

QuickTime: The CD, 1994
Winners of the 1994 QuickTime Film Festival

Revision Date: 2.09.95

This file contains important information not covered anywhere else. Reading it carefully will increase your enjoyment of your new CD ROM. Should the CD fail to function, please call Sumeria's technical-support department at 415/904-0800.

Important Change

Previous versions of "QuickTime The CD 1994" did not require you to install any software on your hard disk. This has changed. You must run a QuickTime for Windows setup before running "QuickTime the CD 1994."

Which Version of QuickTime for Windows?

We have included two versions of QuickTime for Windows on the CD so that you can get the best compatibility and performance out of your system. If you experience problems with "Space: a Visual History" try it again after installing a different version of QuickTime for Windows.

QuickTime for Windows version 1.1 is located in the directory called "QTW_1_1" on the CD. Open it and run the file "setup.exe"

QuickTime for Windows version 1.1.1 is located in the directory called "QTW_1_11" on the CD. Open it and run the file "setup.exe"

NOTE: you must restart the computer after installing a new version of QuickTime (for the overwrite to "take effect").

As a general rule, if you are using a soundblaster product, try installing QuickTime for Windows 1.1 first.

THE BROWSER

To play the movies on this CD, double-click on the Browser icon. Movies will play sequentially by category. Click the mouse once or press the space bar to advance to the next movie, or use the pull-down menus for random access to any movie on the CD. You can also use the pull-down menu to turn off the movie credits which appear in the lower left-hand corner. Some entries could not be incorporated into the browser. See more information below.

CD 2 ends with the Grand Prize winner, UnDo Me, which is an interactive piece. To quit UnDo Me, type Command-Q on the Macintosh or the ESC key on a Windows PC. You may experience some difficulty quitting My Parents Hands on CD 2. Clicking the mouse should return you to the Browser. You may have to click or hold down the mouse for several seconds or until the end of an audio segment. To quit, type Command-Q and wait a few moments.

MOVIEPLAYER

If you prefer not to use the Browser application, a copy of MoviePlayer is included on the CD. Simply open the movie using MoviePlayer, then click on the forward arrow on the control bar to play the movie. See the Movie Name Index below for a list of the movies and their DOS filename equivalents.

MOVIE PLAYBACK AND PERFORMANCE

Many of the QuickTime movies on this CD are very complex, utilizing advanced sound and visual effects to achieve their level of sophistication. Some were originally designed for playback on high-performance computers and may suffer on low-end machines and CD-ROM drives. This is particularly true of grand prize winner Undo Me, for which we recommend a high-end Macintosh or Windows PC and a double-speed CD ROM.

Sumeria has endeavored to optimize all the movies to play on as many different Macintosh and Windows computers and CD-ROM drives as possible. This may have a negative effect on the visual quality and smoothness of some of the movies. Our apologies to the filmmakers. In some cases, copying movies to a hard drive should also boost their performance. QUICKTIME: THE CD is not compatible with disk caching software such as CD-ROM Toolkit from FWB. Disable all such software and use the driver software that came with your CD ROM drive instead.

MACINTOSH ONLY ENTRIES

Two entries are available on the Macintosh only and are not available to Windows users. They are: I Wish I Could Fly, an animation by Aaron Yamaguchi and an interactive HyperCard stack, Alice, Bob & Cindy by Clyde Dillard.

MOVIES FOR DOUBLE-SPEED CD-ROM DRIVES

In some cases, we had the opportunity to optimize movies for double-speed CD-ROM drives. The following double-speed (2x) movies can be found in a folder called DOUBLESP on CD 1:

ANIMATION

This Thing (THISTH2.MOV), Dancing Chairs (DANCHRS2.MOV)

EXPERIMENTAL

Changes (CHANGES2.MOV), das simulation (SIMULAT2.MOV)

HUMOR

The Thing That Ate Those People (THINGAT2.MOV)

MUSIC

The Hellecasters (HELECAS2.MOV)

MEMORY REQUIREMENTS

Some entries require more RAM than others. These files include I Wish I Could Fly by Aaron Yamaguchi (Animation), My Parents' Hands by Don Leeds (Narrative), and UnDo Me (Music Video). For full functionality, we recommend that at least 6MB of free RAM be available to these applications.

COPYRIGHT INFORMATION

All movies on this CD are under license to Sumeria. Full copyright is the property of the original contributing artist. All movies are intended for individual use of the purchaser only. They are not for resale or redistribution. Please contact Sumeria if you would like to obtain permission to republish any movie. Sumeria will arrange to have the artist get in touch with you.

MOVIE NAME INDEX (DOS Filenames)
