

Preview 1.0 - A Tool to Preview Windows Fonts

Function: Preview displays a list of all fonts known to the system.

Click on a font, and a sample of the font is drawn in the large window on the right. Option buttons along the top let you choose the font size, set a new text string, and exit.

Installation: Copy preview.exe to any directory you wish. You can launch it from Program Manager or your favorite menu system. There are no special requirements.

Operation: **Preview** displays a list of available fonts in a list box in on the left side of the workspace, and a sample of the font in the larger window at the right. You choose a font by clicking on the name in the list box, or moving the highlight with the cursor keys. You can change the font size by clicking the font button, and choosing a new size. You can change the sample string by clicking the String button and entering the new text (50 characters max). The ? button brings up an About dialog box.

Uses: **Preview** is an easy way to preview and select fonts while in your favorite DTP or Word Processing program. Just run **Preview**, and keep it as an icon, or hidden behind the main program window. When you need it, click on the icon, or switch windows with alt-tab. **Preview** was written to minimize its use of system resources, so hopefully this will be practical for you.

Constraints: Must be run on a 286 CPU or later. The more fonts that are installed, the more memory Preview will need (although this burden should not be too great).

Copyright Notice: **Preview** is a copyrighted work of Doug Overmyer. However, it may be used freely, and distributed so long as this explanation accompanies the original executable file.

Disclaimer: You use this program ENTIRELY at your own risk. It may or may not be suitable for your needs. Any loss you suffer is at your own cost. I do hope, however, that you find it useful.

Notes: Preview is written in Turbo Pascal for Windows. It has been tested with ATM and the standard Windows fonts.

Problems, Suggestions: Please drop me a note on CIS:71021,2535
