solid window moving works now over WB-Palette-Prefs)
>> Alexander Kneer <<
- {m} FIXED ScreensMenu to work with PowerWindows.

(12-Aug-97)

- {m} FIXED little bug in 'Execute Command'.
>> Ian Kumlien <<

(10-Aug-97)

- {m} FIXED bug in SysIHack when deactivating MCP
>> Mario Cattaneo <<

(27-Jul-97)

- {m} ADDED option for small underscores in the NewGadtools function
>> Thanks to Mario Cattaneo for the 25DM phone call :) <<
- {m} ADDED Center Screen function to the ScreenManager.

(26-Jul-97)

- {m} OVERW ShapeShifter LockTask function.

(22-Jul-97)

- {m} ADDED Rearrange function to SysIHack. Now MCP change the position of every gadget in the right border. This fixes problems with the greater Sizegadget. It works not with every program, because some of them adds the arrows or the slider after opening the window.

(20-Jul-97)

- {m} REMOV CloseScreenPatch

(24-Jun-97)

- {m} FIXED support of filterfunc in a ASL-Filerequester
>> Thanks to Markus Hillenbrand for the demos <<

(21-Jun-97)

- {m} ADDED a little function to make the mousepointer visible in the gap between two Amiga screens. This function will be installed automatically.
>> Thanks Alexander Kühn for the source <<

(15-Jun-97)

- {m} IMPRO looking of SysIHack arrows.
>> Alexander Limi <<

(14-Jun-97)

- {m} FIXED NewGadtools didn't care about the Fontstyle
>> Davide Bigazzi, Allan Odgaard <<
>> Thanks for the Demo from Jarda Pokorny <<
- {m} FIXED wrong save place function of LockPatch and WBAbout
>> Remigiusz Kierunczyk <<
- {ms} REWRI SysIHack

(12-Jun-97)

- {m} FIXED forgot to unlock the Pubscreen in FreeWBPens (%wp) of
ChangeWBTitle
- {m} FIXED little bug in centering code of NewGadTools

(07-Jun-97)

- {m} ADDED CloseScreen Patch
>> source from Jens Troeger <<

(06-Jun-97)

- {m} FIXED Enforcer-Hit, because Cygnus-Ed stores illegal data in the
NewWindow-Extension field.
>> Eric Sauvageau <<

(05-Jun-97)

- {m} FIXED minimum values for sizedgadgets
>> Jens Troeger <<
- {m} FIXED Enforcer-Hit with Term
>> Torsten Bach <<

(03-Jun-97)

- {m} FIXED name THEN condition to THEN assignments.
>> Mario Cattaneo <<

(01-Jun-97)

- {ms} ADDED changing of Sizedgadget width and height and sizing of all
window borders.

(31-May-97)

- {m} FIXED memory leak in SysIHack
>> Christian Birchinger <<
- {m} REMOV NoFrag, because it doesn't work with DynamiCache and IBrowse.
It's no failure of NoFrag, because it only sets the

MEMF_Reverse flag in the AllocMemory() call.

(30-May-97)

- {m} FIXED little bug new in the TitleClock
>> Christian Birchinger <<

(29-May-97)

- {m} FIXED Enforcer-Hit in InsertClip
>> Arndt van der Molen <<
- {m} REWRI pattern matching in the TitleClock. Now it's faster.

(28-May-97)

- {m} FIXED zero check in HiresPointer code

(27-May-97)

- {m} FIXED NewGadtools centering problem. AB-Tools was trashed.
>> Allan Odgaard <<

(25-May-97)

- {m} ADDED MapUmlauts hotkey

(18-May-97)

- {m} FIXED memory leak in SysIHack
- {s} FIXED bad colors after reopening Workbench
- {m} REMOV for the time the drag and drop option in the IF and THEN
condition lists of the ScreenManager.
>> Theodoropoulos Kostas <<

(15-May-97)

- {m} FIXED QuickLayers check. Could crash..

(13-May-97)

- {m} IMPRO QuickLayers now checks if CGFX/Superlayers function
activated.

(08-May-97)

- {m} ADDED FreeWBPens option to ChangeWBTitle function. It shows the
free pens.

(24-Apr-97)

- {m} FIXED Enforcer-Hits with NoIconBorder and Merlin-Probench
Emulation.
>> Michael Kilimann <<
-

- {m} FIXED 68020+ code in 68000 version used.

(21-Apr-97)

- {m} FIXED Assignwedge could not be disabled
- {m} OVERW NewGadtools to improve centering of the gadget text
>> Mario Cattaneo <<
- {m} FIXED NewGadtools to show bold gadget texts
>> Davide Bigazzi <<

(20-Apr-97)

- {m} FIXED Automount problem

(19-Apr-97)

- {s} FIXED Microdot slider problem.
- {s} FIXED size problem for Reqtools requesters after restart.
- {m} ADDED graphic system which should make the Powersave is now selectable.

(17-Apr-97)

- {m} ADDED new function for the ScreenManager. Now it's possible, that the new screen gets the display mode from the first visible screen. This is very good to promote blanker screens.
>> Mario Cattaneo << (14-Apr-97)
- {m} FIXED wrong check of Automount devices

(12-Apr-97)

- {s} FIXED ScreenManager bug
- {s} FIXED ReqtoolsPatch bug

(11-Apr-97)

- {m} FIXED ARPLibrary patch. Works now with TxEd !
>> Jan-willem van Eys <<
- {m} FIXED MCP installed two patches even though no function was activated

(10-Apr-97)

- {s} FIXED wrong background colors with MCP-NoIconBorder patch

(08-Apr-97)

- {m} FIXED some little bugs in ToolAlias

(06-Apr-97)

-
- {s} FIXED Libsearch crash
(04-Apr-97)
 - {o} FIXED some Snap bugs
(01-Apr-97)
 - {m} FIXED Enforcer-Hit in the new ScreenPromotor.
>> Ariel Magnum <<
(23-Mar-97)
 - {m} FIXED centering bug in NewGadTools (AB-Tools graphic was trashed)
>> Peter Schulz <<
(17-Mar-97)
 - {o} IMPRO Snap now always works on 16/24 bit screens. Now it's a little
problem with some colors in the background, but this will be
fixed in the next time.
(15-Mar-97)
 - {m} FIXED Reqtools-Patch. To much removed from the program to kill
the OneReq function.
(13-Mar-97)
 - {m} REMOV CenterScreens function. This function will be included in
the new ScreenManager.
 - {m} REMOV OneReq function, because the _asl.library has a stack
problem and this can't be changed from MCP.
TitleClock window from the MCP-Prefs program crashed.
(09-Mar-97)
 - {m} FIXED stackproblem with Swazblanker modules
(08-Mar-97)
 - {m} FIXED placement of the underscore
(03-Mar-97)
 - {m} ADDED LockPens feature to ScreenManager
 - {s} ADDED Enter ASCII feature
>> Mario 'padrino' Cattaneo <<
 - {s} FIXED bug in the 'Show Interface' function which runs the
Prefsprogram.
>> Mario 'padrino' Cattaneo <<
(01-Mar-97)
-

- {m} IMPRO drawing of the gadget text
>> Mario 'padrino' Cattaneo <<

- {m} ADDED feature to increase the distance to the underscore
>> Mario 'padrino' Cattaneo <<

(25-Feb-97)

- {m} FIXED textlength in gadgets. Added a point to the end of the word.
>> Mario 'padrino' Cattaneo <<

- {m} FIXED look of the cycle gadget (same look as MUI)
>> Mario 'padrino' Cattaneo <<

(21-Feb-97)

- {m} FIXED possible crash if a program tries to open a window and no
screen is available.
>> Alexander Leidinger <<

- {s} FIXED bug in CacheFont

(15-Feb-97)

- {m} FIXED WBGauge now works with Scalos.

