

Expert Movie Clips Screen Saver

Changes to the printed manual

1. The **Tiles** option referred to in the printed manual is no longer available in Expert Movie Clips Screen Saver. To tile your Windows wallpaper, double-click on the **Control Panel** icon in the **Main** program group in Program manager. Choose **Desktop** and check **Tile** under the **Wallpaper** settings.
2. It is recommended that any User defined .BMP should have a pixel size of at least 120x240 in order to be seen as a full backdrop for movie viewing.
3. Any photo used as a .BMP for the User defined option, may not appear with original colors. Due to the continuous changes in the color palettes being displayed, photo colors will appear distorted.
4. Any .AVI files added to your XMOVIE directory, will be read by the Expert Movie Clips Screen Saver Editor. However, since no reference has been pre-determined for a .BMP of the file, the library will only display the file name with the .AVI extension. These files will be viewed normally when the screen saver is played.
