

## HERE 1.0

### DESCRIPTION

**Here** is a shareware program that allows you to easily post your ever-changing dynamic PPP or SLIP Internet address to a finger account, thereby allowing others to look up your current Internet address and contact you.

**Here** also includes a finger client to allow you to easily check the PPP or SLIP address postings of other **Here** users.

Since other users will now be able to locate your current address, you will be able to use talk servers such as **WinTalk**; FTP servers such as **WinQV/Net**, **Serv-U**, and **WFTPD**; and HTTP servers such as **HTTPD** and **ZB Server**.

### MINIMUM HARDWARE AND SOFTWARE REQUIREMENTS

**Here** is available in two compilations, one for **Win16** and one for **Win32**. Both compilations require an IBM compatible PC with a **386+** microprocessor and **Winsock 1.1+**. The **Win16** version requires **Windows 3.1+** and the **Win32** version requires **Windows 95, NT, or 3.1** with **Win32s**.

### REGISTRATION

**Here** is shareware. You may try **Here** for thirty days for free. However, if you decide to continue to use **Here** after the initial trial period, you are required to register it. The registration fee is \$10 US.

You can register **Here** by mail by printing the accompanying registration form contained in the "register.txt" file and mailing it to the address on the form, together with your check or money order for \$10 US.

### VERSION AND DOWNLOAD INFORMATION

The latest version can be downloaded from the **Here** Home Page:

<http://www.cris.com/~beers/here>

or from **TUCOWS** (The Ultimate Collection of Winsock Software):

<http://www.tucows.com>

### INSTALLATION

After unzipping the archive, you will have the following files:

- here16.exe - 16 bit Program.
- here32.exe - 32 bit Program.
- here.hlp - Help.
- here.wri - Installation and Program Information.
- register.txt - Registration Form.
- file\_id.diz - Summary Program Description.

Create a new directory (for example, c:\here) and copy all of the files into it. Then add a **Here** Program Item to one of your **Program Manager** groups.

The file **here16.exe** is the **Win16** version for **Windows 3.1** and the file **here32.exe** is the **Win32** compilation for **Windows 95** and **NT**. You can, of course, delete one of these two files if you will only be using one of them.

## **HELP**

The online help feature has complete directions for using **Here**. If you would like to review the help file before starting **Here**, just double-click on the file **here.hlp** from inside the Windows **File Manager**. You can browse through the help file sequentially from beginning to end by using the browse buttons.

## **COPYRIGHT, LICENSE, AND DISCLAIMER**

**Here** was written by and is copyrighted by Everitt Beers. All rights to the program are retained by the author except as expressly licensed herein.

**Here** is being distributed as shareware. You may use **Here** for thirty days without paying any fees. However, if you continue to use **Here** beyond the trial period, you must register it. The registration fee is \$10 US. To register **Here**, you can use the registration form contained in the file entitled "register.txt".

You may distribute **Here** to others without fee, as long as it is distributed together with all of the files contained in the original "zip file" distribution.

**Here** is distributed without warranty of any kind, express or implied, including, but not limited to implied warranties of merchantability and fitness for a particular purpose. Furthermore, the author shall not be liable for any damages whatsoever (including without limitation damages for loss of business profits, business interruption, loss of business information, or any other pecuniary loss) arising out of the use of or the inability to use **Here**, even if the author has been advised of the possibility of such damages.

## **BUG REPORTS AND SUGGESTIONS**
