Ordinary mailto link mailto:caolan.mcnamara@ul.ie

CrossReferencing

Crossreference BookMark by Text

I am a particular reference selection bookmark

I reference the text< I am a particular reference selection bookmark> directly.
I reference the text<I am a particular reference selection bookmark> as a hyperlink

Crossreference BookMark by Pagenumber

I reference the pagenumber of the reference text <6>
I reference bookmark 1's pagenumber with above/below <1>
I reference the reference bookmark with above/below <6>
I reference the line below me with above/below <6>
I reference the final bookmark with above/below <7>
I reference the final bookmark with above/below without hyperlink <7>, this only matters
as to whether word should take a click on it to mean jump to that location

Crossreference BookMark by above below

Reference above <above>
Reference below<below>

Attempts to Break Crossreferencing BookMarks

I have been unable to create a bookmark that contains " # or spaces, so I believe there cannot be any
conflict with either the simple grammer I have devised for them or with html tags.

I am "a bookmark" within a bookmark

I am a link to the internal bookmark on page 6
I am a link to the external bookmark on page 6

I am a bookmark that contains a url abookmark

I reference the paragraph number of a bookmark
I reference the para num with no context
I reference the para num with full context

I am the last point bookmark
