### 1.2 DisplayBeep copyright and other boring stuff

---

DisplayBeep - version 0.2 15-Aug-94

© 1994

G rard Cornu  
- Compiled with  
SAS/C    
6.51

DisplayBeep, as well as all the accompanying files, is  1992-94 G rard Cornu.

### 1.3 NO warranty for DisplayBeep

NO WARRANTY

~~~~~

There is no warranty for this software package. Although the author has tried to prevent errors, he can't guarantee that the software package described in this document is 100% reliable. You are therefore using this material at your own risk. The author cannot be made responsible for any damage which is caused by using this software package.  

### 1.4 DisplayBeep distribution

DISTRIBUTION

~~~~~

This software package is freely distributable. It may be put on any media which is used for the distribution of free software, like Public Domain disk collections, CDROMs, FTP servers or bulletin board systems.

In order to ensure the integrity of this software package, distributors should use the complete original distribution. The author cannot be made responsible if this software has become unusable due to modifications of the distribution contents or of the distribution files themselves. There is no limit on the costs of the distribution, e.g. for the media, like floppy disks, streamer tapes or compact disks, or the process of duplicating. Such limits have been proven to be harmful to the idea of freely distributable software, e.g. instead of reducing the price of the floppy disk below the limit, the software was simply removed from the master disk.

Although the author does not impose any limit on the distribution of this software, he would like to express his personal opinions on this matter:

- \* This software package should be made available to everyone free of charge whenever it is possible.
- \* If you have acquired this software package under normal conditions from a Public Domain dealer on a floppy disk at a price higher than 25FF or US \$5, then you have definitely paid too much. Please don't support this improper profit making any longer and switch to a cheaper source as soon as possible.

-----

Alan Pfeil is certainly allowed to include it in the  
I.C.P.U.G.  
Amiga  
library.

Fred Fish  
is obviously allowed to include it in its unique  
AmigaLibDisk  
library.

Thierry Colin  
is authorised to include it in the  
D.P.A.T.  
collection.

## 1.5 Fred FISH and the AmigaLibDisk library

FRED FISH and the AmigaLibDisk Library:

~~~~~

As Fred has been releasing CDROMs from a while now, just choose carefully your Fish CDs retailers, if you don't buy them directly from Fred. Those resellers aren't supposed to make money with them.

## 1.6 Usage restrictions for DisplayBeep

USAGE RESTRICTIONS

~~~~~

No program, document, data file or source code from this software neither in whole nor in part, may be used on any machine which is used

- \* for the research, development, construction, testing or production of weapons or other military applications. This also includes any machine which is used in the education for any of the above mentioned purposes.

\* by people who accept, support or use violence against other people,  
e.g. citizens from foreign countries.

## 1.7 DisplayBeep requirement

### REQUIREMENT

~~~~~

DisplayBeep needs at least System 1.0 to run, and has been developed  
and tested with KS 52.18 and WB 51.22. It should work with higher  
versions as well.

Due to the rather  
imposing size  
of this  
complicated application  
software, a hard disk of @{"reasonable size "link smiley} may ←  
be required.

## 1.8 Installing DisplayBeep

### Installing DisplayBeep:

~~~~~

Open the  
Install drawer  
, then double-click on  
your language's icon  
,  
or  
one of your choosing  
.

## 1.9 Introduction to DisplayBeep

### INTRODUCTION

~~~~~

DisplayBeep is a  
very complicated piece of Software  
. If you want more  
information about the aims of  
this complicated piece of Software  
please consult the Rom Kernal Reference Manual page 75 and 204, ←  
as it  
would take too much room in this guide if we attempt to develop the  
purpose of DisplayBeep. You may also click on

---

```
description
to get an

extensive description
of this
exclusive software application
.
```

## 1.10 Extensive description of DisplayBeep

```
DESCRIPTION
~~~~~

Please click on
description
for
complete information
about
this
wonderful software package
.
```

## 1.11 Using DisplayBeep

```
Using DisplayBeep
~~~~~

DisplayBeep is a Shell only Application package that don't need any
argument.
    Who likes to have arguments, anyway?
    Don't try to run it from Workbench. You have been warned.

