- Removed known bugs.
- Rebuild the menu (also added new commands).
- Added possibility to move through all editable fields using [TAB] key.
- New shortcuts to moves through records.
- New ARexx commands:
 - GUIFIND
 - GUISORT
 - BROWSE <field name>
 - ISDEFAULT
 - STATISTICS <field name>
 - CLEAR
 - RESET
 - DELUNMARKED
- Added buttons for operations on records at bottom window border.
- Added scrollbars for scroll window content.
- Added information about project on bottom window border.
- Optimized searching option.
- Removed NOHIGHLABEL, NOBORDER and RXPORNAME tooltypes.
- Changed GUI in "Field definition", "Find record", "Print project" and settings windows.
- Exchanged "Reset" gadgets by popupmenu.
- Optimized adding and removing options.
- Added possibility to store ARexx programs in volume "T:" for much faster running.
- Changed selecting fields for statistics options (added gadget in statistics window)
- Rebuild fields popupmenu.
- Other changes.

6.6 (22.06.2000 16:50:43)

- Changed menu.
- Added new items to popupmenu (clipboard support).
- Removed known bugs.

6.5 (31.05.2000 11:56:09)

- Reorganized "Edit" menu.
- Removed reading/writing program settings bugs.
- Added possibility to specify number of digits after comma to statistics option.
- Added possibility to save statistics in two formats.
- Changed some english strings.
- Adden 4 new commands "%".

6.4 (21.05.2000 15:32:17)

- Added possibility to edit "*" menu (you can add new entry by selecting "... " item from this menu).
 - Added Italian catalog (author: Virginio Savani)
-

6.3 (15.05.2000 17:20:48)

- Fixed documentation.
- Fixed printing option.
- Removed known bugs.
- Fixed GUI.
- Added new shortcut to "Find record" window: [SHIFT] [ENTER] working like "All..." option.
- Changed menu.
- New option in "Program setting" window - "Use screen font in requesters and child windows"
- Added popupmenu for fields (press right mouse button over the field in main or design window).
- Added new option for "String" and "Amount" fields - URL address.
- Updated Spanish catalog (author: Dámaso D. Estévez).

6.2 (28.04.2000 17:33:00)

- Fixed documentation.
- Removed known bugs.
- Changed some strings.
- Changed GUI.
- Fixed progress indicator.
- Added new option to menu ("Project|New...").
- Added possibility to give labels for fields.
- Changes in "Text" field type.

6.1 (09.02.2000)

- Fixed documentation.
- Changed some strings.
- Removed known bugs.
- Changed: fields names in "Filed definition" window, names of cycle gadget positions and list of predefined values don't need <Enter> anymore.
- Added possibility to set injected and rejected characters.
- Added possibility to set number of lines for "String" and "Amount" fields by mouse dragging borders of field (like a sizing field)
- Changed menu in "Design" window.
- Added new options in "Design" window: "Cut", "Copy" and "Paste".

- Added French catalog (thanks to Jerome Chesnot).
- Now "Undo" function brings back record to the primary form.
- Added multiline string gadget.

2.05 (28.02.1998 14:15:49)

- Added patterns to windows.
 - Added new position to "Order" gadget in browse window - "Reverse" - all records will be sorted opposite to current records order.
 - Some small fixes.
-

2.0 (07.02.1998 22:45:10)

- Changed status to "CARDWARE". If you use this program, please send to me postcard with your city.
- Added possibility to specify placement of field name.
- Added possibility to hide field name.
- Added possibility to hide field border.
- Added new field type - "Amount" - content of this field will be treated as number by sort option.
- Replaced in find record window two cycle gadgets to specify search direction and search range by one cycle gadget.
- Some cosmetic changes.
- Removed some bugs.
- Added new tooltype - NOHIGHLABEL - which disable globally HIGHLABEL mode for fields.
- Added new menu entry "Operations/Show all" which shows all fields.
- Added possibility to switch program to browse mode by pressing [AMIGA] + [SHIFT] + underscore letter.
- Added Reset gadget to field definition window.
- Added new flag "Make list" to the search window, which puts all matched records into window similar to browse window.
- Added design window in which user could freely locate all fields.
- Added new tooltype - NOBORDER - which globally disables borders for fields.
- Added new flag for field - NOHIGHLABEL - which disables HIGHLABEL mode for field.
- Now program saves window position (suggested by Krashan/BlaBla).
- Added new tooltype - IGNSAVEDWINPOS - which ignores saved window position.
- Added possibility to select operator in find record window.

