To AOL MIDI Forum: my © info is on file. I also have a WAV in the Heavy Metal area of PC Music called, DAVEWAVS.ZIP, an "electric guitar wankout."

These 2 are works in progress, getting tweaked periodically, done using a Roland GR-1 guitar synth. Bleeps+boops are the result of being new to this guit/MIDI thing.

To Trusno1, Bluefret, etc:

Patches are set up for SB16-type FM sound card. I use the Windows MIDI mapper, Media player, etc. Your setup is OK if the drums sound like drums. The rest should sound similar to music. (Settings as-is sound like crap thru my GR-1.)

E-mail me for GR-1 or other synth patch settings, comments, and requests for original material to Fretzoid@AOL.
