

Ice Pick v1.96 (c) 1995 Conan L. Brown During the installation process, you may be notified that some of the system files already exist on your system. You can choose to NOT replace any files and try running Ice Pick. This is the safest way to avoid any problems with other programs you have. Ice Pick will usually run OK with any version of the common system files. If you received Ice Pick on disk, and have run the INSTALL program, your copy will be ready for use. The BBS package has an Install utility also but does not include the VBRUN300.DLL file. System Requirements: 1. Windows 3.0 or newer running in Standard or Enhanced mode. 2. Vbrun300.DLL - The Visual Basic 3.0 Runtime Library. This file is not included with the BBS Package but can be obtained from America Online, Compuserve or most any BBS. This program is not to be used in violation of any Law. By using Ice Pick you accept the responsibility for knowing and acting within all Local, State and Federal regulations that apply in your situation. In short, if it isn't legal for you to use Ice Pick, Don't! No guarantees of any kind are made regarding the performance of this program. Registering your copy of Ice Pick will enable printer support of all Statistics, Schedules, and Predictions. Please send \$9.00 to....
