ANT_DEMO.DOT TEMPLATE

IMPORTANT
Before you can use the Ant you MUST initialize your copy to run with your local version of Word.
(This file and all the other Ant files should be in a tempory directory ... NOT in any of your Word directories.)

Install by clicking the button below.

Double-Click

NEW !
Please note the changes in the Attach Ant Template button described below...

You will be asked if you would like an "Attach ANT Template" button added to your Standard toolbar.
The button then, when clicked, will
1. Open the Ant,
2. Display two of the Ant Toolbars
3. Copy the contents of your current document into the Ant,
> *OR*

Open a blank new document in the Ant if you don't have any documents open
so that you can immediately begin to create, edit and/or convert to HTML.

If you already have an Attach Ant Template button installed in your standard toolbar, just click "Ok " (you'll be asked in a moment) to reinstall the new Attach Ant Template button and enable the features described above.

Do NOT DELETE anything in this document. It is essential to the successful running of the program.
