

Might and Magic III Solve

Brought to you by

Far Side of the Kremlin BBS

INTRO:

The basic needs to finish the game are:

A Blue Priority Pass Card  
(Give Eleven Ultimate Power orbs to any of the Kings)

You must be an Ultimate Adventurer  
(Drink from the fountain in The Maze from Hell)

You must be a Champion of Good, Evil, or Neutrality.  
(Give Eleven Ultimate Power Orbs to one of the Kings)

You must find Hologram sequencing cards one through six. They are in dungeons. (The exact locations are in the Dungeon file)

You must know the code "645231"

-----  
Some hints:

Obsidian is the best metal. You are better off with an Obsidian club than a Diamond Great Axe.

The Heroism Spell can help a character hit something almost every time. Very useful Spell.

Some Monsters are only vulnerable to magic or Elemental damage.

Keep any Items of Implosions you find. You need lost of Implosions to kill the Terminators.

Protection from Elements is a good spell to have in your corner.

-----  
ITEMS  
-----

The Following lists are not quite complete. There may be a missing weapon or two. But it contains almost everything you will find. Although the Elemental effects are far from complete.

Several different things affect the characteristics of weapons and armor.

The most basic of these is what kind of armor or weapon it is (Short sword, Cutlass, Ring Mail, or Plate mail) This will be defined as the Basic Nature of the element.

There is the "Metallic" nature of the Item. (This includes things like Leather, Amber and Obsidian as well as Iron, Steel, Gold, etc.

The effects of the metallic nature are different in weapons than armor.

There is the Elemental nature of the Items. Elemental nature includes Power, blazing and cryo. I don't have a full list of how Elemental nature affects damage but if you have an elemental weapon then it adds to your elemental resistance and causes elemental damage to your opponent. This is very useful when battling Ghosts, or Fire Stalkers as normal damage does not affect them. The rise in elemental resistance is the same for weapons as for armor.

There is the Statistic nature of the Item. All Items with the same Statistic name (Genius for example) give the same increase in stats. In the case of Genius that is +30 int. These effects last as long as you wear the item.

Lastly there is the Spell nature of an Item. The Spell that it can cast. For example a Short sword of Implosions if equipped and used casts the spell Implosion. The Spell nature of an Item must be recharged. If the charge of a Spellcasting Item reaches zero, the Item is destroyed. To Recharge an Item cast the sorcerer spell recharge. Multiple recharges work.

The order that these are presented in is:

Elemental Metallic Statistical Base Spell

Not all Items have all of these attributes. But multiple attributes are possible. I once had a  
POWER KNOWLEDGE CROSSBOW OF WATER WALKING.

This did Additional Energy Damage Increases your int by 12 and casts the spell Water walking.

OUTSIDE  
-----

Outside world Steps take 10 minutes instead of 1 like inside steps.

Except for the Golden Pyramid Key Card I don't think there is anything outside that you need to finish the game. Other than the entrances to the dungeons towns and things.

The Monster Regeneration places can be destroyed. Until they are the monsters in that section (A1 is one section B3 is another) will repopulate themselves.

There are 4 Ultimate Power Orbs in here.

When you find numbers and directions on the walls there is a space in the walls at the intersection of the directions. For example if you found a wall at (4,5) that said 1 north and a wall at (4,2) that said 5 east then at (9,4) you would find a space to teleport into. All the spaces have large amounts of gold in them.

The Dragon Lord is about (23,9) go south from there and you meet up with him. Save the game at that point. You have to be very powerful to beat him. It is worth the effort though. Your characters split ten million experience points. I suggest you cast Heroism on all your characters.

There are a bunch of Acid pits with 50 gems in each. If you can't cast a 100% protection from elements (lvl 48 or higher) you shouldn't be in this dungeon anyway.

Also you should cast protection from cold. The green dragons breath it.

I found about 15-20 million gold here.

Interspatial Transport number 33 (14,15)

Before you go in here get a hireling. You need cannon fodder. Teleport works in here so to get to all the statues, start at (15,15) then: Teleport 9W, Teleport 6W, have the hireling examine the statue and be eradicated. Teleport 9S, Teleport 6S, examine the statue, give it the gems. Teleport 9E, Teleport 4E, examine the statue and give it the gold. Then just walk 2 East, 2 North, and 1 East and you will be back at the exit ladder.

Statue 3 donate 10K gold.....(13,0)

Statue 2 donate 1k gems.....(0,0)

Statue 1 Eradicates 1 char.....(0,15)  
Have the hireling examine the statue. He is cannon fodder after all.

Then go back to Blackwind.

-----  
PYRAMIDS  
-----

The Pyramids you need a lot of might in your first two characters to break down the secret doors here.

To get into the pyramids you need the Golden Pyramid Key Card from A4 (15,13) You need at least 50 might to get the card.

Some Pyramid locations can't be reached directly from outside. The nearest tube to the outside is listed as the entrance in those cases.

The Teleport spell doesn't work in here.

Beta Engine Sector        enter from Map F1 (4,9)  
Interspatial Transport number 36 (7,14)

All crystals in X=10, X=12, and X=14 increase the YEAR by 6 this is not a temporary change of age. Suppose the date before you touch the crystal is 504. Your characters' normal age is 22. After you touch the crystal the year is 510 your characters' normal age is 28. There is no cure. The worst part is that the bank doesn't pay interest on the six years. If it did it might be worth it once. Avoid these things like the plague.

There are a bunch of cups that give experience and stuff.  
Spellcasters can't use them. Each is only for one character.  
Watch out for the Terminators. I took 6 characters and got half a  
million exp for each Terminator. But They get to eradicate you.  
Only Energy spells and weapons work on them so be prepared to cast  
a lot of Implosion spells. Good luck.

    Carnage is JVC

Secret way to Aft Storage Sector...(15,14)

The inside scoop on what is going on. Type CREATORS at the altars.

1. Spanning the farthest reaches of the Universe, two super-  
developed societies, the Ancients and the Creator, are engaged in  
a galactic race for power.

2. The Ancients draw their power from the heat and light of stars  
to create intricate mechanisms of society, then send these  
civilizations to cultivate developing worlds.

Lots of Terminators in this place. You don't have to face them to finish the game though. Remember IMPLOSION spell Items that cast the spell should be fully charged before you come in. And save a lot. If worst comes to worst you can use the Interspatial Transport box to bug out.

Statue at (0,8) says: Congratulations! only masters of Might and Magic posses the power to reach this terminal. Include the secret word "KTOW" when you register your score with the Ancients to receive a special reward.