(02-Feb-97)

- {m} IMPRO CycleToMenu. Now MCP installs only 2 patches on kick3.x and
4 patches on kick2.x !! Additionally it works with the
Picasso96Mode program from the Picasso96 software.
Because of these changes the cyclegadget can flicker a little
bit if you select a menu entry.
>> Thanks for the Source from T.Abt and A.Kneer <<

(16-Jan-97)

- {m} FIXED calculating the position of the popup menu
>> Harry Sintonen <<

- {m} ADDED new guru numbers to MCP.gurudat
>> Harry Sintonen <<

(02-Jan-97)

- {m} FIXED bug in ReqTimeOut. The Patternmatching routine from the
operating system gives the false return value if the string
contains a pipe '|'.
>> Harry Sintonen <<

(22-Dec-96)

- {s} ADDED Screenmanager and removed the old Promotor

(18-Dec-96)

- {m} FIXED little bug in ReqToolsPatch
>> Ralph Wermke <<

(16-Dec-96)

- {m} ADDED NoFrag feature

(10-Dec-96)

- {o} ADDED Snap feature

(29-Nov-96)

- {m} FIXED little bug in the Reqtimeout. If a task makes a requester then the MatchPattern() call doesn't work and MCP has timed out the requester. Now all requesters which are made from a task will not be timed out.
>> Harry Sintonen <<

MCP V1.22 ----- (22-Nov-96)

(22-Nov-96)

- {m} IMPRO now MCP refreshes the window if a WBGauge was removed.
- {m} FIXED MCPs version string.
>> Claus Dilly <<

(12-Nov-96)

- {m} FIXED possible crash if a program calls OpenWindowTagList() with no taglist. The editor Textra crashes sometimes.
>> Chris Kerr <<

(08-Nov-96)

- {m} FIXED crash if the prefsprogram called multiply via ShowInterface
- {m} ADDED option to allow all Public-Screens for the Titleclock
>> Martin Steigerwald <<

(05-Nov-96)

- {m} FIXED possible crash if the device and unit from the SCSI-Eject command not given.

(04-Nov-96)

- {m} FIXED Reqtimeout doesn't work sometimes. Hopefully the last bug.

(27-Oct-96)

- {m} FIXED SysIhack which doesn't change the MUI and KingCON gadgets on Kick2.x.
- {s} FIXED Hotkeys on Kick2.x.

- {s} FIXED crash of NewGadTools on Kick2.x. Now the Number and Text gadgets will not be made on kick2.x.

(26-Oct-96)

- {m} FIXED on Kick2.0 the mouse hotkeys doesn't work. The commodities library doesn't support the needed commands and hopefully it works a little bit better with this workaround.

(25-Oct-96)

- {m} FIXED WBGauge doesn't work without NewGadtools
- {m} FIXED on Kick2.x WBGauge could appear several times on the same window
- {m} FIXED NewEdit crashed on Kick2.x

(24-Oct-96)

- {m} REMOV SaveGIRPort function, because the new MagicMenu have included this.

(20-Oct-96)

- {m} ADDED Hotkey to load and eject the SCSI-Media (CDROM, SyQuest)

(19-Oct-96)

- {m} FIXED Finally removed the bug in ReqTimeout. It was very hard to find, because the bug doesn't appear with the english language.
- {m} FIXED Two 68020 commands in the 68000 version.

(08-Oct-96)

- {m} REWRI MCP now reads the last Gurunumber from the address \$100 on every start (also if you haven't activated 'Noguru' and 'Alert-History'), but now it's not needed to read from this address if MCP restarts when you save the config.
>> Daniel Weiss <<

(22-Sep-96)

- {m} ADDED checking for Happy-ENV handler and mount ENV: if found.
- {m} FIXED calculating of Dragbar-Gadget
>> Daniel Weiss <<

(25-Aug-96)

- {m} ADDED QuickDraw to make the drawing of vertical and horizontal lines a lot faster.
>> Source from Harry Sintonen <<
 - {m} IMPRO System-Restore hotkey now updates the system clock.
-

>> Jarda Pokorny <<

(19-Aug-96)

- {m} FIXED WBAbout eats each time 300 Bytes of memory.
>> Harry Sintonen <<
- {m} FIXED LockPatch problem with some programs.
- {m} ADDED RAMPatch to set the available memory to the size of the Ram-Disk.
>> Source from Harry Sintonen <<

MCP V1.20 ----- (29-Jul-96)

(01-Aug-96)

- {m} FIXED Quickformat-Protection was not off, if the complete Format-Protection was off.

(28-Jul-96)

- {m} ADDED Aminet-version which checks the contents of a requester for the ReqTimeOut-Function, because it's not allowed to upload programs, which can be used to remove Shareware requesters.

(17-Jun-96)

- {m} FIXED StackSwap usage, because of some crashes.

(16-Jun-96)

- {m} ADDED NoQuickFormat option
>> many thanks to Harry Sintonen for the source <<

(14-Jun-96)

- {m} FIXED error in WBGauge fixed

(10-Jun-96)

- {m} FIXED problem with screensmenu

(08-Jun-96)

- {m} FIXED hopefully last bug in Powersaver.

(07-Jun-96)

- {m} FIXED WBGauge doesn't work with some languages.
- {m} FIXED check of processor doesn't work with the tooltypes
>> Kevin Fairhurst <<

(06-Jun-96)

- {m} FIXED now Cycle2Menu doesn't work if a requester is opened on this window.
>> Jens Troeger <<

(05-Jun-96)

- {m} ADDED three new types to show for the workbenchtitle. These types will show FastRam without VMM-Ram.
>> Eka D. Durmin <<

(03-Jun-96)

- {m} IMPRO the patternfield from the TitleClock now compares the pattern with the publicscreen name if the foremost screen is public.

(02-Jun-96)

- {m} FIXED NewEdit paste doesn't work in the middle of a string.
>> Dagfinn Olsen <<

(01-Jun-96)

- {m} FIXED bug in 3D-borders. Now the borders will appear in more windows, too.

(27-May-96)

- {m} ADDED NoIconBorder option to remove the borders from all Workbench icons.
>> Stone-D (Laga M Hale) <<

(26-May-96)

- {m} FIXED some problems of Cycle2Menu with locked windows

(23-May-96)

- {m} FIXED now I have really found out what's wrong with the StackSwap() systemcall. In some programs (MultiFax,..) the last stackword is filled with 'MANX' and the StackSwap() call from the operation system will write an other special word to this address.
Now MCP has it's own StackSwap routine without writing the special word !!

(22-May-96)

- {m} FIXED now the patternmatching bug is finally fixed. Because the patternmatching systemcall needs 1500 bytes stack, we have made a new stack with StackSwap() and this call restores the stack sometimes wrong ;-(

- {m} ADDED Hotkey to toggle the MemPatch-function
>> Volker Remuss <<

(20-May-96)

- {m} FIXED a possible crash if you have some patterns enabled

(11-May-96)

- {m} FIXED SunPopToFront
- {m} FIXED NewProp option now works with a ResetWB

(06-May-96)

- {m} ADDED NewProp option for SysIHack, to give the propgad-gets in the WBWindow a better 3D look

(05-May-96)

- {m} FIXED division by zero error in WBAbout

(02-May-96)

- {m} FIXED a bug in the checking of the enable patterns for the functions.
>> Leo Davidson <<
- {m} ADDED new patches for mathpatch

- {m} FIXED the routine which cuts the path from a task

(28-Apr-96)

- {m} IMPRO with V39 the backfill-hook for the Cycle2Menu will be set to nobackfill, because it's faster.

(27-Apr-96)

- {m} FIXED sometimes MCP produced Enforcer-Hits while restart itself.

(26-Apr-96)

- {m} FIXED problems with underlines in some requesters
>> Michael Kilimann <<

(24-Apr-96)

- {m} FIXED problems with openwindow

(20-Apr-96)

- {m} FIXED hopefully all problems with Cycle2Menu

(18-Apr-96)

- {m} ADDED now the distance between the menu entries in the Cycle2Menu window are configurable.

(14-Apr-96)

- {m} FIXED bug in promotor function (display-id)

(13-Apr-96)

- {m} FIXED The Requtools-Patch make always two gadgets to an Autorequest requester, but also one gadget is allowed.
>> Pablo d'Angelo <<

(12-Apr-96)

- {m} FIXED the gap between the entries in Cycle2Menu is two points smaller now
- {m} FIXED now Cycle2Menu isn't active on disabled gadgets
>> Sven Ottemann <<
- {m} IMPRO now MCP locks the input if Cycle2Menu is active
>> Allan Odgaard <<

(07-Apr-96)

- {m} ADDED now you can cancel the Cycle2Menu with the right mousebutton.

(06-Apr-96)

- {m} FIXED bug with Cycle2Menu in conjunction with Intellifont. Because Intellifont uses a label array which isn't Null-terminated we have made a security check.
- {m} FIXED Cycle2Menu. If the Menu doesn't fit on the screen then the Cycle2Menu doesn't popup.

(05-Apr-96)

- {m} ADDED CycletoMenu Sticky option now allows to use a popup menu or a normal menu at the same time.
>> Michal L. Rybarski <<

(04-Apr-96)

- {s} FIXED solid windowsizing didn't work on MC68000
 - {m} FIXED a bug caused by the system (hard to find ;-)
Now Imploder V4.0 should work with MCP if you have switched on 'Move/Size full windows'.
For programmers: MatchPatternNoCase crashes and we have to convert the string to upper case and use MatchPattern ;-(
-

- {m} IMPRO MCP doesn't add the WBGauge if the window is currently opened, but now refreshes the window if MCP quits and the WBGauge will be removed. Also the window checking is improved now.