Or havn't you?

Hint...
```

## 1.12 hint

DisplayBeep is mainly useful in scripts, either AmigaOs or ARexx ones.

## 1.13 DisplayBeep author

---

Send any suggestion, bug report, compliment ;-), DARK ↔  
chocolate  
(BLACK, containing at least 69% cocoa!), Bergerac Affiné tobacco,  
freely distributable software, 4 GB hard disks (not more than 4 GB  
in size, otherwise ReadRDB will give a wrong size (ULONG) ;-), A3  
48 bits colour scanners, CDROM drives and CDROM disks, tape streamers,  
brand new AMIGA 8000 with RISC CPU, etc..., etc...

OR JUST A POST CARD (made of dark chocolate!) to:

G rard CORNU  
11 avenue Edouard Aynard  
69130 ECULLY

FRANCE.

(WPC)

Have plenty of nice days! ... me too!

Translations ...

## 1.14 W.P.C.

World People Community ;-)

## 1.15 Translations ...

I can translate commercial software's documentations or hardware manuals, in fact anything technical, from English or American to French.

I have a very good knowledge and experience of the Amiga and computing in general.

Send any proposition to:

G rard Cornu  
11, Avenue Edouard Aynard  
69130  cully  
(France)

## 1.16 D.P.A.T.

D.P.A.T

---

Thierry Colin  
at  
AmigaNews  
.

## 1.17 ICPUG

I.C.P.U.G  
~~~~~

ICPUG is the one and only Independent Commodore Products Users Group.  
ICPUG is a non-profit making voluntary group run by its members for  
its members.

To become a member of this brilliant club contact:

Jonathan Cooley  
ICPUG Membership secretary  
10 Willson Road,  
EGHAM, Surrey,  
TW20 0QB

ENGLAND.

## 1.18 DisplayBeep's author would like to thank...

(in alphabetical order...)

|                                                     |                                                                                          |
|-----------------------------------------------------|------------------------------------------------------------------------------------------|
| Amiga                                               | For being the best platform to 'work' on. And still<br>alive in spite of some sad facts. |
| AmigaNews                                           | The first French Amiga magazine edited and<br>published on an Amiga.                     |
| Bernard Kubler                                      | For the delicious chocolates.                                                            |
| Christian Marz                                      | For sending the Aminet 4 CDROM, for the Mod lists<br>and much more.                      |
| Commodore-Amiga's<br>Software and<br>Hardware Teams | For improving it.                                                                        |

Fred Fish  
For the much helpful  
AmigaLibDisk library  
.

|                  |                                                                       |
|------------------|-----------------------------------------------------------------------|
| G rard Cornu ;-) | For the excellent french translations of all<br>DisplayBeep documents |
|------------------|-----------------------------------------------------------------------|

---

```
;-) ;-) ;-)
. (Where are they?)
```

I.C.P.U.G.

For all the nice guys and gals making it!

```
Jen Allen          For the chocolate bars, and everything else.

J r me Chesnot    For showing me his nice country in the Pyr n es and for
                    making me discover 'Parapente' through Pierre Nicolas and  
                    Ariane.
                    For all the support and much much more.

Joy & John Harding For their kindness, and for showing me their nice
                    Devon country. And much, much more.

Mark J. Lednor     For supplying me with AmigaLibDisks, and loads of
                    Aminet's files.

Peter Miles        For having supplied me with AmigaLibDisks, and everything
                    else.
```

SAS/C  

Team For my preferred compiler environment.

```
Stefan Becker     For the indispensable ToolManager, and for letting
                    me use his disclaimer.
```

```
Thierry Colin    For the keeping of the
                    DPAT
                    collection, and for
                    having upgraded
                    (just kidding!)
                    And all the other people for
                    supporting me
                    and/or the Amiga ;-)
```

## 1.19 For the humor impaired ... ;-)
