

This lets you define or modify default LightBox settings.

General preferences:

- Using the “Choose Application” button, you can choose which application you want to launch with a standard “Open File” dialog.

Option **double click** on a thumbnail and LightBox will tell your chosen application to open the selected file. If the specified application is not currently running, LightBox will launch it for you. (e.g.: Photoshop™ 2.0 or Canvas™ 3.0).