(03-Apr-96)

- {s} FIXED WBAbout shows false CPU and FPU on MC68000
- {m} FIXED Autoscroll, Interleaved and FixSize was set randomly in the promotor

(02-Apr-96)

- {m} FIXED all problems with powersaver (I hope ;-)
- {m} FIXED bug in Automount
- {m} FIXED nasty bug in CycletoMenu (should be the last bug)
- {m} FIXED bug in WBAbout

(01-Apr-96)

- {m} IMPRO PatchMath don't need the patchieeesbpatch.library

(29-Mar-96)

- {s} FIXED problems with solid move/size window
- {s} FIXED TitleClock should be safer now
- {s} FIXED crash if a patch couldn't be removed and you press retry
- {s} OVERW whole MCP. Tables are now fully relative. Won nearly 3k.

(28-Mar-96)

- {s} FIXED Patternmatching didn't filters the path right

(22-Mar-96)

- {ms} ADDED CycleToMenu

(21-Mar-96)

- {m} ADDED AlertTimeout

(20-Mar-96)

- {s} OVERW MCP restart is now safer

(18-Mar-96)

- {s} ADDED finally finished work on NewGadtools

(16-Mar-96)

- {m} ADDED PatchMath

- {m} ADDED Enable or disable tasks for the blanker

(13-Mar-96)

- {m} ADDED AutoMount

- {m} ADDED NoBootWrite to the Formatprotection

(12-Mar-96)

- {m} ADDED WBAbout

- {m} FIXED some bugs in ReqToolsPatch and MemPatch.

(09-Mar-96)

- {m} ADDED Hotkeys to start all three parts of the powersaver

- {m} ADDED NoDisplayBeep

- {m} ADDED Trackdisk settings for the 4 floppy drives and included NoClick to this settings

(08-Mar-96)

- {m} FIXED problems if you call MCPPrefs from Exchange

(04-Mar-96)

- {ms} ADDED patch for the ugly Windowtitle gadgets for MUI and KingCON-Iconify

(22-Feb-96)

- {m} ADDED Exclusion and Inclusion of specified tasks or screens for SunMouse, SunPop2Front, TitleClock, MoveWindow and SizeWindow features

(21-Feb-96)

- {m} ADDED MCPASSIGN Tooltype
>> Michael Kilimann <<

(20-Feb-96)

- {m} FIXED FullWindowSizing in one direction

- {m} IMPRO patchsystem and memoryallocation

(04-Feb-96)

- {m} FIXED Powersaver now works correctly with CybergraphX on Amigascreens.

- {m} FIXED MCP now supports new Swazblanker
(not supported are the versions 2.40 and 2.41)

MCP V1.10 ----- (03-Feb-96)

(03-Feb-96)

- {s} FIXED Hotkey Mouserelease problem.

(02-Feb-96)

- {s} FIXED NewEdit problems with CygnusEd.
>> Vesa Halttunen <<
- {s} FIXED NewEdit Copy/Paste will now only work with iffparse
library V39 or higher.
- {s} FIXED PowerSaver for CyberGraphX.
- {s} FIXED SunMouse didn't work. This was a simple type error.
>> Giovanni Addabbo <<
- {s} FIXED MCP lock if the blanker couldn't been loaded.
- {s} FIXED AppChange. Filtering out the path now. Better WB-start check.
- {s} FIXED little path-problems in execute-command.
- {s} OVERW automatic MemPatch disabling on Amiga-screens.

(27-Jan-96)

- {s} FIXED problems with the Shift-Hotkey
>> Bussi <<

(25-Jan-96)

- {s} ADDED path-copy to 'Execute-Command' hotkey

(24-Jan-96)

- {s} REMOV OCS-Powersaver

(22-Jan-96)

- {m} FIXED MCP-ToolTypes now changed back if the program quits and a
new program is loaded
- {m} FIXED problems with the 'RestoreSystem'-Hotkey

(21-Jan-96)

- {s} IMPRO NewEdit. New options:
 - ramiga l - lower cases
 - ramiga shift l - uppercase

- ramiga v - is now paste with insert
- ramiga shift v - paste with clear
- lamiga key - original ramiga key

- {s} FIXED MCP uses now always the usa keymap for hotkey-inits.

(20-Jan-96)

- {s} FIXED ZipWindow hotkey. Now checks for Window-HasZoom.

- {s} FIXED ClickToBack and CycleWindow FrontToBack. Checks now for Window-Depthgadget.

- {v} OVERW mcpsupport.library LoadFile routine. More future compatible now.

(19-Jan-96)

- {m} FIXED Dimmer. Works now fine on Kick 2.x.

(18-Jan-96)

- {s} FIXED PropHack. It works now right with YACDP and OctaMed. This Programs doesn't use the slider real systemconform.

- {s} FIXED PROGDIR: problem in LibSearch.

(15-Jan-96)

- {m} REWRI IRQ Timing routine.

(14-Jan-96)

- {m} ADDED MCP disables the 'MemoryPatch' for the task which opens an AmigaScreen.

(13-Jan-96)

- {s} ADDED FastRom for 68030 and 68851 (not tested).

- {m} ADDED FastRom for 68040/68060.

(12-Jan-96)

- {m} REWRI IRQ-Routine. Now messages instead of signals used.

(10-Jan-96)

- {s} FIXED Hotkey recognition finally.

(09-Jan-96)

- {s} FIXED PointerBlanker.

(08-Jan-96)

- {s} FIXED ReqTimeOut. It doesn't know the default-title right.
- {s} FIXED Enforcerhit in AssignWedge.
- {s} FIXED OpenWindow patch. It works now fine with Ceds JumpLine.
- {s} FIXED bad bug in 68000 version.

(07-Jan-96)

- {v} OVERW Lib and Font search.

(06-Jan-96)

- {s} FIXED Diskinsert, Diskremove and Timer Hotkeys doesn't work with "Execute command" (05-Jan-96)
- {m} FIXED Power Saver.

(04-Jan-96)

- {s} FIXED problems with pointerblanker and 16 color pointer.
>> Ramses << (03-Jan-95)
- {s} ADDED Copy (RAMIGA c) to Clipboard and Paste (RAMIGA v) to NewEdit.
- {m} FIXED Hotkeys will be disabled if a menu is opened.
>> Frank Toepper <<

(02-Jan-96)

- {s} REWRI Startup code. MCP could now better removed if Executive is installed.

(01-Jan-96)

- {s} ADDED Audio-filter in Processor Page.
- {s} FIXED little problems with new hotkeys.

(30-Dec-95)

- {m} ADDED 'MCPFLUSH' and 'MCPNOCACHES' ToolTypes

(29-Dec-95)

- {m} FIXED 'ToolTypes' now only switches the specified cache off and doesn't switch all other caches on.
 - {m} ADDED all new 68060-Cache Tooltypes.
 - {m} ADDED full 68060 Processor support (BranchCache, SuperScalar, StoreBuffer, HalfInstrCache, HalfDataCache, WriteAllocate and DisableFPU)
-

(28-Dec-95)

- {m} ADDED Powermanagement. MCP supports all 3 parts of the DPMS and it's possible to give every part a specified time.
- {m} ADDED Garshneblanker now returns to a black screen if no time is left.
- {m} FIXED MoveWindow and Sizewindow will check every time if the window is currently active.
>> Ralph Wermke, Frank Toepper <<

(23-Dec-95)

- {m} OVERW Dimmerroutine. Now the Dimmdepth must be given in percent and the Dimmer doesn't dimm HAM-Screens.

(20-Dec-95)

- {s} FIXED CenterScreens.

(15-Dec-95)

- {s} REWRI Hotkey detection routine.

(12-Dec-95)

- {s} FIXED Force NewLook menus.
- {s} FIXED little GFX error in left and right arrow of SysIHack.

(11-Dec-95)

- {s} FIXED SysIHack works now on Kickstart 2.x.
- {s} FIXED CapsShift. It works now correctly.
- {s} FIXED Hold X and Hold Y exchanged.

(10-Dec-95)

- {s} FIXED Processor-Option. Prefs-reading didn't work right. All options are now only setable except VBR to Fast. FastGary is now compatible to the 68040.

(09-Dec-95)

- {s} OVERW checking of AssignWedge. Works now with YourFault. No more need of locale.library.

(08-Dec-95)

- {s} FIXED bad bug on OpenWindowTags patch. It causes a crash on 68000 and NewLookMenus was always on.

(03-Dec-95)

- {m} FIXED Randomroutine for Blanker
-

(29-Nov-95)

- {s} FIXED 'ZipWindow' hotkey. Works now with WB-Prefsprograms.

