About

Bellcore Calendar

To view any online help, position mouse over an area and click the right mouse button.

The "Welcome" window contains many tips including coming events, valuable company facts and contact information. There is also a scrolling information bar at the bottom of the screen.

How to use Calendar Settings

Bellcore Top Ten

Mobility Management / PACS Top Ten:

To view the information quotes using the mouse, click on any number. To select a number from the keyboard, press the corresponding number while holding down the control key.

Calendar Schedule

The three main features of the scheduler are:

- A. Date Notes
- B. Hour Notes, and
- C. Hour Alarms

To enter a note for a specific day, scroll for the correct day, double click on the note, and begin typing.

To enter a note for a specific hour, do the same.

To set an alarm, select the hour then double click in the second column. On the next screen, set the alarm and enter a note.

Calendar Notes

To enter a note, select a day from either the calendar or scheduler, then click on the "notes" portion of the screen.

Monthly Calendar

The monthly calendar is a dynamic portion of the Calendar system. The user may jump to different years, months and specific days to schedule appointments, add/delete notes, etc.

When the user saves notes, an icon will appear on the day specified. To view the note, click on the "note" in the appropriate day. The note will then be shown in the "notes" window.

In combination with the scheduler and note keeper, the user's time can be well documented.

Menu Commands

Menu Commands

The menu bar allows the user to select edit options, window settings, date selections and file options.

ToolBar

There are corresponding icons in the toolbar that may be used as "short cuts."
