

CRT Spray's README file

CRT SPRAY IS DISTRIBUTED AS SHAREWARE. IF YOU USE IT FOR MORE THAN 30 DAYS, YOU SHOULD REGISTER IT.

What's in this file:

Most of CRT Spray's documentation can be found in CRT Spray's help file (CRTSPRAY.HLP). What README.WRI contains is information that didn't seem like it should go into the help file. This includes the following topics:

- o Installation
- o Warranty information
- o Distribution information
- o How to get in touch with CM Software.

CRT Spray's help file (CRTSPRAY.HLP) contains:

- o An overview of CRT Spray's features and how to use them.
- o A reference section that explains how CRT Spray's menu items and dialog work.
- o Information on CRT Spray's 5 screen savers.
- o Information on what Shareware is.
- o Directions on how to register CRT Spray.

Installation:

To install CRT Spray, run INSTALL.EXE. INSTALL.EXE will install all the files and build all the required data files. You can uninstall CRT Spray at any time by running UNINSTAL.EXE

INSTALL.EXE will ask you a number of questions during the installation process. First it will ask for a directory to install the files into. Then it will begin scanning the drive containing your Windows directory for screen savers. When it finds one, it will ask you if "you want to add it to the list". If you tell it to add it, then CRT Spray will add that screen saver to it's database. If you tell it not to, CRT Spray will ignore it entirely. After it has finished looking for screen savers, installation is complete.

Pay attention to INSTALL.EXE's last dialog. It contains a brief overview on how to use CRT Spray.