(28-Nov-95)

- {s} ADDED MCPNOMEMPATCH tooltip.

(27-Nov-95)

- {s} FIXED 'Quicklayers'. It works now fine with the DOpus viewer :)

(26-Nov-95)

- {s} FIXED usage of "" Hotkey.
- {s} ADDED "SHIFT" and "ALT" hotkeys.

(25-Nov-95)

- {s} ADDED 'SysIHack'

(24-Nov-95)

- {m} OVERW Checkroutine for 'Full Windowmoving' and 'Full Windowsizing' safer now.

(23-Nov-95)

- {s} ADDED 'FrameIHack'
- {s} ADDED 'BorderBlank' for Kickstart 2.x.

(21-Nov-95)

- {s} FIXED bug in 'CycleScreens Back2Front' hotkey if only one screen was open.

(19-Nov-95)

- {s} FIXED Enforcer-hits and crash on 68000 in 'PropHack' in combination with gtlayout.library.

(18-Nov-95)

- {s} FIXED bug in 'System Restore' hotkey.
- {s} ADDED MCPPAL tooltip.

(17-Nov-95)

- {s} FIXED systemcrash in 'Cold Reset' hotkey on MC68030.

(16-Nov-95)

- {s} FIXED problems with 'Hotkeys' (e.g. Leftmouse + LAlt)
-

- {m} FIXED 'ScreensMenu' doesn't work with centered screens.
>> Maik Solf <<

(15-Nov-95)

- {s} FIXED 'PropHack' restart crashes if boopsi.mcpgad are not available.
>> Eksec/Infect <<
- {s} FIXED 'Change Workbenchtitle' max chars. Now its 400 instead of 200.

--- MCP V1.10 Beta 1 release ---

(08-Nov-95)

- {s} FIXED MCP. No more divu.l usage on MC68060.
- {s} REWRI memory-fragmentation routine for 'Change Workbenchtitle'.
- {s} ADDED Env-variable mode for 'AssignPrefs'.
- {s} FIXED Problems with ShowInterface.

(07-Nov-95)

- {s} OVERW No-Chipmem. Renamed to MemoryPatch. Now allows to select Chip or Fastmem only
- {s} ADDED Include/Exlude list for 'CrunchPatch' and 'Memory Patch'.

(04-Nov-95)

- {m} FIXED a problem in 'AssignPrefs'. If a volume doesn't exist, then MCP was in a loop or the computer crashes.
>>Patrick Myles<< & >>Peter Rolf<<

(30-Nov-95)

- {s} FIXED bug in 'Drive NoClick' :(
>> Martin Steigerwald <<

(27-Oct-95)

- {s} FIXED problems with 'New ToolTypes'. This wasn't MCPs error. It's because of bad coded programs!

(25-Oct-95)

- {s} ADDED 'Wait Validate'

(23-Oct-95)

- {s} FIXED problems with 'CrunchPatch' and PIPE:.

(18-Oct-95)

- {m} FIXED 'ScreensMenu' doesn't check the mouseposition correct.

(16-Oct-95)

- {s} REMOV 'PointerPatch' for Kick 2.x. This one didn't work very stabil.
- {s} FIXED 'PointerPatch' allocates now the pens for the colors.
- {s} FIXED 'PatchRGB32' doesn't work with PatchControl.
- {s} FIXED 'PointerPatch' will now full activated.(e.g. after restart)
- {s} ADDED 'SaveGirPort'. Based on a source of Mark Thomas.
- {s} ADDED 'PubModes'. Including Shanghai and PopPubScreen mode.
- {s} FIXED little problems with 'OneReq'.
- {s} ADDED 'NewEdit'
- {s} ADDED Flicker Delay for the 'PointerPatch' to avoid pointer-flickering.

(15-Oct-95)

- {s} FIXED 'Pointer Blanker'. Now works on GFX-Boards.
- {s} OVERW full MCP. It's now more register relative and shorter.

(13-Oct-95)

- {m} FIXED The Hotkeyroutines from 'Dimmer' and 'Blanker' are only valid one times.
>> Goran Paulin <<
- {m} FIXED 'ScreensMenu' now checks if the screen has no title.

(25-Sep-95)

- {s} ADDED Screenname-Promotor will now use Pubscreenname if available.

(21-Sep-95)

- {s} ADDED 'Force Hires Pointer'. This promotes every pointer to HiRes.

(18-Sep-95)

- {m} REWRI now the 'Full Windowmoving' and 'Full Windowsizing' uses the MoveWindow and SizeWindow functions and not the ChangeWindowBox function. The moving and sizing is much faster especially for non WorkbenchWindows. The window flicker while holding a window is removed too.

(16-Sep-95)

- {s} ADDED new arrows for 'PropHack'.

(13-Sep-95)

- {s} ADDED 'PropHack'

(09-Sep-95)

- {s} FIXED a bug in 'NoChipmem'. If no entry was in the list, it didn't work.
>> Eric Lenhardt <<

(07-Sep-95)

- {m} FIXED now the SunMouse-Window2Front and SunMouse-Windowactivate are deactivated if you hold down a mousebutton.
>> Ludwig Kamphenkel <<

- {m} ADDED 'Screen Activation' now remember the old active Gadget and will activate this if the screen comes to front.

- {s} ADDED 'Leftymouse'

- {s} ADDED 'Insert into InputStream' hotkey.

(06-Sep-95)

- {s} REWRI 'Execute Command' hotkey for unlimited commands.

- {s} ADDED 'Capsshift' function.

- {s} ADDED 'Mapumlauts'

- {s} ADDED Hotkeys: 'HoldX', 'HoldY' and 'HoldXY'.

(05-Sep-95)

- {s} ADDED 'Shift Key' hotkey for MMB shift.

- {s} FIXED 'Activate Window' hotkey. Now it doesn't work if the mouse moves.

(03-Sep-95)

- {s} REWRI 'Close Active Window' hotkey. Now closes every window.

(17-Aug-95)

- {s} FIXED 'Change Workbenchttitle'. VMM will now check with the 'VMM_Port' and close the vmm.library if VMM was quited.

(16-Aug-95)

- {s} REWRI the complete Hotkeys part.
- unlimited Hotkeys for every function
- new intelligent doubleclick management with unlimited clicks

- new events for Diskinsert, Diskremove and Timer
- CapsLock will no longer block hotkeys

- {s} REWRI 'Sun Options'. SunMouse and SunPopToFront now only works if the mouse doesn't move and no gadget is active. SunKeys doesn't work if a gadget is active.
- {s} REMOV SunRMB. This is now Hotkey 'Activate Window'.
- {s} ADDED 'AssignWedge' will now retry if a disk was inserted.
- {s} ADDED 'CycleScreens BackToFront' hotkey.

(13-Aug-95)

- {s} FIXED bug in 'Library Search' (ROM Library was everytime opened in every version)
[This bug is already fixed in the MCP V1.05 fixed release]
- {s} FIXED 'ScreensMenu'. Now it comes up on every screen.

MCP V1.05 ----- (22-Jul-95)

- {s} FIXED FilterFunc from 'ReqTools Patch'. If the dir was changed it doesn't work.

(12-Jul-95)

- {m} FIXED bug in AutoRequest-patch removed. It appears for example in Imagine if someone overwrite a file.
>> Francesco Ronchi << (06-Jul-95)
- {s} FIXED 'Processor' option.

(30-Jun-95)

- {m} FIXED bug in the OpenScreen-patch removed
>> Thanx to Gideon Zenz << (26-Jun-95)
- {s} FIXED bug in NoGuru-Remove, causing some Enforcer-Hits.

(19-Jun-95)

- {s} ADDED VBR will only be moved to \$0, if the MMU isn't used, to prevent problems with Enforcer.
- {s} FIXED processor option. Now only the available functions will be disable/enabled.

(15-Jun-95)

- {s} ADDED currentdir support for 'Library Search'. You can make a libs dir where the libs from a program are placed. It will try to open libs out of "PROGDIR:libs/".

