Roll'em

Version 1.0
(c) 1991, Kirk Lewellen

Released: July 7, 1991

DISTRIBUTION:

I'm handing it out to anyone that wants it. Use it without any formal obligation to the author, except that you can't sell it to anybody. I've obtained a lot of Public Domain stuff in the past from various BBSs, so here's another attempt on my part to contribute back to the cycle.

If you like the program and feel that you've received some enjoyment from it, (and you feel charitable) you can send me $1 or leave a message to Bill White on Compuserve ID# 72070,3427. See also below.

This program requires Microsoft Windows 3.0 and Visual Basic run-time VBRUN100.DLL to run.

What is it?

Rollem is my first attempt at programming Windows 3.0. After evaluating Actor and Turbo Pascal for Windows, I discovered Microsoft's Visual Basic. The program is by no means exemplary of programming style, but it does provide an example of the ease of programming in the Visual Basic environment. Rollem is the common dice game Craps. The source code is provided for anyone interested in enhancing the program or learning the VB way of programming by example.

How to Contact the Author:

I hope you get some enjoyment from this program. If you have any comments, suggestions or you want to contribute to my well being, I can be contacted at the following:

US Mail: Kirk Lewellen
            107 Juliet Ave.
            Murfreesboro, TN 37130

Heart of Tennessee (HOT) BBS
2400/9600 8-N-1
(615) 890-8715
Sysop: Larry Reeves, who supported the programming project and continues to provide support for a wide range of computer users in the Middle Tennessee area.

Enjoy......