1.4 (28.11.1997 18:11:26)

- Changed field definition window.
- Changed Polish catalog and English strings in program.
- Changed save format.
- Added possibility to specify separation character (TAB or comma) to export to ASCII file.
- Added possibility to import ASCII files with comma as separation character.
- Added browse mode (suggested by Tomash/BlaBla). Now you can see one field of all records at one time. To enable browse mode please select field and choose "Operations/Browse..." or doubleclick on the field. You can sorting and filtering records freely.
- Added possibility to fast call field definition window, by doubleclick on field with [SHIFT] key, and field attributes window by doubleclick with [ALT] key.
- Removed limitation to 15 fields in record.
- Added new tooltype - FONT=
- Some changes and fixes.

1.3 (20.10.1997 10:34:38)

- Added cursors support for LISTVIEW gadget.
 - Added new shortcut - [SHIFT] [ENTER] - activates last field.
 - Added new shortcut - [HELP] - information about field.
 - Some little fixes.
-

- Moved and renamed "Repeat data" flag, now it is in "Options" window and named "Repeatedly data entering".
- Removed "Append..." and "Jump to..." options.
- Added Appicon.
- Added iconify option (suggested by Tomash/BlaBla).
- Added possibility to localize shortcuts.
- Changed save format, much more faster. Now program does not save data as ASCII by default, but in new format. But is still able to load/save ASCII files.
- Removed support for reqtools.library requesters (suggested by Tomash/BlaBla), now using asl.library. If you want to use ReqTools requesters please use ReqToolsPatch or MCP.
- Rearraged field definition window, now much more comfortable in use.

1.2 (21.09.1997 20:21:24)

- Now program requires AmigaOS3+
- Added case sensitive flag to search option.
- Added possibility to set searching record range and searching direction (normal or reverse).
- Added shortcuts to all gadgets in windows.
- Added definable shortcuts for fields.
- Added possibility to insert space after field ("Add space" flag).
- Added new flag - Repeat data - if this flag is set, and in empty field you press [RETURN] value from previous record will be placed into current field.
- Added possibility to hide fields.
- Changed GUI in field definition window.
- Fixed sorting option. If you sort already sorted project, project doesn't change its state to "changed".
- Added separated requesters to confirm: clear, load and quit.
- Changed XBF save format.
- Added possibility to remember windows sizes and positions.
- Debugged with help of Mungwall and Enforcer.

0.7 (16.08.1997 19:10:43)

- Added possibility to sort using Polish order without installed Polish locale (tooltype LOCALESORT must be disabled). It's usefull for Polish users without Polish locale package.
- Optimized sorting option.

0.6 (15.08.1997 godz. 13:01:12)

- Fixed field definition options. Now if you add new fields and remove it without closing field definition window, program doesn't change project state to "changed".
- Replaced shortcut to "Project|Clear|Project..." option from "R" to "L".
- Changed actual record display format.
- Some little changes.

0.430 (17.07.1997 23:27:38)

- Replaced "Project|New..." option with "Project|Clear|Project..." and "Project|Clear|Data...".
 - Removed SIZEGADGET tooltype.
 - Removed unused gadgets from field definition window.
 - Added gadget to specify field size in field definition window.
-

- Replaced slider for field size by INTEGER gadget.
- Added option to join projects.
- Added icons for program and projects.

0.420 (01.07.1997)

- First public version.
-