(14-Jun-95)

- {s} FIXED bugs in OpenLibrary-patch
>> Thanx To Michael Kilimann For Bug Hunting <<

(12-Jun-95)

- {m} ADDED The directory for an AssignLock will be made automatically. All subdirectories will be made certainly.
>> Ludwig Kamphenkel <<
- {m} FIXED now you can click on the Depthgadget of a screen and the WBTitle will not activated
>> Bert Heise <<
- {m} FIXED the Workbench was not activated if the Workbench was not Backdrop
>> Bert Heise <<

(11-Jun-95)

- {s} FIXED systemcrash if ENV: wasn't assigned
>> Michael Kilimann <<

(04-Jun-95)

- {s} OVERW whole MCP 020+ version (1340 bytes won). Now it uses tst.l ax and tst.x label(pc). ASM-One V1.28 makes it possible.
>> Big Thanx To Price From T.F.A. For ASM-One V1.28 Beta <<
- {m} FIXED 'ScreensMenu'

(02-Jun-95)

- {m} FIXED ToolType MCPNOVBR destroy the cache-settings

(01-Jun-95)

- {s} FIXED FilterFunc from 'ReqTools Patch'. WBPatten didn't work.
>> ION <<
- {s} FIXED Enforcer-Hit with 'ReqTools Patch' + IconEdit
- {s} FIXED Problems with Cancel-Button of the 'ReqTools Patch' requester
- {s} FIXED 'SpeedRamsey' is now only available with Ramsey Rev \$f. This means only on A4000.
>> THX Eetu Ojanen for tips <<
- {s} ADDED support of OneReq. It's a new short asl.library.
>> THX to One for cooperation <<

(29-May-95)

- {s} FIXED bug in 'Force NewLook-Menus'. D7 was trashed.
-

(28-May-95)

- {s} FIXED 'CacheFonts'. Now it should work always. (including Iconian)

(27-May-95)

- {s} FIXED 'Promotor'. HAM/EHB should now work! (finally)
- {s} FIXED Notify, if config-file was deleted.

(23-May-95)

- {s} FIXED 'Crunchpatch'. Sometimes it was always on.

(22-May-95)

- {v} ADDED 'Force NewLook-Menus'
- {s} FIXED versioncheck. If the prefsfile isn't the right version a requester pops up, but now the prefs will be used.

(21-May-95)

- {s} FIXED bug in 'Requester Timeout'.
- {v} FIXED CrunchPatch-Crunchmania. A \$000f was written to \$df180 into the Chipram. Some computers could crash in low memory situations.
- {s} FIXED little bug in 'Center Screens'.

MCP V1.04 ----- (17-May-95)

- {s} FIXED OpenScreen routine. On Kick 2.x wasn't set the right colors.

(16-May-95)

- {v} ADDED MCP installs 'NoGuru' btw. Saves Alert-History if it couldn't load the MCP.gurudat!
- {v} FIXED 'NoGuru' now works without enabled Alert-History. Before that fix it shows the whole MCP.gurudat! (Bug since V1.02)
>> RAMSES <<

(15-May-95)

- {s} REMOV patch of AllocVec in 'NoChipMem'-Function. (AllocVec uses AllocMem)
- {s} ADDED 16 Colorpointer for Kickstart 2.x. Since weeks of work it should now work right. I've only tested it with a Kick 2.04 from an A2000 loaded with MCP-MapRom beta.
- {s} FIXED openversion of diskfont.library. It was V37, but on the

standard WB 2.0 is only a V36.

- {s} FIXED Enforcer-hit in 'Change Workbenchtitle'
- {s} ADDED some Gurus to MCP.gurudat file (including Retina-Alerts)

(14-May-95)

- {s} ADDED versioncheck of prefsfile
- {s} FIXED Pens of 'Title Clock' (now uses MenuText/MenuBackground on Kick 3.0+ and DetailPen/BlockPen on Kick 2.0+)
>> Richard Baud <<
- {s} ADDED 'Title Clock' will now use the font of the uppermost screen, if noone is selected
>> Jaco Schoonen <<
- {s} FIXED 'Promotor'. The first Size-entry was skiped. (Probably made in V1.04)

(13-May-95)

- {m} ADDED 'CycleWindows backwards'
>> requested by Jani Kannosto <<
- {s} FIXED 'AssignWedge' for compatibility with MC68000

(09-May-95)

- {s} ADDED to 'Change Workbenchtitle': Memsizes in Mega and K Bytes, RetinaMem, VMM and full memory percentage
- {s} FIXED VBR wasn't set back to zero (if wanted) on start of MCP
>> Ramses <<
- {s} FIXED bug in 'New Tooltypes' function. Now works fine with VMM.
- {v} FIXED 'KeyBlanker' turn off works now (finally!)
>> BASIC <<
- {-} ----- Betarelease for all registered users.

(07-May-95)

- {s} FIXED 'SpeedRamsey' now doesn't work with non-AGA to prevent problems with A3000

(06-May-95)

- {m} ADDED 'CycleWindows' now activate the windows
>> Goran Wallgren <<
 - {m} ADDED 'PatchOpenWB' to prevent a bug in Kick 3.x
 - {s} ADDED 'Center Screens' function
-

- {s} ADDED all internal BOOPSI gadgets (like Checkmarks) will now be right displayed with 'NoChipmem' function

(05-May-95)

- {s} FIXED No more system-requesters will pop up
- {v} ADDED 'Requester Timeout'

(04-May-95)

- {m} FIXED more then two spaces in the screenname for 'ScreensMenu' will be decreased to one space

(03-May-95)

- {m} ADDED 'SunPop2Front', which pops the window under the mousepointer to front
- {m} FIXED 'Default PubScreen' will set the WBScreen to default, if the frontmost screen isn't a PublicScreen
- {m} FIXED 'Default PubScreen' will be put back to 'Workbench' if MCP quits
>> Mario Kemper <<

- {m} ADDED 'SunMouse', which activate the window under the mousepointer

(02-May-95)

- {m} ADDED 'SunRMB', which activate the window under the mousepointer if you press the right mousebutton
- {m} FIXED last Spaces in the Screensname for 'ScreensMenu' removed

(01-May-95)

- {m} ADDED 'SunKey', which activate the window under the mousepointer if you press a key

(30-Apr-95)

- {s} OVERW Tasksearching again! (600% faster) It's now nearly as fast as without MCP
- {v} FIXED 'NoGuru' requester hotkey "Reboot" to "b"

(29-Apr-95)

- {m} FIXED with 'Full Windowsizing' the window jumps to the opposite direction if you move to the edge of the screen
>> Trevor Morris <<

- {m} FIXED first spaces in the Screenname for 'ScreensMenu' removed

(28-Apr-95)

- {m} FIXED Mungwall-Hit with 'Screensmenu'
- {m} FIXED Enforcer-Hit with 'ScreensMenu'
>> Mario Kemper <<
- {m} FIXED 'Full Windowmoving' now works with WBGauge. Error in the calculation of the dragbar removed.
>> ION & Ralph Wermke <<

(27-Apr-95)

- {s} FIXED 'Drive NoClick' and 'KeyBlanker' turn off work now
- {s} ADDED NoSave option with 'NoGuru'
- {s} ADDED 'ReqTools Patch' patches only when library was opened or is still in memory
- {s} ADDED 'ReqTools Patch' for Req Library
- {s} OVERW 'ReqTools Patch' for Intuition
- {s} ADDED 'ARQ Mode' (for 'ReqTools Patch')
- {s} ADDED the name from the assign will be display in filerequester-title (AssignWedge)

(26-Apr-95)

- {s} FIXED 'Format Protection' uses now SetFunction (for compatibility with HDOff and similar programs)
>> Gideon Zenz <<

(25-Apr-95)

- {m} ADDED 'QuickLayers' that speeds up the rendering using layers.library
>> Requested by Dave Dustin <<
- {s} ADDED 'Title Clock' (big Thanx to ION for coding this !)
- {s} ADDED 'ReqTools Patch' for Asl and Arp Library
- {s} FIXED bug when rendering the new screenfrequency

(24-Apr-95)

- {m} OVERW now 'ToolAlias' make only one patch in the system and you can delete an Icon over Workbench. The codesize of Toolalias is reduced about 50 percent and the patch works more safe now.
>> Holger Papajewski <<
- {m} ADDED in Exchange you can call and kill the MCPPrefs with the functions 'ShowInterface' and 'HideInterface'

(23-Apr-95)

- {s} ADDED 'AssignWedge' is now compatible to ARQ (and similar Programs) For right use: Start ARQ before MCP and turn MCP's 'ReqTools Patch' off.
>> Walter Trautmann (THX for your letter!) <<
- {m} FIXED you can now call a hotkey by a key plus a doubleclick on the mouse (but only a doubleclick, not a tripleclick)
>> LSI <<

(22-Apr-95)

- {s} FIXED memory-eating bug in the 'NoGuru' function
- {v} FIXED bug if 'Alert-History' is disabled and 'NoGuru' enabled the MCP.gurudat file wasn't loaded. This bug was made with MCP V1.02's new InitRoutines.

(21-Apr-95)

- {v} ADDED Delay after saving the Guru to avoid HD-Validation
- {s} FIXED colors in 'ScreensMenu'
>> Squirrel <<
- {m} ADDED current directory to the assign-requester in 'AssignWedge'
>> Mario Kemper <<

MCP V1.03 ----- (20-Apr-95)

- {s} ADDED MCP.gurudat and GuruHistory can now be loaded from another directory. ! Attention, don't forget to save new prefs !
>> requested by Rodney Hester and Cindy Chen <<
- {s} ADDED 'Borderblank' will be turned off, when MCP was quited
>> requested by Volker Eickhoff <<
- {m} FIXED all 'AssignAdd' assigns was making with every start of MCP
>> Volker Remuss <<

(19-Apr-95)

- {m} ADDED 'Default PubScreen' (FirstScreen=DefaultPublicScreen)
>> requested by Trevor Morris <<

(17-Apr-95)

- {m} FIXED Function 'TOOLTYPE' always set the processor caches (also if no tooltype was given)
- {m} ADDED 'Full Windowsizing'
>> requested by S.E.M. Lichtendahl <<
- {s} FIXED the promotor doesn't work with HAM and EHB modes
>> Dres! <<

(14-Apr-95)

- {m} ADDED 'ScreensMenu' to select a screen, if you press the right mousebutton over the screens depth gadget

MCP V1.02 ----- (11-Apr-95)

- {s} FIXED 'FastReset' to be a A1200 reset (without HD-Off). Sorry, we couldn't test it.

(10-Apr-95)

- {s} ADDED to 'Change Workbenchtitle': Workbenchversion, real Kickstart-version and real Workbenchversion (e.g. 39.106 and 39.29)
- {s} ADDED Crunchmania support for 'Crunchpatch'
- {m} FIXED 'ClickToFront' doesn't work with the 'rawkey lbutton' Please use 'double rawmouse lbutton' (Doubleclick) because it's better then only the left mousebutton
>> Zachary Powell <<
- {m} FIXED 'Full Windowmoving' hang if you press the right mousebutton while moving the window
- {m} FIXED 'CycleScreens', 'ClickToFront', 'ClickToBack' doesn't work full with a couple of programs
>> Volker Remuss <<
- {m} FIXED 'CycleScreens' doesn't work with 'rawmouse lbutton rbutton'
>> Volker Remuss <<

(09-Apr-95)

- {s} REWRI Init and Remove routines (There are now shorter and safer)
- {s} FIXED systemlock when a library can't be opened

(07-Apr-95)

- {s} REMOV Openscreen-routine (now MCP works fine with RetinaEmu)
>> Hudi <<

(06-Apr-95)

- {m} FIXED CopyMem doesn't work on 68040 or higher
>> LSI <<
 - {m} FIXED Tooltype 'MCPNOVBR' causes the computer to crash
 - {m} FIXED Windowfunctions (MoveWindow, ClickToFront, ClickToBack) wasn't compatible with MagicMenu (selectable Popup Menu)
>> Volker Remuss <<
-

- {m} FIXED Tasksearching was to slow (now 600% faster)
>> Volker Remuss <<
- {m} ADDED new MCP.gurudat
- {m} ADDED ToolType 'MCPNOCYBER' (switch to AmigaScreen)

MCP V1.01 -----

- {s} ADDED 'CopyMemQuick'
- {s} FIXED 'CacheFont' didn't work with Fed
- {m} FIXED disable of 'Full Windowmoving' didn't work
>> Ramses <<
- {s} FIXED systemcrash when 'Full Windowmoving' is disabled
>> Ramses <<
- {s} FIXED errorsprite with 'PointerPatch' disabled
>> Ramses <<
- {s} FIXED Mousepointer-queue with 'PointerPatch' on 68030
>> Ramses <<

1.4 History of MCPPrefs

History of MCPPrefs

=====

The programmer: {s}:Stefan, {m}:Michael, {v}:Vincent

>>USER<< is the name of the user, who reported the bug.

FIXED = fixed ADDED = new REMOV = removed REWRI = rewritten OVERW = overworked ←
IMPRO = improved

MCPPrefs V1.43-----

- {d} OVERW "Add SystemAssigns" from Assignmanager now use HPath for Path
and HLOCK for LOCK.
- {d} FIXED AppIcon String for "DROP" was not read correctly.
- {d} FIXED Bug in NewGadtools. Workaround for quitting objects with
Nullpointer, which else will hang MCPPrefs.
- {d} IMPRO Modify Screensmenu-Window for a better look like Windowsmenu.
- {d} FIXED Bug in the Subwindow from Colorwindow for CyleToMenu, Wbgauge

and some others: the Adress may be odd sometimes, this crash or give an Enforcerhit. Fixed now.

- {d} FIXED Stringgadget-routine for Hotkey-InsertString have copied to wrong adress sometimes, because the adress was not buffered.
- {d} OVERW some optimations with Macros in Code.
- {d} FIXED Was a Key readed from config for Hotkey-InsertString, but no String definate, or added a second Key, the Structure was overwritten, fixed.
- {d} ADDED new Tooltype/Cli-Argument "PREFSDIR". To set defaultdirectory for reading or writing by "load from" or "save as". It is limited to 34 Chars.
- {d} ADDED Add Headerline in GUI. Show the Versionsnumber of MCPPrefs and of the configfile in first Line.
- {d} ADDED AssignManager the Assigntype "Hold Lock" and "Hold Path".
- {d} ADDED Quickdraw-Function
- {d} OVERW Cosmetic changes in Shapeshifterpatch, NoGuru and Pubmodi. Hopeful it show a little better now.
- {d} OVERW Titleclock (WBClock) Window now variable in width to see the whole text from variabels.
- {d} ADDED New function "MCP VarNames" in Patches.
- {d} FIXED Hotkey "CloseWindowUnderPointer"-Optionwindow have had Button-text on Title. Now the correct title will show. Remove a variabel space before and after the Text/Gadget.
- {d} IMPRO Change optionsfields in Htokeys to make different options with different Key for same function.
- {d} IMPRO Change Variablelistfields in all functions (appicon, logbook, change WBtitle, TitleClock) to NList and NListview-types, to show more fields (definiable). Please note, YOU NEED NList and NListview MUI-Classes NOW !
- {d} FIXED The Strings for %nw and %NW where not in the inbuilded english catalog.
- {d} ADDED all new Hotkeys in GUI.

MCPPrefs V1.42-----

- {d} FIXED After showing List of Vars from Titleclock, the Stack was destroyed and the Amiga will freeze or resetting.

- {d} IMPRO Assignprefs increase Memoryspace for Pathname from 1000 to 2000 Chars.
- ~{d} OVERW When Descriptions for the Vars be longer than 72 Chars run out of the allocated memory. This will now controled before End of Mem the String now cutted.
- {d} FIXED Remove one wrong Objectlink.
- {d} FIXED repair MUI-SetCycleStructure.
- {d} REMOV unneeded Link in MUI-init.
- {d} ADDED Insert the 4 new Vars (%nw,%NW, %gs and %ps) in Listwindows.
- {d} FIXED Some Memory will freed twice when closing all Windows.
- {d} IMPRO Set maximum value for delay in Logbook from 500 (10 seconds) to 3000 (60 Seconds)
- {d} ADDED new Header-function in Logbook
- {d} FIXED Remove a Bug in NoGuru-Window, may destroy MUI-list.
- {d} ADDED new ASK-for-filename function in NoGuru
- {d} REMOV Remove unneeded Checkmark "Save delay" in NoGuru.
- {d} OVERW remove some unneeded Code and optimizing. Save about 70 Bytes.
- {d} FIXED Read/write NoGuru: Dissasslines will saved allways to 255. Also open/closing NoGuruRequester will destroy the correct Value.

MCPPrefs V1.41-----

- {d} ADDED Add new Function "logbook".
- {d} ADDED Add new features in "NoGuru".
- {d} FIXED remove two Bugs in Screensmenu, one by reading Prefs and no size is given will ignore the other options, the other will get memory and never give it free by opening Screensmenu-Window.
- {d} OVERW make a better look for Screensmenu with rightassign Strings.
- {d} ADDED Add new Function "Windows-Menu".
- {d} FIXED Open ReplaceTopaz was crash the System.

MCPPrefs V1.40-----

- {d} FIXED remove the Bug in "2screensmenu" in the feature "ScreensMenu", ←
which will
destroy the freelist and not reread the prefsentry.
- {d} FIXED New Vars there wasn't listed the Descriptions
- {d} ADDED new Vars "%lla" till "llX" and %pu and %pp in listwindows for ←
variables.
- {d} ADDED options vor hotkey "activeWindow to Front"
- {d} ADDED Feature "VirtualIcons": function for Virtualiconpath and make ←
changes
for new MCP Prefsfile
- {d} OVERW all showed Variabels now use the same routineFeature.
- {d} FIXED now handling for Variabels with different length.
- {d} FIXED WBClock using Variabels by clocking from List will make a Bug.

MCPPrefs V1.39-----

- {d} ADDED add Button for Listview in AppIcon-Title for the same List
like WBTitle and Titleclock.
- {d} IMPRO change Listbutton for WBtitle and titleclock, now the
same one, initroutine for this Field is now only one, the
second is killed.
- {d} FIXED remove Bug: from "Powersaver" wouldn't read out "Off, when mouse ←
over"
,"Bordersize" and "Enable"- Parameters
- {d} ADDED ScreensMenu new option "2ScreensMenu"
- {d} ADDED added new Entry(s) for Appicon
- {d} ADDED Added new strings vor WB-Title: %CP, %pd and %mv.
- {d} FIXED correct wrong translation from "Save as"-requester
- {d} FIXED find out a Bug, which will chaos AmigaFreeList, several time
this will GURU or restart the Amiga

MCPPrefs V1.38-----

- {d} FIXED a little Bug who hangs MCPPrefs sometimes on opening or closing GUI
- {d} ADDED New Variables in WBTitle (see MCP)
- {d} INFO new Version of catalog requierd

MCPPrefs V1.37-----

- {d} IMPRO Some english strings more help
- {d} ADDED Variables %Pr and %PR in WBTitle
- {d} ADDED HDPrefs will not deselected

MCPPrefs V1.36-----

(23-Dec-2001)

- {d} OVERW Many english strings wasn't include
- {d} FIXED Sometimes MCPPrefs hangs after "save" or "use"
- {d} FIXED Some Functions and Patches would be deselected because wrong ↔
systemanalysis
- {d} FIXED Deselected all unavailable Patchs
- {d} INFO Because MCPPrefs will be rewritten, i don't change many thinks in ↔
MCPPrefs
- {d} FIXED If SysiHack or ReqttoolsPatch on, MCPPrefs make sometimes a GURU

MCPPrefs V1.35 -----

(13-Nov-2001)

- {d} FIXED MCPPrefs Help-Button from "NoTopaz" now working correct

- {d} FIXED The MCPPrefs-Icon starttype is set to "Workbench"

MCPPrefs V1.32 -----

(10-Jul-98)

- {m} FIXED reload of the config file hasn't activated the config pages.
>> Stephan Rupprecht <<

(19-Jun-98)

- {m} FIXED 'Cancel' the prefs program after 'Test' trashes the LockPens list in the ScreenManager.
>> Luca Longone <<

(05-Apr-98)

- {m} FIXED some names of hotkeys.

(29-Mar-98)

- {m} FIXED ON/OFF values of ScreenManager tags wasn't correctly mapped to 0/1 values.
>> Luca Longone <<

(21-Mar-98)

- {m} FIXED PointerBlanker options wasn't correctly loaded.

(17-Mar-98)

- {m} FIXED NewGadTools-Slider pattern entry wasn't saved.

(08-Feb-98)

- {m} FIXED some version infos.

- {m} FIXED all cyclechains.

(23-Nov-97)

- {m} FIXED Autoscroll function of ScreenManager wasn't saved correct.

(14-Nov-97)

- {m} IMPRO now it's impossible to enter a tab in the "InsertIntoInputstream" string gadget.
But unfortunately it doesn't works with MUI 3.8.
>> Gary Gagnon <<

(02-Nov-97)

- {m} FIXED load an other config is now only allowed from the first page of the Prefs program to avoid conflicts.
>> Christian Uceda Fernandez <<

(12-Oct-97)

- {m} FIXED MCPPrefs now loads the tooltypes when it's started from CLI, too. (only from 'sys:prefs/mcpprefs.info')
>> Michael Kilimann <<

(09-Oct-97)

- {m} FIXED all PatchWork hits.
>> Ian Kumlien <<

(21-Sep-97)

- {m} FIXED width of the Sizegadget must be 18 or higher!
>> Vesa Halttunen <<

(20-Sep-97)

- {m} FIXED NoTopaz-Fontrequester only shows the fonts in memory.

MCPPrefs V1.30 -----

(15-Sep-97)

- {m} FIXED exchanged On/Off tag values.
>> Mario Cattaneo <<

(13-Sep-97)

- {m} REMOV Save, Use, Test from the menu.
>> Mario Cattaneo <<

(10-Sep-97)

- {m} IMPRO setting of Sys:Prefs/Presets to the filerequester for LoadAs and SaveAs
>> Mario Cattaneo <<

- {m} FIXED bug that SaveAs quits the program

(07-Sep-97)

- {m} FIXED CreateCacheFont bug, if no .font files available.
>> Tomasz Pedrak <<

(27-Jul-97)

- {m} ADDED load menu option to load other configs while running the prefs program.

(17-Jul-97)

- {m} FIXED Enforcer Hit
>> Mario Cattaneo <<

(13-May-97)

- {m} FIXED exchanged save place of LockPatch and WBAbout
>> Remigiusz Kierunczyk <<

(24-Apr-97)

- {m} FIXED NoIconBorder names

(21-Apr-97)

- {m} FIXED checking of ARQ-Mode for the Reqtools-Patch.
>> Rene Bour <<

(17-Apr-97)

- {m} FIXED wrong On/Off tag values in the ScreenManager.

(03-Apr-97)

- {s} FIXED some bugs. Enable of ScreenManager was not correct.

(27-Mar-97)

- {m} FIXED little bug that not all Dri-Pens are showed

(22-Mar-97)

- {m} FIXED hopefully all bugs with disable/enable functions

(15-Mar-97)

- {m} FIXED reading of the prefsfile. In V1.30b2 the activation of the
function was trashed.

(10-Feb-97)

- {m} ADDED SaveAs function

(01-Feb-97)

- {m} FIXED crash if no IF condition given
>> Ian Kumlien <<

(20-Jan-97)

- {m} ADDED new ScreenManager Preferences (hard work:)

MCPPrefs V1.22 ----- (22-Nov-96)

(04-Nov-96)

- {m} FIXED empty window after adding a new system assign to the assignlist.

MCPPrefs V1.21 ----- (13-Aug-96)

(12-Aug-96)

- {m} FIXED Byte-Writes to an undefined address. This error only occurs by one person, but it's fixed now. We don't know how he has made it.

MCPPrefs V1.20 ----- (29-Jul-96)

(10-Jun-96)

- {m} FIXED Noclick for drive number 3 wasn't saved correctly.

(29-May-96)

- {m} FIXED little bug while writing the NewGadTools. Sometimes the arrows were not visible.

(20-May-96)

- {m} FIXED nasty bug in the listview handling. AssignPrefs and Promotor will work now

- {m} FIXED Helpfunction for NewGadtools
>> Trevor Morris & Gregor Kuhlmann <<

- {m} FIXED bug in TrackDisk settings
>> Martin Steigerwald <<

(28-Mar-96)

- {s} FIXED bug in setting up the defaults, the result: scrambled processor settings

- {s} FIXED saving of Traskdiskprefs and Alerttimeout

(25-Mar-96)

- {s} FIXED the stack will now be automatically increased

- {s} ADDED the MCP-logo disappears if the height isn't enough

(06-Feb-96)

- {m} FIXED Bug in the 'Swaz|Garshne' gadget. Also the stack of the MCPPrefs program must be 8192 bytes now.

MCPPrefs V1.10 ----- (03-Feb-96)

(03-Feb-96)

- {s} FIXED Filerequester problems of AddBlanker.

(16-Jan-96)

- {s} ADDED new smoothed MCP logo from Trevor Moris.

(10-Jan-96)

- {s} FIXED Sorting. Global and AssignPrefs will now sort Add-Assigns after normal assigns.

(06-Jan-96)

- {s} FIXED Blanker-Window crashes.

- {s} FIXED Checking of FastGary and SpeedRamsey works finally.

(05-Jan-96)

- {s} FIXED Taskname from 'Term' wasn't in the list.

(03-Jan-96)

- {s} FIXED multitask editing works again.

- {s} FIXED set the needed MUI version to 2.1 again.

(01-Jan-96)

- {s} OVERW recognition routine of Speedramsey and Fastgary

(30-Dec-95)

- {s} FIXED object removing now works safer.

(28-Dec-95)

- {s} OVERW whole Prefs. It uses now dynamicaly object linking. This reduces the memory usage nearly 50 %.

- {s} ADDED nice MCP logo. Thanks to Flite for doing this at The Party 5.

(25-Dec-95)

- {s} FIXED Promotor enable/disable with a workaround a MUI bug. It's a dramaticaly speedup.

(23-Dec-95)

- {s} FIXED Crashes with MUI 3.x. It's not may fault, it MUIs.

(10-Dec-95)

- {s} FIXED Processor-window.
- {s} FIXED Problems in loading blank lines.

(29-Nov-95)

- {s} ADDED Online-Help.

(27-Nov-95)

- {s} FIXED SleepPointer while creating Cachefontlist.

(22-Nov-95)

- {s} ADDED MUI 3 Drag&Drop in listviews.

(20-Nov-95)

- {s} FIXED sample of cursor left.

(16-Nov-95)

- {s} FIXED errors in 'Regtools Patch' window.
- {s} ADDED doubleclick on white featurelines will go to the page to edit.
- {s} FIXED more sanitychecks in 'Hotkey' page.

(15-Nov-95)

- {s} ADDED to the featureslist: doubleclick on a name will open the editwindow (if available) and a doubleclick on ON/OFF will disable or enable a feature.
- {s} FIXED recognition of 'FastGary'.
- {s} FIXED Locale support and Catalog recognition.
- {s} ADDED improved the menu.

--- MCP V1.10 Beta 1 release ---

(11-Nov-95)

- {s} most parts of MCPPrefs were rewritten. A new design was created. All known bugs were removed.

MCPPrefs V1.05 ----- (06-Jul-95)

- {s} FIXED error if selecting the first assign.

(26-Jun-95)

- {s} FIXED little bug in 'AssignPrefs' - Add an System-assign.

(17-Jun-95)

- {s} FIXED Promote-Screenname Edit didn't work.

(28-May-95)

- {s} FIXED the Promotor-page. The disable problem is solved now, it was already a bug in MUI.

(27-May-95)

- {s} REWRI Prefs-load-routine. If there is no config, all checkmarks will be off.

(24-May-95)

- {s} FIXED all bugs in 'AssignPrefs' list

(22-May-95)

- {s} FIXED All problems with non-disabled gadgets with a workaround MUI bugs.

(21-May-95)

- {s} FIXED PointerChecksum generation. Tried to allocate more than 1 gigabyte memory.

- {s} FIXED Enforcer-hit on Kickstart V2.x computers

MCPPrefs V1.04 ----- (17-Apr-95)

- {s} FIXED All PopAsIs have now 256 chars string-gadget insted of 80
>> LSI <<

(14-Apr-95)

- {s} FIXED Promotor-DisplayID, the requester pops up twice.
>> Maik Solf <<

- {s} FIXED some CheckMarks didn't enable/disable the right thing
>> Philip Manning <<

- {s} ADDED 'AssignPrefs' will now check for double assigns
>> J.T. Vermeulen <<

- {s} ADDED CacheFontList can now automatically deleted
>> Andre Jonsson <<

(11-Apr-95)

- {s} FIXED About-Window will now be selectable over menu and it wont popup at start
>> Andre Jonsson <<

(10-Apr-95)

- {s} FIXED If you add a new task or assign the new entry wasn't activated.
>> J.T.Vermeulen <<
- {s} FIXED all problems with 'Sun Options'
>> Ville Pispä <<

(09-Apr-95)

- {s} FIXED loading and saving of Hotkey- and Hotcmd-Checkmark. Hotkey was the same as 'CrunchPatch' and 'Hotcmds' was Hotkey.
- {s} FIXED Tasklist, Assignlist or Screenlist became longer and longer how often you press the ADD button and the window was open.
>> Volker Remuss <<
- {s} FIXED loading of 'Requester Timeout'
- {-} ----- Betarelease for all registered users.

(05-Apr-95)

- {s} FIXED Taskname errors in Tasklists
- {s} FIXED IFF-ILBM RLE decrunching with 16 colorpointer-generation
- {s} FIXED Tasklist hadn't displayed any task

(30-Apr-95)

- {s} FIXED 'BorderBlank' was enabled on OCS

(26-Apr-95)

- {s} FIXED enforcer hit
- {s} ADDED new CheckMark ON function on to 'ReqTools Patch'

(25-Apr-95)

- {s} FIXED old tasklist wouldn't be cleared in "ADD" Task from Promote-Task and NoPromote
>> FLi7e <<
 - {s} FIXED 'Global Page 1' Checkmarks doesn't appear its function (this was made by resorting the page)
 - {s} FIXED 'AssignPrefs'. Now you can select only directories.
 - {s} FIXED 'NoGuru'-delay was not right loaded
-

MCPPrefs V1.03 ----- (20-Apr-95)

- {s} ADDED Full Locale support
- {s} FIXED 'BorderBlank' is now selectable on ECS machines
>> Rodney Hester and Cindy Chen <<
- {s} FIXED CacheFontlist creation
- {s} OVERW 'NoTopaz' font-selection (now only fonts that work with
'NoTopaz' can be selected)
- {s} FIXED 'PatchRGB32' is now ghosted on AGA machines
- {s} FIXED 'Hotkey Commands' is now ghosted when Hotkeys are turned off
- {s} ADDED new Checkmark ON function to 'Alert-History' and 'NoGuru'
- {s} ADDED devicelist for the 'Format Protection'
- {s} ADDED changed all 'Hotkey Cmd'-StringGadgets to PopASLs

(18-Apr-95)

- {s} FIXED errors and systemcrash when removing all entries in any of
'Promotor' listviews
- {s} OVERW Global-Page 1 resorted

(15-Apr-95)

- {s} FIXED Filename-error with 16 Colorpointer generation

MCPPrefs V1.02 ----- (11-Apr-95)

- {s} FIXED MCPPrefs needs now muimaster.library V8 (MUI 2.1) instead of
V10. It's only tested with V10, so there are no warranties.

(10-Apr-95)

- {s} ADDED support of new MCP features
- {s} OVERW Userinterface:
 - o Select 'Hotkey Commands' now with a doubleclick in
Hotkeypage
 - o Global 2 is now Global Page 1
 - o Autoscroll is selectable in Promote-Size and DisplayID
- {s} ADDED "Test" Button
- {s} FIXED It was impossible to edit Promote-Size

(07-Apr-95)

- {s} FIXED crash with the demo-config when Euro72 and Multiscan monitors wasn't started
>> Philip Manning <<

(05-Apr-95)

- {s} FIXED some memory-eating bugs
>> Zachary Powell <<
- {s} FIXED reopening of the prefswindow while clicking the closegadget
>> LSI <<

MCPPrefs V1.01 -----

- {s} ADDED More security
- {s} OVERW memory-managment
- {s} ADDED full MUI-Cyclechain support (with a new version of MUIB-GencodeASM)
- {s} FIXED filename error with 16 Colorpointer
- {s} FIXED 'Hotkey' disables itself automatically
- {s} FIXED config-trashing while 16 Colorpointer generation
- {s} FIXED 'Borderblank' now disabled on OCS/ECS

PatchControl V2.6 ----- (20-Jan-02)

- {d} Fixed Wrong Versionsnumber in Patch (showed with Showpatches)
 - {d} OVERW Clean and comment the Source a little
-

PatchControl V2.5 ----- (21-Dez-01)

- {j} Added CyReq-Patch: this redirects EasyRequest and AutoRequest and checks the Stack. E.G. now ReqAttack works with AssignWedge. (Jacek Piszczek jr.)

PatchControl V2.4 ----- (09-Oct-97)

- {m} FIXED all PatchWork hits.
>> Ian Kumlien <<

PatchControl V2.3 ----- (18-Apr-96)

- {m} ADDED some system private patches now are not patched, because these functions can make problems with PatchControl. Thank you to Stefan Fuchs for the description in his Patch.library. Hopefully all crashes with Cyberguard and some other programs are fixed now.

PatchControl V2.2 ----- (09-Mar-96)

- {s} ADDED support of MCP patchsystem

(02-Feb-96)

- {s} FIXED problems with Executive.

(08-Jan-96)

- {s} FIXED disable/enable patch didn't work.

- {s} IMPRO patch.resource.

PatchControl V2.1 ----- (20-Dec-95)

- {s} ADDED support of Palis.

PatchControl V2.01 ----- (18-Nov-95)

- {s} FIXED problems with ARQ.

PatchControl V2.0 ----- (01-Nov-95)

- {s} ADDED new patch.resource featuring:
 - safe getting patches list
 - patches notify
 - enable/disable patches
- {s} OVERW complete PatchControl. Dramatically reduced the memory-usage. More save now.

PatchControl V1.3 ----- (30-May-95)

- {s} FIXED problems with PatchDT.

PatchControl V1.2 ----- (15-May-95)

- {s} ADDED patch of RemLibrary to prevent some errors with showpatches (14-May-95)

- {s} FIXED systemcrash with long paths (error only in AminetRelease)

PatchControl V1.1 ----- (28-Apr-95)

- {s} ADDED first patch support (recommented by ARQ)
 - e.g. PatchControl ARQ
 - the patches from the task named ARQ will be inserted before all other patches. (Wildcards are supported)
- {s} FIXED the format! Old TaskStructure is now only the TaskName!
- {v} ADDED ShowPatches-program to the archive
